

# WHEN WILL LIMIT BE REACHED?

IN THE EVOLUTION OF DEATH-DEALING MACHINERY.

Having Conquered Earth, Sky and Water, Science Sighs For New Worlds to Conquer.

War breeds invention. Plunged into the maelstrom of international conflict—men and nations intent on the annihilation of men and nations—the human brain responds to the evolution of massive death-dealing machinery on a scale hardly commensurate with the scientific endeavors of peace periods.

Three years of terrific fighting between the leading nations of the earth, the nations that have advanced to the highest pinnacle of civilization through the continual extension of scientific research, have brought out gigantic weapons of warfare—undreamed-of things that a decade or two ago would have been laughed out of the world court as the contraptions of fools and the follies of lunatics.

We may the layman ask, "Where will it all end?"

Then and Now

Think of the huge stones hurled down upon Leonidas and his brave Spartan band in the mountain passes at Thermopylae; and then ponder on the high-explosive bombs propelled from modern trenches.

Remember the wooden horse in which Ulysses hoisted his Greeks over the walls of Troy, and now the huge tractor "tanks" that crawl upon the battlefields, freighted with men and munitions, not at all unlike the gift horse of the ancients!

Consider the leather sling and the brook pebble with which David slew the giant Goliath, and then the evolution through the centuries to the German 45 centimeter and the French 75 guns that carry a missile weighing tons for many miles through space!

The galley of Ben Hur has turned into the dreadnought bristling with sixteen-inch guns. The cavalry that charged "into the valley of death" at Balaklava has become the winged air cavalry of the twentieth century flying corps. The battalions of the French revolution have been transformed into the "white arm"—the deadly bayonet of the Tommies and the Poilus.

**Marvels of To-Day**

Napoleon might never have had retreat from Moscow had he had motor lorries to bring him food and munitions!

Nelson could have had a thousand ships at Trafalgar, and yet the French and Spanish might have laughed at him through the periscope of a single submarine!

Wellington won at Waterloo with the timely arrival of Blucher, but Napoleon might have conquered Europe had Grouche been able to command such a fleet of taxicabs as Joffre used at the Marne to save Paris!

This continent might not have remained the heritage of the Anglo-Saxon race if Montcalm, on "the Heights of Abraham," had had the "flares" that illuminate the European battlefields at night to reveal the approach of Wolfe at Quebec.

The French might have escaped the Prussian trap at Sedan had they had scouting airplanes to "eye" the enclosing wall of steel and flesh.

Modern guns like the Germans used at Liege and Namur would have made short work of Lucknow and Mafeking. And yet, those marvels that to-day make warfare a succession of scientific miracles may be just as antiquated in another century as are the instruments of warfare in 1917—and probably will.

Science, having conquered the earth with the locomotive and the motor-car, the air with the airplane and the deep waters of the oceans with the U-boat, sighs now for new worlds to conquer. What new and horrible weapons for the future may we contemplate?

## BEWARE THE POISON BOTTLE.

New Invention Will Prevent Making a Fatal Mistake.

Every now and then somebody helps himself to a dose of poison out of what he imagines to be a medicine bottle. Nearly always, of course, it is in the dark. Next on the job (unless the doctor happens, by good luck, to arrive in time) is the undertaker.

Why indulge in such foolishness? A New Jersey woman, Mary Beers, has invented a bottle stopper that is more efficient, for precautionary purposes, than all the poison labels ever thought of.

It is simple enough—a cork, to fit the bottle, with a metal arrangement in the shape of a cross that is stuck through it and projects above it. It is sharp-pointed at the top and the two arms are sharp-pointed.

You wake up in the night with a pain and grope in the medicine closet for the Jamaica-ginger bottle. Ah! yes, that it is; you recognize it by the shape. You go to pull the cork and your fingers are severely pricked. Yes, it is painful. But by that token you know that the bottle you have got hold of is a bottle of poison. Better a pricked finger than a coffin—eh, what?

## "One Meatless Meal a Day" is a good food slogan for war time, or any time—better make it two meatless meals a day—it would mean health and strength for the nation.

