SWINTON PARK

The young people of the burg gathered at the home of Mr and Mrs Herb Harrison on Friday and spent a pleasant social evening to welcome them as new neighbors. The evening was spent in dancing, selections on the violin and piano. The music was supplied by Messrs J. Ferguson and T. N. McDougall who are in no way selfish when they sit in a corner and entertain for the entire night.

Mr. S. McMurdo and Mr Myers are engaged with Hardy Bros. putting up a wire fence.

Mr. Alex Ferguson of the 14th con. is seriously ill at present.

Messrs H. and O. Milliner spent Sunday at Mr L. Irwin's.

Mr. Wm McCormick has moved to the D. J. McCormick estate which he purchased.

Mr. J. Hay was in the city this week and purchased a driver.

Miss Ruth Stewart spent the week end at Mr A. McCannell's.

Mr Howard Watson has secured the agency for the Victrola. He has several styles here and tunes up his customers while waiting on them.

Died, at her home in Proton, on Sunday, Miss Jene Dow. Interment to Ventry cemetery.

Mr and Mrs R. Knox and Miss Stella McMillan spent at Sunday at Mr. G. Black's.

Miss Aggie Wilson of Toronto is home at present.

A Pertinent Question

"Can you give me any reason?" asks a gentleman writing to Toronto Globe a few days ago "why sugar (granulated) should be 17 cents per pound in Port Haron now and was advertised as low as \$16.50 per cwt. on Saturday last and in Bama it was \$19.75 to \$20.00." The writer goes on to say "The refiners offer to sell sugar to the United States, and our Government put an embargo on it. What price must they be getting for it from the United States wholesaler that it can be retailed in Port Haron on any day for 17 cents?"

The correspondent wants to know who gets the big profit here—the refiner, the wholesaler or the retailer; and a good many others would like to know the same, also how Canadian refiners can sell their surplus sugar—how, indeed, they can sell sugar at all, for have we not been told there is a shortage?—to American customers who retail it at 17 cents.

The Board of Commerce might find a fruitful field for investigation in the sugar question. As soon as it gave up control, the price of sugar started to climb; and the questions asked by the Globe's correspondent are most decidedly pertinent and deserving of an answer—not of the stereotyped kind with learned discourse on tariff, exchange and all the other academic bunkum, but the straight answer, who is getting the rake-off. For a rake off there must be, if Canadian refiners can afford to sell sugar at a price that will allow retailers to dispose of it at \$8.00 per cwt. below Canadian retail price.

HOTELS QUITTING—No less than four fewer hotels in Bruce County are applying for Standard Licenses this year: these are the popular King Edward Hotel at Chesstow, one in Paisley, one in Wiarton, and one the Riverdale Hotel, the last remaining of its kind between Walkerton and Kincardine. The Herald says in this era of self starters and gasolines, the creaking of a rural hotel sign along a lone road is about as inviting as a cow bell. Slowly but surely the habits of a people do change.

A Timely Help

The face is often the first to betray a decline in strength. When you feel rundown and your face is colorless, the need for

SCOTT'S EMULSION
is plainly evident. Those who have tried Scott's know its power to strengthen the body, enrich the blood and put the color back in the face. Don't be pale-faced—take Scott's Emulsion.

Scott & Bowne, Toronto, Ont. 19-28

Splendid play by Methodist Talent

Fully sustaining the reputation earned last year with "The Minister's Wife," the Ladies' Aid of the Methodist Church presented the "Minister's Wife's New Bonnet" to a full house last Friday evening. The first half program was introduced by the pastor, Rev. Mr. Cole, and consisted entirely of musical numbers. Miss R. Irwin and Mrs. Cole opened with a fine piano duett and in solo and a duett with Mrs. Cole "I heard a voice in the tranquil night." Mrs W. Lawrence's sweet soprano voice was heard to good advantage. A mixed quartette, "The Husband's Mistake," somewhat of playlet form was rendered by Mrs. Gagnon, Mrs. Cole, Messrs W. Glass and Bert Saunders, with the latter in the leading role. Little Wilma Smith, the seven year old daughter of Mr and Mrs Robt Smith, made a big hit on "What he Wrote on my Slate"; she will be heard from in a few years. Some fine blending was heard in the male quartette "Call John" by Messrs Glass, Cole, McCrae and Saunders, and they were forced to respond, giving a humorous encore.

In the enactment of the "Minister's Wife's New Bonnet" all the characters seemed admirably adapted for their respective roles, and interspersed with lively choruses and other music, it quickly caught the approval of the audience. As the minister, Rev. Grundy, Dr. Cecil Wolfe effused dignity and decorum and as Mrs Grundy, Miss Cora Wilson depicted an ideal wife who was revered by the congregation and selected as S. S. Convention delegate. But alas, she had no hat suitable to wear there and the eager efforts of three of the Sewing Circle members to provide her one, furnishes much of the amusement of the plot. Mrs. Sherk as Agatha Squalls was one of these self appointed milliners, she was "boss" and evolved a wonderful bonnet!! Misses Marie and Gertrude Cole in their roles were also would-be milliners, they too created hats for the minister's wife and these three with their energy, deadness and stuttering respectively, were the humorists of the play. Miss Walker, a real milliner from the city who designed the accepted hat was Miss Rita Irwin, who with Billy Butcher, taken by R. L. Saunders, added the lovers' touch. Other important characters were depicted by R. E. Richardson as choir leader, Mrs. W. A. McGowan, Misses V. Aljoe and P. Wolfe and Messrs McCrae and Knechtel, Mrs M. Storey, Miss Annie Smith, Mrs. G. S. Burnett, Mrs. Chapman, Miss I. Wilson. Miss Mary Smith was an able accompanist. The proceeds of the evening were almost \$140 and with light expenses will leave a good balance on hand.

