Then sow the sweet Answer:—Apply the lime to your ing; work it in by disking and harrowing. Any broadcasting machine air-slaked burnt lime half a ton to the acre will be sufficient.

The same of first as moments. On the parents it graph with no wax record attached dows, as they can be laundered freprofit per acre of \$24.11; from using raw rock on a similar area, they got a net increase valued at \$12.54, while from basic slag the increase valued at \$12.54, while from basic slag the increase amounted to \$16.21. This shows that the basic slag was slightly more profitable than the raw rock but not nearly as profitable to use as the acid phosphate.

With the lime. It should be applied comes out eventually, but you wonder why not at first. Perhaps you despited the full would consider Christianity in their lives. Yes, they were both and such as can be wiped readily with and such as can be wiped

His reign has extended over about should have charged Solomon to exeforty years, from about 1010 to 970

It is better to able to heal the international wounds be taken up frequently and held quietbe taken up frequently and held quietand love of splendor. but cannot command. The Council for Promoting International Friendship through the churches is doing pioneer work, and may be laying foundations that will withstand all assaults. But one thing we must face: Christ never intended that Christian should fight Christian, either in personal combat all wash water, keep up stove fires, or in war, or in commerce. We must

farms. The connection is easily fol-

For the first time in many years way to get rid of sumac or poison-ivy. should be removed carefully and thoroughly cleansed. All exposed surfaces of the body should be washed with plenty of soap and water and then thoroughly rinsed, Repeated mowing or cultivation is another method. The injury to other plants or trees is no feared. It may be applied with a sprinkler or spraying pump; and in many cases one application is sufficient. Arsenate of soda has been used very successfully and without injury to the trees to kill poison-ivy on trees not less than from six to ten inches in diameter. This is also effective for ivy on stone walls, buildings, and
