Peace River Petroleum Limited

(NO PERSONAL LIABILITY)

General Offices: Sterling Trust Building, Toronto, Canada
Capital Authorized, \$5,000,000.
Divided into 5,000,000 Shares of par value, \$1.00 each.

OFFICERS AND DIRECTORS:

- President: JOHN HALLAM of Denton, Mitchell & Duncan, Wholesale Dry Goods, Toronto
- ADAM ANDERSON Importers & Manufacturers' Agent, Toronto
- BYRON GEORGE COHEN Wilson & Cohen Importers and Manufacturers Toronto
- SIDNEY C. BRASIER of Wagner, Brasier & Co., Wholesale Fur Merchants, Toronto
- THOMAS A. CAIN General Manager, Reo Sales, Ltd. Toronto
- ALLAN McPHERSON President Quincy Adams Lumber Co., Ltd., Longford Mills, Ontario

SOLICITORS—Starr, Spence, Cooper & Fraser, 120 Bay Street, Toronto, Canada: Carmack & Mackie, Edmonton, Alberta.

BANKERS—Canadian Bank of Commerce, Head Office, Toronto, Canada — Branches throughout Canada.

TRANSFER AGENTS—The Trusts & Guarantee Co., Ltd., Bay Street, Toronto, Canada.

FINANCIAL AGENTS—W. C. Goffatt & Co., 10-12 King Street East, Toronto.

The Charter of Incorporation gives this Company power to control oil lands and operate oil wells—build pipe lines—erect and operate refineries—own and operate tank cars, railways and steamboats—to produce natural gas—operate and supply municipalities with light, heat and power, also to manufacture gasoline from natural gas.

(Gasoline manufactured from the wet gas that comes from the wells at Peace River should become an enormous revenue-producing asset to Peace River Petroleum, Limited).

The Company also has power to operate and develop coal, iron and other valuable mineral deposits.

The Company controls over 45,000 acres of what are considered to be the choicest and richest oil lands in the Peace River district. The companies whose lands have been taken over and the amount of land they controlled are as follows:

The Consolidated Oil-fields of Peace River, Ltd.	13,000 acres
The Smoky River Oil Company, Ltd.	10,000 "
The Peace River Syndicate	25,000 "

These lands have been paid for in the capital stock of Peace River Petroleum Limited. One share of stock in the new company has been paid for each share or its equivalent in the former organizations, no cash whatever being paid.

The purpose of the present offering is to raise the funds necessary for development of the company's immense holdings. It is estimated that the proceeds of this issue will be sufficient to carry on development work for over two years.

The names of the directors, listed above, are alone a guarantee that development work will be aggressively carried on and that the funds will be wisely spent.

An Opportunity for the Small Investor

FORTUNES IN OIL

The fabulous wealth returned from small investments in other oil fields reads like a fairy tale.

\$100 invested in Pinal Oil Co. paid	\$ 10,000.00
100 " " Lucile Oil Co. paid	16,000.00
100 " " Home Oil Co. paid	40,000.00
100 " " Paraffin Oil Co. (in 10 years) paid	492,000.00
175 " " Colline Oil Co. paid	80,000.00

while each \$100 invested in the Fortuna Oil Co., Texas, returned a quarter of a million (\$250,000.00).

To the Canadian Public

During the four years I spent in the Peace River country I watched the oil development in all its stages. Eight wells have already been drilled in and near Peace River Town. Every well has brought in oil—not one well has been drilled dry.

Pay oil has been discovered in at least five of the wells drilled, a record seldom attained in any new oil field on this continent. That oil would be discovered in Peace River was predicted by George Dawson, Canada's most eminent geologist, over thirty years ago. During the past five years a score of the world's best known geologists and oil experts have visited Peace River, and in every instance these men of science endorsed the prophecy of Sir George Dawson of long ago.

A valuable by-product of the oil fields of Peace River is wet gas, from which, by simple process, gasoline is extracted. From three to five million feet of wet gas beaches from the wells already drilled into the gas stratum.

