

Laurier Laid to Rest

That is his mortal remains are consigned to the grave, but his memory and his spirit can not be put out of sight while this generation is on the scene. No such funeral was ever seen in Canada; State men, Churchmen, the Professors, Judges, Captains of Industry, Farmers, the Common People, Children, all paid tribute to the dead statesman. The oration of Father Burke of Toronto, was worthy of the dead. The speeches in parliament by Sir Thos. White, the new Liberal leader for the Session D. D. MacKenzie, and above all that of Lemieux breathed affection, admiration and sorrow. In the speeches of all was the ring of genuine regret at the passing of this greatest Canadian of his time and admiration for the work he has done.

"SCOTTIE" PROVAN
The Canadian Harry Lauder, appearing at Willing Workers M.B. Concert, Town Hall, Durham, Thursday, March 13th.

NOTES		Clubbing Rates	
Parliament will grant to Lady Laurier while she lives the annual emoluments of her late husband.	A statute worthy of Laurier, will be one of the adornments of Parliament Hill before many years.	The Review and Toronto Daily Globe for 1 year.....	5 25
At a caucus of Liberal members at Ottawa D. D. MacKenzie, K. C., Cape Breton North, was appointed Liberal leader for this session with an advisory committee of liberal members, the chairman being Robt. M. P. the liberal whip. The permanent leader will be chosen by a National Convention to be held the coming summer or fall. A suggestion that Judge Riddell would be acceptable as permanent leader has been made. He is a splendid man but of course suggestions lead nowhere just now.	Hear Charles McCarthy, the clever boy Cornetist and Piper at the Town Hall, March 5th. BUY YOUR SEED RIGHT
Be Sure the Clover and Grass Seed is Pure.

Why Every Farmer Should Have Spray Calendar—How to Get It and Use It—Only Spraying Done at Right Time is Effective.

(Contributed by Ontario Department of Agriculture, Toronto.)
SUCCESS or failure depends to a large extent upon the quality of the seed sown. No man can afford to use low-grade clover or grass seed. The risk of seeding down the farm with noxious weed seeds is too great. High-grade clover and grass seed is free from weed seeds and produces more healthy, vigorous plants per pound than does low-grade seed. Impure seed is dear at any price. Pure seed is the purchaser's right and he should insist on having it.
In the purchase of clover and grass seed the following qualities should be looked for:
1. Freedom from weed seeds, especially those weed seeds covered by the Seed Control Act. The weed seeds can be properly seen only by spreading out the sample of clover or grass seed on a clean white sheet of paper and looking carefully over it with the aid of a tripod magnifier or hand lens. No farmer should be without a lens of some kind. Everyone who has to purchase seed should endeavor to become familiar with the common weed seeds and know the standards of purity required by the Seed Control Act for the various grades of clover and grass seed.
2. Freedom from dirt, grit, broken straw and other inert matter. A great many samples of clover and grass seed contain far too large a percentage of such inert matter. Those buying such seed are paying a high price per pound for dirt.
3. Good size and color. A good sample of seed of any kind should be large, plump, bright, and have the characteristic color well developed. Plumpness, brightness and good color are usually indicative of high germinative capacity.
4. High germinative capacity. Good clover or grass seed of any kind should have a high germinative capacity. This cannot be accurately judged by an examination of the seed and can be ascertained only by a germination test. Purchasers of seed can have such tests made for them by sending their seed to the office of the Seed Commissioner, Department of Agriculture, Ottawa.
Farmers are reminded that the Department of Botany of the Ontario Agricultural College is at their service at all times for the testing of seed as to purity. In submitting samples for purity test send at least one pound of the coarser grains, one ounce of alfalfa or red clover, and half an ounce of alsike or timothy. A full report on samples will be furnished. Samples of seed should be carefully packed and addressed with postage prepaid to the Botanical Department, Ontario Agricultural College, Guelph.—Prof. J. E. Howitt, O. A. College, Guelph.

Every Farmer Should Have Spray Calendar.

