Premier and Cabinet Ministers Home from their Jaunts

Canadian people had a double chance in welcoming home recently when both the new Governor General and the Prime Minister got back to Ottawa simultaneously. The Premier waited over in Quebec for a few days to get the advantage of the reflected glory, since there was no concert planned for himself or the other wanderer of the cabinet, Hon. C. C. Ballantyne, who is also back to Ottawa after a strenuous summer spent in England.

Hon. Hugh Guthrie, Minister of Militia, is continuing to enjoy his holiday over there and is expected to arrive home about the time the government is ready to issue writs for some of the bye-elections which, according to the law, should be held within the next few weeks and months.

A Foot Expert Coming
By special arrangement with the Scholl Mfg. Co., Toronto, the largest manufacturers of foot comfort appliances in the world, we're enabled to offer the services of their foot expert on Wednesday, August 24th

If you have corns, callouses, bunions, tired or aching feet, pains in the ball of the feet, cramps in the toes, weak ankles, fallen arches, or any other pains or discomforts of the feet, you should not let this opportunity slip away from you. It may mean immediate and permanent freedom from the annoyance of foot ailments.

No Obligation to Buy.
You will not be asked to spend a penny. You may feel perfectly free to ask advice and to walk out without buying.

Do not put it off. See our Foot Specialist. He solves foot troubles.

DORNOCH
Tuesday a. m. 9th August, an old and highly respected resident of Sullivan Tp. in the person of Mrs. Bernard Kennedy, was called to her reward. Deceased who was 94 yrs of age, was a native of Ireland and about 70 years ago, she with her husband, emigrated to Canada and settled on the 10th con, Sullivan, where they made a comfortable home in spite of the many hardships and trials which the early settlers had to endure. Deceased had a cheerful, loving disposition and delighted in telling the younger generations little stories reminiscent of the early days.

A Famous Report
The Sutherland Commission appointed to enquire into the Hydro radial proposition of building many new lines on the guarantee of the government has reported dead against it. At least four of the five commissioners find that the estimates made by the Hydro are too low, they see no chance of it becoming self-supporting, competition of motor and trucks is lowering railway profits, new radials would injure present government railways which already cannot meet expenses and a great many more cogent reasons. The Labor member, all alone, makes a report advising to go ahead, his chief reason being to provide employment.

This bulky report we think justifies the Drury Government in appointing the Commission, and they will be further justified in refusing government aid to wildcat schemes that might land the province \$50,000,000 in debt.

Radials tend to centralization a process which has gone too far now. What the government can do by loan or guarantee should be done to stem the exodus from the rural parts, which has assumed alarming proportions. Bigness in cities is not always betterness. Rather a hundred thriving towns and villages than that one overgrown city with its slums.

A Sulphite Mill
A letter from Rev. Dr. Farquharson a few days ago incidentally refers to a subject of national importance but little known here. Miss Jessie Farquharson is at present at Sulphide, near Tweed, Ont., and a call on her has furnished him with the story below. It may be of interest to those who are interested in the sulphide works are very interesting. The ore is taken from a depth of some 800 feet. This ore contains sulphur and iron with other ingredients. However, unlikely to burn it may be, but when it is put in a kiln, suddenly heated at first with coal, but when started nothing is added but the ore. The gas is pumped off by a force pump and presumably air drawn in at the other end. This oxygen supply does the firing and it is kept at a temperature of between eight and nine hundred degrees. The gas that is drawn off is passed through a series of pipes where it is cooled through streams of cold water passing over the products resulting are sulphuric acid, sulphate of lime, plain common sulphur, and other chemicals. The refuse is charged with iron which, with improved machinery, might be of mercantile value, but up to the present time it has simply been thrown in a dump.

MULOCK
Pleased to note that one of the school girls of this section, Adeline Urhuh, has taken first prize in the contest for best home garden in South Grey. Congratulations. We hope we have the honor of congratulating more of the school boys and girls after the school fair, Sept. 13, which is to be held at Mulock. There are 11 schools in the township taking part in the fair this year.

Do Your Bit to Prevent Bush Fires

YOUR co-operation—the co-operation of all the citizens of Ontario—is the biggest need in Ontario Forestry to-day.

History shows that impoverishment and national decline follows from the destruction of a country's forests.

Most of the area of this Province is non-agricultural, suited by Nature only for growing trees. This land remains yours but the Government sells the trees.

Every summer in Ontario an average area of 425,000 acres of forest land is burnt over, equal to a strip 130 miles long by 5 miles wide. This yearly desolation at the hands of her own people is gradually turning the northern part of the Province into a rocky desert. On thousands of acres, even the soil has been destroyed by fire!

Save Ontario's Forests They're Yours

The average yearly number of forest fires in Ontario is about 1,275. The vigilance of the Fire Rangers keep two-thirds of Ontario's forest fires down to an average size of less than five acres. But the others are big enough to raise the total average to 350 acres.

Forest fires in Ontario are destroying provincial assets of timber and pulp wood upon which the Province relies to help pay her share of Canada's War Debt. Forest fires destroy fish and game, decrease the regularity of stream flow, cause spring floods, land erosion and the crippling of water powers; turn revenue-producing areas into rock deserts.

Out of every 100 fires in Ontario's forests only three are caused by lightning, while ninety or more are due to man's carelessness. One thousand men scattered over 100,000,000 acres, have little chance of preventing fires. All they can hope to do is to see the smoke in time to check them and put them out before they spread beyond control.

The problem of adequate protection of Ontario's Forests from fire is almost entirely a moral one involving the whole public of Ontario. The vast majority of forest fires are caused by human carelessness due to lack of civic responsibility. The tendency is to leave all the responsibility to the Government for protecting the forests from fire. The Government cannot protect the forests belonging to the people of Ontario unless the people of Ontario co-operate. Forestry needs your patriotism, your public spirit, your regard for the general welfare of Canada.

Ontario Forestry Branch,
Parliament Buildings, Toronto, Ont.
