Hurriedly snatching up my gun and cartridge belt, I made for the spot, accompanied by the boy, and had gone some distance when I became aware that a small dog, named Dally, a pretty Swedish terrier, was following me Dally belonged to a fellow overseer. by whom he was much prized, and in deed he was a great pet with the whole household. I did not wish him to go with me on this occasion, how ever, for I feared that he would scare Women have been permitted to the birds. I tried to drive him back

> At that moment Dally jumped into the water and swam topard the disabled duck. The brave little dog had reached it and was returning with it when Barclay suddenly out "Look, baas! A 'gator! Going for

> Sure enough, about fifty feet away was an alligator swimming rapidly toward the dog. "Quick, Barclay!" I said, "Jump in

and frighten the brute away!' But Barclay objected, "No, bass, I 'fraid!" he said resolutely. There was no time to be lost in ar gument. The reptile was approaching the game little dog, which, burdened by the flapping duck, nearly as large as himself, was making slow progress

Dropping my gun, I jumped into the water and, half wading, half swimming, soon reached the dog, and then placing him, duck and all, under my arm, I started to return to the shore. The only point on the bank at which I could land for some distance round the lagoon was immediately behind the evil-looking brute; so I splashed the water and shouted at him, but

without effect. There he continued to

keep watch and ward, and it dawned

upon me that he intended to make a dash for the dog if I ventured to approach him. Poor Dally by now perceived his enemy, and was evidently terrified. for he set up a piteous howl, I am bound to admit that I was beginning to feel somewhat apprehensive myself, for I had never known an alligator to act with such boldness before. and my uneasiness increased when the

boy on the bank shouted: "Take care, master; whole lot

'gators dere behind!" I glanced round and saw at least four or five of the uncanny reptiles swimming in my direction, doubtless attracted by the howling of the dog For the first time I was thoroughly scared, and am ashamed to say that for a moment I entertained the thought of flinging Dally to the brutes and securing my own safety.

I was at a loss to know how to act circumstances. But Barclay, who had been gazing open-mouthed and inactive at the scene, suddenly pulled himself together and, seizing my gun and ramming in two cartridges, let drive both barrels at the eye of the sentinel alligator. The result was instantaneous. With a loud hiss and a great swirl, the brute sank out of sight, leaving a gradually widening stain of blood on the surface of the water.

Making a slight detour so as not to come in contact with the body, I dashed for the bank and, to my enexpressible relief, scrambled out to safety.
