with the Fordson

TRACTOR

WHEN you have adopted the power farming idea you will find there is not a month in the whole year in which the alwaysdependable Fordson will not prove itself a paying investment because of its economy and rugged efficiency for every power farm-

If it has paid you to keep horses the year round, it will be abundantly more profitable to use a Fordson.

ing job.

There is not a job that horses can do that cannot be done more quickly and at less cost with a Fordson.

When it is idle it is not eating up your profits. At work its fuel cost is low-about 2 gallons kerosene per acre plowing

Hauling your manure spreader, disk, cultivator, seed drill, mower, binder, spring and fall plowing, and all kinds of belt work-there is always some job waiting for the handy powerful Fordson that will more than pay for its service over the summer and winter.

-And when the opportune moment comes in the spring for quick action. your Fordson is ready on the ground to give you 100 per cent service. You then know precisely what it can do and put in larger crops, secure in the knowledge that you can put through every operation in quick time.

Spare parts and repair service are as handy to secure as the cheap kerosene it burns so economically.

It will pay you to buy the Fordson now and replace several horses. Come and talk it over with us. Let us demonstrate on your farm the Fordson on both the drawbar and the belt, that it will do what we claim .