But be sure and get the right substitute for meat in a digestible form. **Shredded Wheat Biscuit** is the ideal substitute for meat. It is 100 per cent. whole wheat prepared in a digestible form. Two or three of these little loaves of baked whole wheat make a nourishing, satisfying meal at a cost of only a few cents. Delicious with milk or cream or fruits of any kind.

Made in Canada.

## FATE OF AUSTRIA-HUNGARY

### PRESENT FLIGHT OF THE DUAL MONARCHY.

Dependence on Germany is Entire and to Desert Would Mean Economic Suicide.

Political events are moving so rapidly in the Central Empires that an article on the fate of Austria-Hungary in The World's Work is particularly topical.

Will Austria-Hungary leave Germany before the end of the fight?

To this the answer seems plain: It would be certain political and economic suicide for her to do so. Hence she cannot, unless her people feel the depression of hunger so desperately that they become reckless of their future.

Will Austria be subservient to Germany after the war? And to what extent is she so now?

Briefly, Austria-Hungary cannot help herself in the matter. Her dependence is not voluntary. So far as is very little love lost between the two countries. For Prussia and the Prussians a distinct dislike is even felt.

The wounds of 1866 are still smarting. Her fall from power, the loss of her supremacy in the Germany of that time, are keenly realized. Prussia is regarded as an upstart with the unnamable qualities of an upstart. The departed glory of the Austria of old is deeply regretted. The Slavs of Austria bear their powerful western neighbor undisguised hatred.

But needs must. Austria is firmly convinced that without Germany's strong arm to support her she is doomed as a political entity. We all grasp the hand that is held out to us to save us from drowning, no matter whose it be.

**Austria's Plight.**

Consider the facts. Look at Austria-Hungary's present plight. Austria-Hungary is economically undeveloped, or at least not sufficiently developed. Her turbulent history, plus another more recent element, i.e., the race strife within her borders, accounts for that. Of that one becomes aware as soon as one crosses her frontiers.

How far behind she is in intellectual development is best seen, for instance, by studying her latest statistics. From them it is seen that there are whole large provinces where illiteracy predominates.

Hungary especially, though a country abounding in natural resources, urgently requires capital. Formerly Paris was the money market to which Hungary applied by preference. But owing in part to the heavy drain on French liquid resources made by Russia, as well as to the fact that Hungary formed part of the Dreibrund, that market was closed to her.

That became very evident during the five years preceding the war, when Hungary vainly attempted to place various loans for internal improvements in Paris. There was a financial boycott declared against Hungary by France. Thus Hungary, too, was forced to turn to Germany as a financial backer.

The whole banking system of Austria, her financial status, rests and leans on Germany. The connection is very intimate and strong. Most of the Austrian and Hungarian industrial papers, shares, and values are quoted and dealt in outside of Vienna—only in Berlin.

Unless there is a tremendous slump in condition between now and harvest the supply of beans will be, proportionately, greater than the supply of potatoes. The bean crop of the United States was estimated on July 1 at 22,000,000 bushels, against 8,846,000 a year ago.

**TITUSWAD**  
Solely for the relief of  
Rheumatism, Gout, Neuralgia, Sciatica, Headache, Toothache, Backache, Stiffness, Sprains, Bruises, Burns, Scalds, Frostbite, and all other forms of Pain.

## GEN. BRUSILOFF RUSSIAN PATRIOT

### KEPT HIS OWN COMMAND IN CONTROL DURING REVOLUTION.

Man of Statesmanlike Wisdom With the Swift and Courageous Action of a Soldier.

All honor is due to the heroic young War Minister, Alexander Kerensky, who has played such a splendid part in firing the fighting blood of the Russian soldiers, chilled by the work of German agents in the first days of the revolution.

Less dramatic for the moment, but immensely effective, has been the work of General Brusiloff, the Russian Commander-in-Chief.

