## They are Convinced

Farms in Three Counties of Ontario Prove Value of Fertilizers

Tests of 1920 carried out under scientific superof the value of fertilizers in hastening maturity and obtaining larger yields and bigger ears.

The demonstrators report:

S THE RESERVE AND PROPERTY OF STREET,

THE SUNDAY SCHOOL LESSON.

NOVEMBER 28TH.

11 and 12. Golden Text-Matt.

11: 28.

1. "The greatest difference of all between the plots was in the maturity of the corn and the yield of ears."

2. "These two plots of corn (1st-fertilized, 2nd-fertilized and manured) were eight to ten days earlier in ripening." 3. "The differences in maturity of the ears for silage-purposes were distinctly in favor of the fertilized plot.
