## Necessary Farm Equipment

MORE and more the Ford car is looked upon by progressive farmers as necessary farm equipment, the same as the plow, the hay-rake, the drill, the mower, the harrow and other labor and time-saving machinery.

A farmer with a Ford car can dispense with one or two of his horses and make the trips to town, railway station, creamery, or to the neighbours in one-third the time. In fact there is no farm machine made that will save the busy farmer and his busy wife so much valuable time as a Ford. And it's so easy to take care of—far easier than a horse. No bed to make, or hay and oats to get, no harnessing and unharnessing, and no stables to clean. The Ford practically takes care of itself.

Ask any farmer who owns a Ford if he would ever again try to get along without it. His answer will hasten your decision to own one.

WHAT CATARRH IS

It has been said that every third person has catarrh in some form.

Science has shown that nasal catarrh often indicates a general weakness of the body, and local treatments in the form of snuffs and vapors do little, if any good.

To correct catarrh you should treat the cause by establishing your food with the medicinal food and a building tonic, free from any harmful drugs. Try it.

### Burglarized Newspaper Office

It was some surprise to us to learn of a printing office being burglarized, but Editor Seim of the Bradford Witness last week suffered this unenviable notoriety. The burglars made a night of it and entered three other stores the same morning. In his paper, "C. M." says: "If they were after money the fools didn't know enough to stay out of the Witness office. They came in a side window, helped themselves to about a dollar's worth of stamps searched every drawer in both desks for money and of course were sadly disappointed. They took two or three Toronto street car tickets from a little pocket folder, and are smoking two good cigars to the editor's health. But alas! our spick-and-span new Cleveland wheel was just the thing they wanted to take the place of their punctured affair across the street. The bicycle was a most up-to-date one, having a shock-absorbing frame and cushion handle bars, which cost us \$55. Our total loss \$56.35.

And we thought printing offices were immune from burglars!