The drive began on Brusiloff territory, between Zlochoff (Zluzow) and Brzezany, along the Stripa River; it was begun with the armies which Brusiloff had held firmly in his own hands while he was commander of the south-western front before his appointment as Commander-in-Chief. It is pertinent to ask why the Brusiloff group of armies was chosen to begin the new drive; why this group of armies was supremely ready and effective. The answer, I believe, is this: During the three perilous months immediately following the abdication of Nicholas II, when the work of German agents in Russia was, at times, seemingly triumphant, Brusiloff had given orders that not one of these "Socialist" propagandists should be tolerated within striking distance of any of his troops—and had seen that his orders were carried out. Therefore, it happened that, while the German agents were dragging the Kronstadt sailors and sowing discord at Petrograd, the morale of the Brusiloff armies on the southwest front was almost wholly unimpaired, their fine discipline was almost wholly unshaken.

Brusiloff intervened in another way, which has been indicated in the press cables, but which has not, in all likelihood, been clearly understood. It will be remembered that German agents, just about the time when Nicholas descended from the throne, scattered broadcast through Petrograd the famous "Order No. 1," apparently signed by the Executive

Committee of Workmen's and Soldiers' Delegates, and actually supported by a few of the extremists in that ill-balanced body; its effect was practically to smash the mainspring of discipline in the Russian army.

Kerensky hastened at once to the Executive Committee and procured the publication of a modifying "Order No. 2," in an effort to neutralize the damage done. But Gutchkoff, then War Minister in the Provisional Government, seemingly daunted by the extremists, gave the official sanction of the War Ministry to some of the subversive provisions of the German proclamation.

**Soldier and Statesman.**

Immediately afterward two events were chronicled by the cables, each in a space of three or four lines. The first of these was a hurried visit of certain famous generals to Petrograd and the Provisional Government. Brusiloff was one of them. The second event was the resignation of Gutchkoff, whose place was taken by Kerensky. These two comparatively unnoted events are not unconnected, we may surmise; they were not without their bearing on the swift convalescence of the Russian army.

We can see already, through the early and magnificent result, what statesmanlike wisdom inspired that swift, courageous and decisive action. But without question, Brusiloff's gift of statesmanship is best demonstrated by the fact that while it was he who led the Czar's armies in the great Galician drive which began on June 4, 1916, it is still Brusiloff who leads the armies of Free Russia.

The Department of Agriculture and Technical Instruction for Ireland, in exercise of the powers conferred on them by the defence of the realm regulations, have made an order, which came into operation on Saturday, July 21, prohibiting the exportation of horses from Ireland, save under special license.

General Alexander Brusiloff.

Most Wonderful Invention. A Player-Piano that transposes in thirteen tones, manufactured exclusively by the National Piano Co., Limited, will be on exhibit at the Toronto Industrial Exposition at their booth. A cordial invitation is extended to each and everyone interested to examine and hear this wonderful Player. National Piano Co., Limited, City Warerooms, 266-268 Yonge St.

**Fish For Central Canada.**

Fish is to become more plentiful in the Canadian market. Hon. W. J. Hanna, Food Controller, has inaugurated a special refrigerator express car service direct from the Nova Scotia coast to Toronto. This is the first step in a plan to put on a fish car express service from both Pacific and Atlantic points to supply Central Canada with sea food cheaply.

**MURINE Granulated Eyelids.**  
Sore Eyes, Eyes Inflamed by Sun, Dust and Wind quickly relieved by Murine. Try it in your Eyes and in Baby's Eyes.  
YOUR EYES No Smarting, Just Eye Comfort  
Murine Eye Remedy is the only Drug that is safe for the Eyes of Babies, Children, and the Sick. Ask Murine Eye Remedy Co., Chicago.

**Women Can Help in Harvest.**

Women should help harvest the bush and small tree fruit crops this year. A mobilization of available women for this work would be of great assistance. The women of Europe are now working regularly in the fields. They have planted and harvested crops ever since the war started. Are the women of Canada willing to do as much? If we wait until the fields are yellow we will be too late. The various women's organizations could do much if they would organize immediately.

Maidenhair fern should not be watered over the foliage. Keep the pots standing on damp ashes and apply the water to the pot. In the garden apply the water at the base of the plants.

