

Executors' Sale Continued

Though our business during the past three weeks has been the biggest in the history of the Red Front Hardware, and exceeded our most sanguine expectations, we have decided to continue our Big Bargain-Giving Festival.

One Week Longer, until Saturday, February 22nd

We have disosed of an enormous amount of Shelf and Heavy Hardware, but still find we have on our shelves, **Many Hundreds of Dollars' Worth of Hardware**, which we are going to dispose of at Bargain Prices.

DON'T MISS THIS OPPORTUNITY

Hardware at Less than Present Wholesale Prices

See List in last week's paper and act quickly. These prices cannot continue much longer, and we would advise you to lay in your supplies **NOW**. From present indications, Hardware is not going to come down in price, but as we are heavily overstocked, we have decided that our surplus stock must go, and our customers will reap the benefit.

THE PEOPLE'S MILLS

VICKERS

Mr W. A. Livingstone spent a few days at the beginning of the week in Toronto.

Mr Harry Reay and daughter Myra, visited with Mr and Mrs John Backus recently.

We are sorry to hear of the death of Mr Geo Cuff of Hutton Hill, who passed peacefully away on Sunday night. He was an old and highly respected resident. We extend our sincere sympathy to the bereaved family.

Miss Hazel Johnston is spending a few days with her aunt, Mrs A. Corbett of South Bentinck.

Mr and Mrs W. A. Livingstone and Miss Kirkton spent an evening last week with Mr and Mrs Herb Brigham of Allan Park.

The school is being closed this week but we expect Miss Thistlewaite of Flesherton next week.

Our teacher Miss Kirkton, previous to leaving was presented with a handsome club bag by her pupils.

NO. 9 GLENELG

No. 9 is pleased to welcome back Pte. Albert Davis, who enlisted from the West. He had been ill for some time but reports himself well again.

M. O. Green, Toronto, visited friends in the burg the beginning of last week.

The Red Cross held their meeting at Mrs Wm. Weir's on Friday, the 7th. A good crowd was present and considerable work was done. A plan is on foot, now that the Red Cross work is about an end to organize a Women's Missionary Society from the Red Cross Circle. The idea is a good one, and no doubt good work could be done along that line if the women would take the same interest in it as they did the other, and we know they will. We sincerely hope in this period of reconstruction, that the sewing circle will be reconstructed to a Mission Society, and not let the work drop but carry on, a still more noble work than before.

Old Durham Road is proud of her soldier boys. Within four miles there are three returned men, each of whom has won military distinction. Lieut. A. M. Bell was awarded the Military Medal; Sgt. John McKeown won the D. C. M.; and Sgt. J. Kennedy was given a Service Star.

Mr Hobson's address on "Birds" was most interesting and instructive.—Globe. This great naturalist will be in Town Hall on February 20; remember the date.

—An Allied Commission has been appointed to try to discover the true situation in Russia—at present a land of confusion and horrors. It is suspected lack of food is the chief cause. All Russian parties have been asked to lay their views before the Peace Conference, and a conference is to be held at the Prince's Islands in the sea of Marmora.

Ringworm.

Ringworm is a contagious disease to which all classes of animals, and man, are subject.

Calves and young cattle appear to be more susceptible to the trouble than other animals, but no age renders them an animal immune. It is purely a skin disease, and is due to the presence of a vegetable parasite, which is readily capable of being conveyed from one animal to another by direct contact, the hands of the attendant, pails, stable utensils, clothing, harness, saddles, blankets, the contact of one animal with the stalls, etc., of affected animals, etc. In like manner, curry-combs, brushes, rubbing cloths, etc., that are used on affected animals of any class, if used on other animals, become a fertile cause of infection.

Symptoms.—While any part of the animal may be the seat of the disease, the skin around the eyes and of the face, and on the neck and back, appears to be the favorite seat.

The first symptom shown is usually a slight firmness, which is followed by the appearance of little yellowish scales of a circular form, the mass scales forming a circular space, hence the term "ringworm." A variable number of these circular patches may be noticed on different parts of the body.

Treatment.—It is necessary that great care be taken to avoid the conveyance of the virus from the diseased to healthy animals. Where practicable, it is well to remove all non-infected animals to non-infected premises. The infected premises should be disinfectanted by thorough sweeping and dusting, and then giving a thorough coat of an insecticide, as a hot 10 per cent of one of the coal tar antiseptics or carbolic acid, or a coat of hot lime wash with 5 per cent carbolic acid.

Local treatment consists in moistening the scales with warm water and soap, or sweet oil, removing them in order to expose the unprotected surfaces of the affected areas. An insecticide, as a thersage of iodine should be applied once or twice daily until cured.—J. E. R., Ontario Agricultural College, Guelph.