Before giving the reasons why every farmer should have a spray calendar let us state what a spray calendar is. It is the gathering together into a small space—usually just one sheet or page—of all the necessary knowledge for the control of the various insects and diseases that attack our fruit trees and bush fruits; so that instead of having to search half a dozen bulletins the farmer can obtain the required information almost at a glance. A spray calendar is therefore a handy reference sheet on the control of insect pests and plant diseases.
Every farmer should have a spray calendar for the following reasons:—
1. Because it will save him time in finding the necessary information on the control of insects and plant diseases.
2. Because the information given in the spray calendar is more reliable than can be obtained from his neighbors or any other source. It is the best information that can be obtained anywhere.
3. Because the spray calendar will prevent costly mistakes due to slips of memory.
4. Because the spray calendar states definitely when to treat the different pests. A week too early or a week too late would in the case of some of our worst insects and diseases mean utter failure. There is a good reason for each date of treatment given in the calendar. It is not guesswork.
5. Because the spray calendar states definitely the mixture or mixtures to use in each case and gives the proper strength. Too strong a mixture would mean loss of money and sometimes burning of the foliage or fruit; too weak a mixture failure to control the pest.
6. Because several spray mixtures, e.g., Bordeaux mixture, can be made at home. The spray calendar tells how to make these.
7. Because by following the directions given in the spray calendar, almost perfectly clean fruit and much more of it can be obtained.
Always ask for the latest spray calendar, since they are revised from time to time, and new and better methods added in place of the old as soon as they have been sufficiently tested.
How can spray calendars be obtained? Send a postcard to the Department of Agriculture, with a request for one. Write your name and address clearly.—L. Osceer, B.S.A., O. A. College, Guelph.

THE RED FRONT HARDWARE

This week we are offering Exceptional Values in
McClary's Steel Ranges

The main question to be considered in the selection of a Range is "How long will it last; what satisfaction will I derive from it; what is the fuel consumption and the general up-keep?" In placing before you the reliable Ranges of the McClary Company, we do so with the knowledge of what they have done in the past, the satisfaction they have given, and the Company's long experience in their manufacture. They are "Standard" Ranges, made by one of the best stove manufacturing companies in America, and are known from coast to coast.

The "PANDORA" for Coal, Coke or Wood

"Pandora" in Canada is a household name. It stands for the best. The "Pandora" is equipped with large quick baking oven; the flues are scientifically constructed in order that the fire box, flues and opening into the smoke pipe will work together to give the best cooking results, with the minimum amount of fuel. The triple barred grates of the "Pandora" are so constructed that each bar may be shaken separately, the bars are three faced so that all may alternately be turned to the fire and are of exceptional durability. The fire box linings are made of the famous semi steel and are practically indestructible. These and many other exclusive features make the "Pandora" an ideal Range for home use.
This range is furnished with a high warming closet and shelf, a reservoir of best pressed sheet steel with best quality enamel and with thermometer in oven door.
Our Price this Week... \$89.00

The "KOOTENAY" for Coal, Coke or Wood

The "Kootenay" is a high grade steel Range, moderate in price and economical on fuel. It has a burnished top, is easily cleaned, will not crack, warp or bulge. The oven is made of the best materials and is spacious, square and deep. The linings of the fire-box are made of semi-steel and are practically indestructible. This

Range is equipped with duplex grates, a high warming closet and shelf with enameled back, reservoir and oven thermometer. The reservoir on the "Kootenay" is patented and can be easily attached or detached.
This Week our price for this Range is..... 83.00

The "GARRY"

The "Garry" is a high grade steel range at a popular price. It has nickel trimmings so easy to clean and which give the range a most attractive appearance. A large quick baking oven, a spring poised oven door which falls into a horizontal position for drawing out hot pans and dishes, is most convenient. The famous duplex grates are supplied with this range and the fire box is large and roomy and scientifically proportioned. With this stove are also a high enameled back warming closet and shelf, reservoir and oven thermometer.
This Week our Price is... 73.00

We have on hand Two Second-hand Ranges for quick sale.

Ask to see our **Oak Heaters**. We have them in three sizes

One only **Oil Stove**; [3-burner Clark Jewel] for..... 17.00
2 only "Hot Blast" Heaters, ea. 2.75

For all kinds of Hardware, call on us. We have it, can get it, or it isn't made