Tulips, narcissus and hyacinths, potted now, and the pots buried, may be had in bloom for Christmas.

## AN AGE OF WEAK NERVES

"No heart for anything" is the cry of thousands of men and women who might be made well by the new, red blood Dr. Williams' Pink Pills actually make.

Misery day and night is the lot of hosts of men and women who are today the victims of weak nerves. Their pale, drawn faces and dejected attitude tell a sad tale, for nervous weakness means being tortured by morbid thoughts and unaccountable fits of depression. These sufferers are painfully sensitive and easily agitated by some chance remark. Sleeplessness robs them of energy and strength; their eyes are sunken, their limbs tremble, appetite is poor and memory often fails. This nervous exhaustion is one of the most serious evils affecting men and women of to-day.

The only way to bring back sound, vigorous health is to feed the starved nerves which are clamoring for new, rich, red blood. This new, good blood can be had through the use of Dr. Williams' Pink Pills, which fact accounts for the thousands of cures of nervous diseases brought about by this powerful blood builder and nerve restorer. Through the fair use of this medicine thousands of despondent people have been made bright, active and strong.

Dr. Williams' Pink Pills are sold by all dealers in medicine, or may be had by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

### TO MY SOLDIER.

Dear Love, I wanted you to know That ever in my heart I go And stand beside you, there

Amid the noise, the flying shell; Amid the smoke; amid the Hell; I stand beside you there!

My quivering soul knows but one prayer— "Oh, keep my soldier in Thy care— God, stand beside him there!"

—Maude Gordon-Roby.

### MILITARY CROSS HERO

Capt. William Stewart MacTier, who was reported recently to have been awarded the Military Cross for gallantry in the firing line, is a son of Mr. A. D. MacTier, general manager of eastern lines of the Canadian Pacific Railway. Capt. MacTier went to the front with the first Canadian Contingent and has been twice wounded, the first time at Ypres, and lately at Vimy Ridge.

At the outbreak of the war, Capt. MacTier was on the ocean returning from Europe, and immediately on landing joined the Thirtieth Battalion, under Lieut.-Col. (now Brigadier-General) Loomis, D.S.O. He went to the front with that unit and fought with it when it covered itself with glory at Ypres and Festubert. He was then wounded by shrapnel and returned to Montreal to convalesce. On returning to the front he was attached to Brigadier-General Loomis' staff, he having taken over the command of a brigade in the meantime. After serving in this capacity for a short time one of his feet gave out and an operation was necessary. On his return to the front on this occasion he was transferred to a Montreal Highland Battalion and promoted to his captaincy.

Unconditionally guarantee Ham-Lax and Ham-Ray to give relief for Rheumatism, Paralysis, Stomach, Kidney and Liver Disorders. Write us at once. Explain what you think about yourself, and whether you have Electric Current available or not and leave the rest to us. Address the Ham-Lax Co., 16 King West.

Will You Visit the Exposition? Remember you are cordially invited to call and have your case treated free of charge, and a full explanation of what Ham-Lax and Ham-Ray will and will not do. It is well worth the visit to find out the true facts of your case.

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You say to the drug store man, "Give me a small bottle of freezezone." This will cost very little but will positively remove every hard or soft corn or callus from one's feet.

A few drops of this new ether compound applied directly upon a tender, aching corn relieves the soreness instantly, and soon the entire corn or callus, root and all, dries up and can be lifted off with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that freezezone dries in a moment, and simply shrivels up the corn or callus without irritating the surrounding skin.

Don't let father die of infection or lockjaw from whittling at his corns, but clip this out and make him try it.

If your druggist hasn't any freezezone tell him to order a small bottle from his wholesale drug house for you.

St. Isidore, P. Q., Aug. 18, 1934  
Minard's Liniment Co., Limited.  
Gentlemen,—I have frequently used MINARD'S LINIMENT and also prescribed it for my patients, always with the most gratifying results, and I consider it the best all-round Liniment extant.

