The Canada Food Board Says: MAKING OF ICE CREAM Food Control Board Permits But 10 Per Cent. Fat. A Recipe That Has Proven Successful—Stake Vines and Trim Leaves to Grow High-Colored Tomatoes.

GREAT many inquiries have recently come to the Dairy Department of the Ontario Agricultural College regarding the new regulation from the Canada Food Board with reference to the manufacture of ice-cream, and also, as to methods of testing ice-cream for fat.

Order No. 34, section 8, issued by the Canada Food Board reads: "On and after May 1st, 1918, no person in Canada shall use in the manufacture of ice-cream more than 10 per centum of fats, whether of animal or of vegetable origin; or more than six pounds of cane sugar, or eight gallons of ice-cream."

As a result of recent investigations made in the Dairy Department of the O. A. College, by Messrs. McMillan, Pitkin, and Miss Miller, of the Dairy Staff, we can recommend the following formula or recipe, for a batch or mix which will produce about eight gallons of plain ice-cream of good quality and which will come within the regulations as laid down by the Food Board:

4 1/2 lbs. (4 1/2 gallons) cream testing 13% fat. 1 1/2 lbs. skim milk powder. 6 lbs. cane sugar—1 1/2 lbs. sugar can be replaced with 2 lbs. corn syrup. 4 ounces vanilla extract. 8 ounces gelatin dissolved in 6 lbs. (1/2 gallon) skim milk.

The women on the land at present number hundreds of thousands, without counting farmerettes. The farmers' wives and the farmers' daughters have been hard at work all year; their day is never ended.

There's a bleeding and a sobbing in my aching heart to-night; There's a longing to the Vastness of the Wild; I'm a-hungering so for comfort, and I'm groping for the Light Since I've paid the price of Freedom with a child!

He was brave, and strong, and eager, when he heard the Country's Lyre, And he volunteered to face his Homeland's foes; His eyes were all gleaming with strange patriotic fire, But he's gone!—and Life holds nought but woes!

But—thank God!—he was no coward, and he fought 'gainst Slavery's fetters, And he gave for us—Man's greatest gift,—his Life; Though his voice be ever silent, and I'll never more read his letters, I'm a proud, heart-broken mother in the strife.

Must I droop, and give up fighting, when my boy paid such a price, And must I feel unworthy of my Cross? Nay!—but by God's help make me WORTHY of my Son's great sacrifice, And through Christ-eyes see the Gain enthroned the Loss!

The Best of Mediums

You may talk about your posters and your ads upon the fence, But they ain't the kind of mediums that appeal to common sense; You may talk about your dodgers, and your circulars and such, But I calculate they don't assist an advertiser much;

Especially in winter, when the snow is on the ground, I wonder where your posters and your dodgers can be found? But within the cosy homestead when the parlor stove's aglow, The newspaper is read aloud to everyone we know.

The farmer sees the painted sign upon the barn and grins; Two dollars yearly for the space he usually wins, And there his interest in the ad begins, and there it ends, And the same is true of nearly all his neighbors and friends, But they read the local paper every day or every week, And in its welcome columns all their information seek.

And you may be quite certain that the ads therein displayed Are also read with interest and are sure to make some trade. It stands to reason, anyhow, that what a fellow buys, He's going to read and get his money's worth, if he is wise

The father, mother, uncle, aunt, the daughter and the son, Are going to read the newspaper, and so is every one, So it also stands to reason that a local merchant's ad Will there attract attention, be it either good or bad, And the newspaper as medium leads all other kinds with ease, For that is where the multitude of the advertisement sees.

TO GROW TOMATOES Most Successfully. If you are growing tomatoes to a single stem, be sure to remove all side shoots before they become of any size.

When the first fruits begin to ripen, apply nitrate of soda—a teaspoonful in a watering can, full of water,—to the plants twice a week to make a liquid manure and use it instead. These are more especially valuable when the growth has been stopped.

Keep a dust mulch around the plants. If the weather is very dry, soak the ground around them thoroughly in the evening, then make a new mulch in the morning. When the first fruits in staked tomatoes are beginning to color, remove one-half of each leaf. This will hasten the ripening. Sunlight is necessary for rapid ripening.

Leave only growth enough on your plants to carry what fruit will ripen before frost. There is no use in allowing more to set than will be of use to you and the fruits you leave will be larger. E. M. Leman, Ontario Vegetable Specialist.

Notices posted in the plant department of the Ford Motor Company of Canada at Ford, Ont., on Saturday, informed the employees that it had been decided to close the factory indefinitely. No reason for the shutdown was given. The announcement however, created no surprise in certain quarters, where for some time it has been an open secret that labor troubles, together with the increasing difficulties in procuring materials promptly, has made the matter of keeping a full force at work rather a difficult one.