Every man who has visited the wells at Peace River knows that oil is there, because he has seen it; but the wealth of the earth, be it gold, silver or oil, is of no value unless money is efficiently spent for its development.

I believed the geologists and oil experts of this continent when they said that by drilling deeper into the oil sands at Peace River the BIG OIL POOL would be discovered.

Because of this belief and my personal knowledge of the actual discovery of oil in the wells drilled at Peace River I feel I am acting in the best interests of Canada when I recommend the Canadian people to join with Peace River Petroleum, Limited, and help to secure the big production of oil for our industries.

Some Things to Know About Cancer.

First: Cancer is usually painless in its first stages, and for this reason it is especially insidious and dangerous.

2. Cancer appears first as a small local growth which can be safely and easily removed by competent surgical or other means.

3. Cancer is neither constitutional nor a blood disease.

4. Cancer is not contagious.

5. Cancer is, practically speaking, not hereditary.

6. Should a lump appear in the breast it should be examined at once by a competent physician.

7. Persistent abnormal discharge or bleeding is suspicious. The cause of it should be sought.

8. Sores, cracks, lacerations, lumps and ulcers which do not heal, and warts, moles, or birthmarks which change in size, color, or appearance,

may turn into cancer unless treated and cured.

9. Probably sixty per cent. of the cases of cancer of the rectum are at first regarded as piles. In obstinate cases of piles, insist upon a thorough medical examination.

10. Continued irritation in some form is the usual cause of cancer. It rarely results from a sudden injury.

11. A doctor who treats a suspicious symptom without making a thorough

examination is not well grounded in his profession.

When buying stair carpet or oil-cloth for the stairs always buy about two feet more than is actually necessary. Then from time to time you can move the carpet up and down to equalize the wear. The length that is over can be turned in at the top and bottom of the stairs. The carpet will last much longer.

INTERNATIONAL LESSON JANUARY 4.

Peter Preaches at Pentecost—Acts 2: 14, 22-24, 32-42. Golden Text, Acts 2: 21.

1-13. The Coming of the Spirit. "Pentecost" was the fiftieth day, reckoned from the second day of the Passover feast. It came at the completion of seven weeks from the Passover Sabbath, and so about the end of harvest time in Palestine. The Jewish feast of Pentecost was called the "Feast of Weeks" (Lev. 23: 15-16, Num. 28: 26). Then the first fruits of the harvest were offered to God, and so the early Christians saw in this Pentecost baptism with the resultant conversion of many souls the first fruits of the Gospel harvest which was ultimately to bring both Jews and Gentiles into the Kingdom of God.

"All together." The reference is to the one hundred and twenty disciples mentioned in 1: 15. The time of meeting was the early morning. Peter began his sermon at "the third hour of the day," that is about nine o'clock. "A mighty wind." It was not wind and it was not fire, but what happened is compared to "the rushing of a mighty wind," and to "fire." It was a profound spiritual experience, a reality, therefore, of the highest order, and the effect upon the company of disciples was such that they could only describe it as wind and fire. It was a tempest of emotion, exalting them with such joy and confidence of faith that they broke out into exclamations of praise and prayer. Above all was the consciousness of power, born of the conviction that Jesus their Master and Lord was with them in living reality, a spiritual presence, in fulfillment of His own promise.

"Dwelling at Jerusalem Jews." Jews, at that time, were widely scattered throughout the world, but were accustomed to come up to Jerusalem from time to time either for purposes of business or to attend the annual festivals. They were nearly all acquainted with the Aramaic language, so that it was not really necessary to speak to them in different languages. Peter's sermon was no doubt delivered in Aramaic.

14-36. Peter's Sermon. "Peter . . . lifted up his voice." Peter who had recently denied his Master with oaths is now foremost to confess Him. Some mighty convincing power must have wrought this transformation. So it was with the other disciples. There are now no doubters among them. All believe that Jesus lives and that He is with them, and are filled with courage and with boldness to speak for Him.