Yours truly,  
DR. JOS. AUG. SIROIS.

Apple Pie.  
Patrick had called on his Betsy, and she gave him a handsome helping of her special make of apple-pie. Patrick was loud in his praise.

"I tried a new way," said Betsy beaming. "I put a few gooseberries in to flavor it!"

"Beats!" cried Patrick. "If a few gooseberries give so good a flavor to an apple-pie, what a delight of an apple-pie it would be made of gooseberries entirely!"

**DODD'S KIDNEY PILLS**  
CURE ALL KIDNEY DISEASE  
GRAVEL, RHEUMATISM, BRONCHITIS, BRIGHT'S DISEASE, DIABETES, NEURALGIA, SCIATICA, MIGRAINE, HEADACHE, STIFFNESS, SPRAINS, BRUISES, BURNS, SCALDS, FROSTBITE, AND ALL OTHER FORMS OF PAIN.

Dr. Ferdinand King, a New York City Physician and Medical Author says: "There can be no strong, vigorous, iron men nor beautiful, healthy, resplendent women without iron—Nuxated Iron taken three times per day after meals will increase the strength and endurance of weak, nervous, run-down folks 100 per cent. in two weeks' time in many instances. Avoid the old forms of metallic iron which may injure the teeth, corrode the stomach and thereby do more harm than good. Take only organic iron—Nuxated Iron." It is dissolved by all good druggists.

## SHORTAGE OF WOOL.

By Saving Rags Canadians Can Help to Avert Serious Shortage.

In all the warring countries the demand for rags, to supply the world's shortage of wool, is insistent. Canada is no exception, and appeals are being made throughout the country for the savings of rags and old clothes that they may be again used in the manufacture of shoddy, to relieve the strain upon the wool supply. In Great Britain, the Local Government Board has called attention to the varied means by which this material may be saved, as follows:

"On account of the large stocks of clothing needed for the British and allied armies, efforts are being made to save the maximum quantity of rags for use in shoddy mills. The aid of women's societies has been invoked in conjunction with urban and rural officials. The collection is largely dependent upon the patriotic spirit of the people, but large supplies of old clothes and rags will be called for. Central depots are provided for storage, and when enough rags are on hand for shipment they are forwarded to the district centre, where they are sorted and sold to mill owners, the proceeds going to the Red Cross or other war charities. An special appeal is made to the tailor and dressmaker to keep their cuttings for this purpose. Discarded clothing is separated into three classes—all wool, all cotton, and cotton and wool."

This method can be undertaken in Canada by many organizations. Hitherto, owing to our wasteful habits, the saving and collecting of rags has not appealed to us, but the war has brought about many changes, and it is incumbent upon all Canadians to do their bit toward averting the serious shortages that otherwise are sure to result.

Where Water Spreads Fire. The use of water in attempting to extinguish grease fires is extremely dangerous. The Lumber Underwriter reports a case where a fire started in the oil box of an engine. An employe dashed a pail of water on it, scattering the burning grease, which was taken up by a revolving flywheel, throwing it in all directions, causing the plant to burst into flames in many places simultaneously.

**POSITIVE PROOF, AMAZING RESULTS**

\$5,000 Guarantee If We Fail.

There has been a standing offer of \$5,000 Reward for any case Ham-Lax and Ham-Ray fail to relieve if directions are followed for three years, and more than 50,000 people have tried it successfully without a single failure. That is why the offer still holds good.

Mr. Manuel Varquez, of 142 Hastings Street, Toronto, was going to have an operation for Kidney Stones two weeks ago. He tried Ham-Lax and Ham-Ray the day before the operation was to be performed and received such benefits that he purchased a Ham-Ray Machine and one bottle Ham-Lax, with the results that to-day he is cured.

Mr. Thomas Jones, of 113 Sheridan Ave., Toronto, suffered with Rheumatism in his heart and other parts of his body for 9 years. After trying everything he failed to get results until he had one treatment of the Ham-Ray Machine and used one bottle of Ham-Lax. Unsolicited he has given his testimonial.

