CHANGE CLIMATE OF EASTERN CANADA

PROJECT TO DAM THE STRAITS OF BELLE ISLE.

Thereby Close Off the Arctic Current From Gulf of St. Laurence and Heat Maritime Provinces.

Modern ingenuity has discovered a most efficient mode of heating houses in winter that of hot water. Furnace and caldron are sometimes, in the case of hospitals or other large buildings, pipes conduct heated water into the radiators and back again when cooled heated water flows from the top. I is now proposed to apply the warm waters of the Gulf Stream to the east-States, that such regions might enjoy a more even temperature throughout the year and permit a more luxurious egetation

There are many advantages in using the low-down wagon on the farm -so many, in fact, that it is a wonder that its use is not universal Many have a prejudice against the use of this type of wagon because of the opinion that it has a heavier

There are so many uses to which the low-down wide-tire wagon may be put, that every farmer should have one. As a labor-saver there is nothing to compare with it; 'tis absolute economy to possess one. In the loading and hauling of fruits, vegetables, hay, heavy farm machinery, stock-in fact, anything portable you may wish to haul-the low-wheeled wagon saves you much of that energy it is so necessary to conserve in these days of scarcity of labor. Lifting things to a level with your body is not what overtaxes you; it is raising them above that-the last two or three inches of the lift-that taxes the strength. The low-wheeled wagon eliminates this. And the wide tires make easier passage over soft fields, and do not cut up meadows

In the loading of hay, corn fodder, grain, etc., one scarcely realizes, who has not used a low-down wagon, how many and important are its ad vantages. The wagon we have seems to run with no heavier draft than the high-wheeled wagons drawn at the side of it with the same kind of load Neighbors have commented on this, and often remark: "Your wagon runs
