# WILHELM'S JOKE.

Typical of Ex-Kaiser's "Humor" and of His Courtiers' Servility.

Writing in the German review, Weltbuechne, Johannes Fischart reveals some interesting facts regarding the sycophantic courtiers who formed the circle of William II.'s favorites.

While watching the yacht races at the Kiel Regatta in 1901 the Kaiser had to sign some State papers.

To an admiral standing near the Kaiser remarked: "Tirpitz is a bore with his documents. I should prefer a glass of champagne." "At your service, Majesty," replied the admiral, who rushed headlong to get a glass of champagne, which he handed to his monarch with a low bow.

Wilhelm drank half the glass, then went out on the bridge, beneath which were Gen. von Hahnke and the officers of his brilliant suite.

"Hahnke," shouted the Emperor, "you would like some champagne, toe," and as the general turned his face upwards to reply, Wilhelm poured the remainder of his glass over

"Your Majesty is too gracious," was General Hahnke's manly retort to this insult, while the rest of the suite roared with laughter.

Wilhelm returned in boisterously good humor to the deck cabin and demanded something to eat. The attentive admiral rushed to fetch some caviar sandwiches.

Wilhelm removed the butter and the caviar from one, and, emerging once more on the bridge, shouted: "Hahnke, you would like some caviar sandwiches, I am sure."

As General Hahnke looked up to murmur his thanks Wilhelm threw the remnant of bread in his face. Again General Hahnke, with a courtly bow, replied-"Your Majesty is too gracious."

This was a typical scene, says Fis- AUTOSTROP SAFETY RAZOR CO., Limited

## THE VALUE OF DIAMONDS.

Gems Are Occasionally Discovered of a Yellow or Deep Orange color.

The 388-carat diamond which has recently been found in the Jagerstontein Mine in South Africa promises to be worth an enormous sum of money. The reason is that its color is the rare and beautiful blue-white.

The Hope Diamond, most famous of SOLAR MOTOR INVENTED BY blue stones, weighs, only 45 carats, yet has changed hands at \$300,000. Of all the South African mines the Jagersfontein is the only one that yields the blue-white stones. Before diamonds were found in South Africa it was only in India that these blue stones were found.

South African diamonds are apt to be yellowish or "off color," and these stones are far less valuable than pure white diamonds. Canary yellow stones are often found, and some that are quite brown. Kimberley yields good white stones;

those found at Dutoitspan are usually vellowish, while the Bultfontein is known for its curious spotted gems. The Premier or Wesselton Mine gives large and very beautiful cry-

stals of a deep orange color. These are so flawless that in spite of their color they often fetch large prices. Borneo yields the most remarkable range of colored diamonds found anywhere in the world. From thence come not only yellow stones, but rose red. bluish, smoky and pure black stones.

The Borneo diamonds, like the Aus-

tralian, are extremely hard. There is no example known of a large red diamond. Red is, indeed, of steam, gasoline and water. the rarest color of all, and proportioncannot be made into ornaments they up, concentrated energy of sunbeams. and perpetual servant of man. can be used for edging boring tools.

## The Business Instinct.

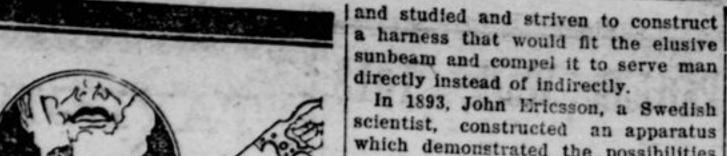

drive her.

Long a Puzzle to Scientists.

Americans are generally supposed to "lick creation" in the readiness with which they turn the affairs of the moment to business account, but they have no monopoly of that characteristic. Here is an advertisement from the agony column of the London Times, which shows that at least one Frenchman has a keen eye for possibilities of money-making which the war has left in its train:-

"Ypres.-The Belgian Government having decided to preserve the ruins of Ypres intact, I wish to dispose of land situated near the town, on Ypres-Hooge Road, suitable for hotel.-For full information write to Julien Domicent. &c."

Giant Russian sunflowers at the College of Agriculture, Saskatoon, prodired two and one-half times as much fodder to the acre as corn, and was in every way as satisfactory as corn for making silage. Professor Bracken is recommending the Ruslian sunflower for planting in the drier areas of Western Canada. The lant is well stokes, of in Montane

## Cleopatra's Needle.

As is now officially stated, Cleopatra's Needle is the only public monument in London which was struck by a German bomb. Numberless people, to whom this is news, are now visit ing Victoria Embankment to survey the extent of the damage. It is very slight indeed. The plinth, and the steps and the supporting sphinxes have suffered, but the obelisk itself is merely scratched, and stands as erect as it ever did at Alexandria in the days when Augustus Caesar reigned.
