Shortage of Swede Turnip Seed

Swede turnip growers are urged this spring to endeavour to secure and transplant a few sound roots to produce seed for themselves and their neighbors.

Owing to the abnormal conditions now prevailing there will likely be very little Swede seed for planting in the Spring of 1918 unless our Canadian swede turnip growers make provision for their own supplies by growing the seed themselves.

GLENELG IN 1917

PASSING OF THE PIONEERS.

By the Assessor

To begin where we left off two weeks ago, we shall endeavor to give as near as possible the changes that have taken place since our year ago.

Who can tell who will appear on the assessment roll of 1918 that are now in the prime of youth and health, aged and middle aged who may be enrolled on the death list on the next assessment roll.

The death columns we found total 27 and the birth columns 35, so that there were more come to life than died.

There are over 300 dogs entered in the columns set apart for them. Of these we didn't find many who claimed to have mother dogs as \$2.00 is the charge for them.

Now we think there is enough said and must draw to a conclusion, as we cannot begin to persnify the many who showed kindness to us.

So with many thanks to each and all for their kindness to us, we close. To all our very best wishes for the future.
