At the Service Great Industry

The farmers of Canada are engaged in one of Canada's greatest industries and produce a large part of the Dominion's wealth.

THE banking requirements of this great I industry are far-reaching and demand a nation-wide service—such a service as the Bank of Montreal affords with a branch in every important centre of Canada, each having an intimate knowledge of local agricultural and market conditions.

We invite farmers to talk over their banking problems with the manager in our nearest branch.