Durham High School

REPORT FOR WINTER TERM
Class I, 75 per cent and over; Class II, 80 to 75%; Class III, 40 to 60%; Class IV, below 40%. Those marked with an asterisk or * have failed to obtain 40 marks on one or more of their examination subjects. DURHAM. — TARTO

PREVENT APPLE SCAB

Much of the Loss Through This Disease Is Needless.

Careful Spraying Will Do the Trick—Three Sprays Necessary—Either Lime Sulphur or Bordeaux Mixture May Be Used.

(Contributed by Ontario Department of Agriculture, Toronto.)
THIS is the most common and most serious disease of apples in Ontario. It occurs wherever apples are grown, and the scab spots on the fruit and leaves are familiar to almost every fruit grower. In wet seasons it causes a financial loss of many thousands of dollars to the fruit growers of the Province. This is to a large extent a needless loss, for Apple Scab can almost always be prevented no matter how wet the season may be, by thorough, timely and intelligent spraying, in combination with the proper pruning of the trees. The scab only develops and spreads during wet weather. The times of the year therefore when we get our wet weather, are the times we have to spray if we are going to prevent scab. One spraying with either lime sulphur or Bordeaux mixture is not sufficient to prevent scab, as the rain gradually washes the spray off, and as the leaves and fruits by growing larger develop more surface to cover. In order to be sure of preventing the disease we must spray from three to six times during the season, the number of sprayings depending upon whether the weather is wet or dry. The first spraying should be done just as or soon after the leaf buds burst. For this application use commercial lime-sulphur, strength 1 gallon commercial to 7 gallons of water. If the grower is certain that there is no San Jose Scale in the orchard and very little Oyster Shell Scale, a weaker solution may be used, 1 gallon to about 20 gallons of water, or Bordeaux mixture 4.44 formula may be substituted.
The second spraying should be given just before the blossoms open, that is, just when they are showing pink, using commercial lime-sulphur strength 1 gallon to 35 gallons of water, or Bordeaux mixture 4.44 formula.
In average seasons the third application should be given immediately after the blossoms have all or nearly all fallen, with lime-sulphur strength 1 gallon to 40 gallons of water. This is generally the most important spray for the control of Apple Scab and it must be promptly applied, as a delay of a day or two may make all the difference between success and failure. Bordeaux mixture should not be used at this time, as it is almost sure to cause the fruit to be russeted. Arsenate of lead should be added for the second and third sprayings to control Codling Moth and other biting insects.
In seasons of normal weather conditions these first three sprayings should control the scab completely. In some seasons, however, additional applications are absolutely necessary if the scab is to be prevented. The time of these will depend upon when we get our cold, wet weather. In some seasons there is a long period of cold, wet weather between the date when the blossoms begin to burst and when they fall. Sometimes the length of this period is three or four weeks. In such cases it is necessary to give an intermediate spraying between the second and third. Hence, if the grower finds at the end of twelve days or two weeks after he has applied the second spray that the weather is still cold and wet and development of the blossoms is very slow, another spraying should be given at once to protect the young blossoms and foliage. This should be of the same strength as for the third regular spraying, but poison should be omitted because of the bees. It is very important to observe carefully the weather conditions and apply this spray when necessary.
Spraying early in August is an insurance against late infection of Apple Scab and Sooty Fungus. In wet autumns such spraying is necessary to prevent late attacks of scab, especially with varieties such as McIntosh Red and Snows, which are very susceptible to scab. For this application use a weak lime-sulphur solution, 1 gallon to 40 or 45 gallons of water, or Bordeaux mixture. No poison should be used at this time. Often if the spraying is done later than the first or second week in August there is a chance of the fruit being discolored at picking time. Should the dust method prove satisfactory it could be used at any time in the fall without danger of staining the fruit. If the early sprayings are thoroughly done, and the fall is not extremely wet, usually the crop will remain clean without this last application.
Thoroughness in spraying—Very few men spray thoroughly enough to get the best results. The object of spraying is to cover the surfaces of the leaves and fruits with a good fungicide (a substance which destroys the spores of fungi), such as lime-sulphur or Bordeaux mixture, so that when a spore reaches leaf or fruit it is destroyed and cannot grow and cause scab. We see, therefore, that if spraying is to accomplish its object it must be very thoroughly done; every fruit and leaf must be completely covered with the fungicide so that there is not the least space on which a spore can germinate. Thorough spraying necessitates the liberal use of the spray mixture. A large apple tree will require from six to ten gallons or more to cover it properly. Care must be taken to reach every side of the young forming fruit or (in other words) of the calyxes or flower cup which develop into the fruits.—Prof. J. E. Howitt, O. A. College, Guelph.