Peter begins by declaring that this is the experience spoken of and predicted by the prophet Joel (2: 28-31). It is the pouring forth of the Spirit of God. Compare also Eze. 36: 27. The effect of this coming of the Spirit upon men is that "they shall prophesy" (v. 18), that is, that they shall speak with inspired utterance of the things of God, and that is no doubt what all the disciples upon whom had come the gift of tongues were doing.

Peter proceeds to declare (vs. 22-36) that Jesus, who had done such mighty works among them and whom they had crucified, was risen from the dead, was exalted to "the right hand of God," and was assuredly the Saviour long foretold by Israel's prophets and long and fervently expected, the Messiah, "both Lord and Christ." He quotes the sixteenth Psalm in which is expressed the hope of deliverance from the grave and declares it fulfilled in the resurrection of Jesus.

Of that resurrection he says, "We all are witnesses." It is by the evidence of such witnesses that the facts of history are established. Moreover, he declares, it is the Christ exalted to heaven who has "poured forth this, which ye see and hear." Again he quotes Psalm 110, in which there is a prediction of the victories of the coming Messianic king and in which He is represented as holding a unique relationship to God.

37-47. The Result. "About three thousand souls." No doubt we have only a brief summary of Peter's speech, but it may not have been a very long one. Its simplicity, directness, and power made persuasive appeal to those who listened. They were Jews educated in the Old Testament teaching, who knew the meaning of sin and the need of a Saviour, in whose hearts, too, the national hope burned high. They listened, believed and enrolled themselves as disciples of the new faith.

Every farmer should keep some sort of account system of his business. It should show the profit and loss of all of his operations.

When marking linen with ink, first make the initials with a lead pencil and then trace the ink over the pencil marks. This will prevent the ink from spreading.

"If you see a tall fellow ahead of a crowd, A leader of men marching fearless and proud, And you know of a tale whose mere telling aloud Would mean that his head must in anguish be bowed, It's a pretty good plan to forget it."

Buying Your Nursery Stock.

For a farmer who wants three trees of the Northern Spy apple and knows just what he wants, to find after buying and caring for the trees, that they are St. Lawrence, is the thing that we want to avoid if possible. It may not be possible to avoid entirely such results, but since nearly all of the mistakes are due to carelessness the desired end may be quite closely approached.

One should know his nurseryman. That is the secret of true-to-name stuff, I believe. At home we bought a good bit of stock every spring for our own use and considerable for our neighbors. We have bought of three different nurserymen. The first one seemed right until a visit to the nursery showed a very careless system of handling the stock when shipping. I think that two neighbors found that they got trees that were not true to name. We quit that firm at once. The other one was too far away, though the stock was good and was grown as far north as our own latitude. This is worth while considering, too. Now for a good many years we have dealt with a nursery in our own district and when possible we drive to the nursery and get the stock the same day that we are ready for it. The drying out of the roots on a small tree is something that tends to cause losses of the trees after planting. Every care should be used to keep the roots damp all the time that the tree is out of the ground. This nursery uses every precaution to see that the trees are true to name. One can't always get just the variety he wants but that is another reason to think that what we do get is right. I know of a firm where you can always get just the variety of any fruit you want. If they don't have it the label is changed to suit your wants. If you have a kick after the trees bear, you probably got home! Very plausible but it don't give one the tree that you have waited for so long. If there is a fruit man in your neighborhood get him to order for you. The trees will cost you as much if you buy direct because nurserymen get a better price than a regular buyer, since they buy more goods. More than that, the fruit man knows varieties and if a certain kind is not in stock he can replace with something that has the same characteristics as the one wanted, and so generally satisfy you.

The regular agent who sells trees is not usually acquainted with the business only from a selling point. He can mix varieties though probably unknowingly and get your order mixed as easily as any other green buyer. More than that, the profits that he takes are out of reason and we can't afford to give money away for fun to anybody. Order direct from the nursery that sells direct from a catalogue, or from a neighbor who makes it his business to know the line he handles. Either way beats the agency proposition. It also saves a good bit of money.

