> Leading Varieties of Spring Grain. Quite a number from the Valley The old Six-rowed barley gave way to the Mandscheuri, and that in turn took in the Rally at Dromore Friday has given place to the O.A.C. No. 21. which is now grown throughout On-One day last week while cutting tario to the exclusion of practically wood at Mr John Scott's, the Messrs all other varieties. The Egyptian and Wm. Wells and Thos. Moore were the Black Tartarian varieties of oats which were popular at one time have We are sorry to report that Mr and more recently by the O.A.C. No. The O.A.C. No. 72 variety has a comparatively strong vigorous straw. spreading head, and white grain of good quality, the hull being quite thin. In experiments at the Ontario Agricultural College it has surpassed the Banner in yield per acre in each Lord thy God in vain, for the Lord of nine out of ten years. It has made Will not hold him guiltless that taketh a phenomenal record in connection with the Ontario Standing Field Crop Exodus Ch. 20, 7th verse. | Competitions, taking more first prizes than all other varieties of oats combined. The O.A.C. No. 3 variety is ten days earlier than the Banner or the O.A.C. No. 72, and is an excellent variety for mixing with barley when it is desirable to grow the two in combination. Of the spring wheats the Red Fife, the Marquis and the Wild Goose are the principal varieties. At the present time, however, when the demand for wheat for bread production is so urgent the Marquis Do they forget that for every idle word and the Red Fife, and especially the They must give account in that day former, should be grown as extensively as possible in Ontario. Spring rye does not yield equal to Winter rye but its cultivation will perhaps be increased somewhat during the But sometimes the guilty are punish- present year. The O.A.C. No. 61 variety has given the best results. Though their fiaal doom shall be surpassing all other kinds in yield of grain per acre.-Dr. C. A. Zavitz, O. A. College, Guelph.

Prepare for Spring Spraying. Efficient and economic spraying is hard to attain with the use of poor machinery. The power sprayer is an expensive piece of machinery, but it is effective when properly handled. Its usefulness can be greatly impaired by improper care. To soure the Mrs Frank Walls and baby have highest degree of efficiency in spraygone to visit her parents near Toronto. | ing the maintenance of high pressure Miss Reta Sharp is a pupil at the is necessary. Probably high pressure is not needed in all cases; it is, however, true that by means of it more thorough and, consequently, more ef-Mr Elsmore Rawn has taken pos- fective work can be done

session of the farm lataly vacated by shorter time and with much Mr Durant, We wish him prosperity, effort. The agitation of the liquid in the tank is another important matter. In the case of most sprays, the individshowed the monument to Edith Ca- secticide are suspended in the water. Unless the sprayer is equipped with a good agitator, these particles will settle to the bottom, rendering the mixture in the top of the tank weaker than it should be, and that in the bottom stronger, and possibly in

some cases too strong for safe appli-Tenders will be received by the under. It is needless to say that the care signed up to Saturday, March 29th, 1919, of spraying machinery should never for the building of St. Peter's Church, be neglected. Indeed, the spraying Durham either for the work in part, or outfit should never be put away after using until the mixture is thorsles by running clear water through them. The water should be drained from the engine, and all parts cleaned and oiled.—Prof. Jno. Evans, O. A. College, Guelph.