Minard's Liniment Relieves Neuralgia. Cheap Fish.

In 1915 and 1916, Manitoba lakes produced 48,000,000 pounds of fish, 75 per cent. of which was exported to the United States. For 9,000,000 pounds of whitefish, the fishermen received on the average 5 cents a pound. In some Canadian cities Manitoba whitefish sells at 15 cents a pound or more. The Food Controller for Canada is arranging to reduce the wide margin between fishermen and consumers.

Old pastures should be ploughed early if they are to be seeded to winter wheat or rye. After beans or potatoes the grain may follow with only one disking.

## FELICIA'S TAKINGS.

First Felicia took to knitting. Everywhere she went, On a wristlet, sock or sweater Constantly intent.

Next she took to Red Cross nursing. Making countless slings, Bandages and shirts and towels, Lint and other things.

Then Felicia took to canning. Every afternoon Cooking messes in the kitchen, Brandishing a spoon.

When of beans, tomatoes, peaches, Corn and carrots she Wearies, I, behold! am hoping She will take to me.

—Minna Irving.

## BABY'S GREAT DANGER DURING HOT WEATHER

More little ones die during the summer than at any other time of the year. Diarrhoea, dysentery, cholera infantum and stomach disorders come without warning and when a medicine is not at hand to give promptly the short delay too frequently means that the child has passed beyond aid. Baby's Own Tablets should always be kept in the home where there are young children. An occasional dose of the Tablets will prevent stomach and bowel troubles, or if the trouble comes suddenly the prompt use of the Tablets will cure the baby.

Anderson, Minna, Alta., says: "Baby's Own Tablets are the best medicine for little ones who are suffering from a weak stomach. They cured my baby when suffering from stomach complaint and have made her a fine healthy child." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## MAGIC READ THE LABEL BAKING POWDER

Something New in Frigidity. A curious war invention is a projectile which, on leaving the gun-muzzle, releases an enormous pair of shears that are guaranteed, with good aim, to cut a whole company of enemy troops in two.

**MONEY ORDERS**

It is safe to send a Dominion Express Money Order. Five dollars costs three cents.

In spraying potatoes the job may as well not be done at all unless the under side of the foliage and also stems are covered.

Minard's Liniment for sale everywhere. Cinerarias must be kept moist and cool with plenty of air.

**MISCELLANEOUS**

CANCER, TUMORS, LUMPS, ETC. Internal and external, cured without pain by our home treatment. Write us before too late. Dr. Bellman Medical Co., Limited, Collingwood, Ont.

## The Soul of a Piano is the Action. Insist on the "OTTO HIGEL" PIANO ACTION

## How I Suffered With Pimples

No One Knows, Says Miss Stodalka. Many Nights Could Not Sleep. Cuticura Healed.

"My face broke out all over with red pimples which would fester and then a large scale would form. Many nights I could not sleep because of the burning and itching. How I suffered no one knows. My mother requested me to try Cuticura Soap and Ointment and I did so. In less than a month I was completely healed." (Signed) Miss Rosabelle Stodalka, Richmond, Sask.

Why not make these fragrant emollients your every-day toilet preparations? For Free Sample Each by Mail address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

Minard's Liniment Relieves Neuralgia. Cheap Fish.

## MOTHERHOOD WOMAN'S JOY

### Suggestions to Childless Women.

Among the virtues of Lydia E. Pinkham's Vegetable Compound is the ability to correct sterility in the cases of many women. This fact is well established as evidenced by the following letter and hundreds of others we have published in these columns.

Poplar Bluff, Mo.—"I want other women to know what a blessing Lydia E. Pinkham's Vegetable Compound has been to me. We had always wanted a baby in our home but I was in poor health and not able to do my work. My mother and husband both urged me to try Lydia E. Pinkham's Vegetable Compound. I did so, my health improved and I am now the mother of a fine baby girl and do all my own house work."—Mrs. ALLIE B. TIMMONS, 216 Almond St., Poplar Bluff, Mo.

In many other homes, once childless, there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong.

Write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice—it will be confidential and helpful.