Filkaelle is the best silk for darn- ing silk stockings.

Resting and Rusting.

"I'll do anything once," is a more or less familiar expression, supposed to indicate a venturesome state of mind. It is not with any conscious recklessness that I bought an old carpenter's bench and chest of tools at a public sale and converted one corner of the barn into a kind of shop. When I explain that I was notoriously unskillful or at least unpracticed in the use of small tools, and had always to be coaxed into making the repairs about my premises, you will see that the workshop was quite an innovation. Playing any kind of a game is a form of work, only we never think of it in that way. The game makes demands upon our energies in some form, just as though it was something for which we were receiving pay. A business man after a day of hard mental strain will find refreshment in playing golf, and a group of mill-men, following severe physical toil, will get pleasure out of playing ball on the commons.

It had been my custom to do my hands' work on the farm, and I was getting pretty tired man. I would have dozed for an hour or more over a newspaper and then seek an early bed. After I had acquired my shop I started in to do a little tinkering. The after-supper period was the time I chose for it. No one could have been more surprised than myself when I began to enjoy the thing.

The first piece of work I turned out was a portable chicken-coop. Its architectural lines were not very true and the workmanship was crude, but it held chickens. I was very proud of that coop. Although I did not have in me the making of much of a mechanic, I developed a certain rough skill in the use of the tools, which held my interest. The little wagon I made for the youngest member of the family was certainly a success, judged from the pleasure it gave him, despite the fact that the hind wheels were wobbly. I tried my hand at a variety of articles of a utilitarian or supposed ornamental nature, and while I could not point with pride to all of them, I struck a fair average of amateur achievement.

But this was all secondary to the entertainment I got out of it. It satisfied an instinct to create, and took my mind for the time being off the small vexations of my regular occupation. Any kind of an inorganic hobby is a good tonic. Mine brightened me up. I could read my paper with greater satisfaction, and I became more companionable to my family. No attempt was made to reduce my shopwork to any routine. One of the fine features of it was that I could go in and pound and saw to my heart's delight, or I could leave the shop alone, just as I happened to feel about the matter. There were very few days though, that I failed to take a little of this form of rest.

I can imagine nothing more interesting than farm work, but if you don't have some diversion always at hand to get you out of the routine your mind runs along in the same old rut. You get stale and your brain becomes cobwebby. You are happier and more capable through having a little play-spell every now and then. I would not recommend a shop to everyone. What is good for me might not be best for the other fellow, though I believe there is something universally human in the use of tools. The nub of my argument is that a hobby, or a secondary interest of some kind, is an element of physical and mental health. If you do not have some ready means for taking your mind off your work, you keep thinking about the work, subconsciously or otherwise, with the result that instead of resting you are often just rusting.

Make Mother's Work Easy.

Women have some big problems to solve. A little arithmetic, for example, has shown that one woman took 256,000 needless steps every year, all because of the inconvenient arrangement of her kitchen appliances. Probably the rest of her house was as poorly arranged as her kitchen, giving her at least an additional 256,000 needless steps. This meant 512,000 steps, or approximately two hundred miles, tramped off annually in the daily round. Perhaps this was an exceptional case, but proper arrangement is one of the big problems to be solved in each individual home.

At this season of the year changes in the interior arrangement of the house may be easily planned and carried out. The time and energy saved to the housewife will mean increased efficiency and improved health.

Buy Thrift Stamps.

Left-over cereals can be used in griddle cakes. Excellent croquettes are made of cold boiled fish.

Kerosene on your dust cloth improves the furniture. Cocoa is the better for a tiny bit of broken vanilla bean in the pot.

An extremely durable cloth, recently placed on the market by an English manufacturer as suitable for men's clothing, is made from short silk fibres, heretofore considered almost worthless. According to the producer, the new fabric can be sold for one-fourth the price of the best wool goods. It is made in several colors.
