The wise both back of the French, British and A good and inexpensive floor stain and will not bother a cedar chest. through warm weather. On the other man is he who strives to be all three Belgian trenches and back of the Gerall of the destroyed places in Belgium Vise, Chappelle, Louvain and others not so widely known, but I do not re member seeing any place except on the fighting front so completely des troyed as Termonde. It does not look like Ypres or places which have been fought over for years. It belongs to that class of places deliberately des troyed all at once.

Industries Laid Waste.

"Before the war Termonde was an Eastern Flanders town of 10,000 per sons. Half of them were engaged in industry, making blankets, ropes, cables and things of that kind. There was a well-to-do middle class, many persons worth \$6,000 or \$8,000, and a half a dozen who were worth \$100,000 which was rich in a country very cheap in which to live. The working class was unusually intelligent. There was never a strike. Skilled labor got from \$1 to \$1.20, unskilled sixty cents a day. The town was the centre of a rich farming district.

"The Germans burned Termonde September 4, 1914. The responsibility was on General von Boehm. The Bel gians say it was done to terrorize Ghent and Antwerp. It was a very horrible affair, but only three or four persons were put to death. Mr. Vermersch said one man who had his eyes put out was his clerk. Of 1,400 houses in the town 1,200 were burned Strips of linen soaked in naphtha were placed in holes cut in the ceilings and floors to act as wicks for the flames Only one factory was spared, the Es caut-Dendres shoe factory, from which the Germans sent all the shoes and leather into Germany.

"The Bequinage, a kind of lay religious order of sisters, each one occupying her little house, all opening on a beautiful common, was spared but not the church. The Grand Place stands in ruins, still beautiful and dignified. The town hall tower is standing and the walls of many of the buildings, but the inside of the buildings are entirely burned out. It is true of the linen market and of the great solid Porte de Grand.

7,000 Living in Ruins.

"About 7,000 persons are living in these ruins. It is a city full of home less and unemployed. One house I visit ed was made by roofing over one of the rooms in a ruined building. Until last week it was occupied by eight persons. Then another family of eight came back from France and all were taken in, so that now sixteen persons live there, sleeping on chairs and the floor. I went back to my automobile and brought them robes. It was just a mite, but I felt a little better for it.

"We took prompt action for Termonde while I was there. At a meeting of the Burgomaster, the Municipal Council and two deputies, they asked for \$10,000 to buy wood available in Antwerp, to bring it to Termonde in two or three barges on the Scheldt and build fifty two-room houses in a month with their unemployed laborers. told them the American Red Cross would give immediately \$10,000 as an expression of the sympathy of the American people for Termonde, simply to start the thing going. "'We realize,' I said, 'that this is

hardly a drop in the bucket compared with your need. Moreover, it is not our job. The government intends to do the work of reconstruction. We go into the thing just enough to shelter people in this transition period. The money will be available to you immediately through Fonds du Roi Albert. You will not have to wait. You have made a definite concrete project which means giving work to these men, and shelter to some of these homeless families, and the American Red Cross is with you in it."

Great Britain will send twelve warships to tour South American waters. The fleet will leave Europe as soon as the peace treaty is signed.
