Dangerous Gas and Acids That Hurt The Stomach-Sour The Food Cause Dyspepsia, Indigestion

Many stomach sufferers who are always full of gas and whose stomachs burn with acid after nearly every meal think these things are the every meal think these things are the RESULT of indigestion when in reality they are the CAUSE.

It is just as foolish to give artificial digestents such as nepsin, etc., to a stomach full of gas and acid as instead get a few 5-grain tablets of to a stomach full of gas and told as it would be for a man who had stepped on a tack to run liniment on his foot without removing the tack.

Bome stomachs generate too much gas and soid. Gas distends the atomach walls, causing a full, bleated oppressive feeling while the add irritates and inflames the lining of the stomach. Naturally the food ferments and sourc, digestion is often delayed and stomach misery is the result. Artificial digestents will push this not injure the stomach in any way.
