

Tree-Line Advancing Westward

What has happened in the United States middle west is also happening on the Canadian prairies, namely the tree-line, which fifty years ago was located a comparatively short distance west of the Mississippi and Red rivers, has advanced several hundred miles into what was formerly the bald prairie.

growth individuals and communities have planted groves all over the west. The Dominion forest nursery station at Indian Head has sent out over sixty million trees to forty thousand farmers in the last twenty years, and this with civic and school planting is helping to change the appearance of the prairies.

School Teachers Putting up an Aggressive Fight

So are the School Trustees By a strange dispensation of fate, Judge J. H. Scott of Perth, a former Walkerton lawyer, headed the six hundred Ontario School Trustees at Toronto Easter week in their fight against the Teachers' Federation of Ontario, of which Miss Jennie Stead of Walkerton is the Provincial Organizer and one of the leading spirits at the combined Teachers and Trustees Convention, recently assembled in Toronto.

With the teachers forming themselves into one big union and practically dictating what their salaries shall be, and otherwise hemming school boards in by trade union restrictions, the fight with the Trustees was bound to come and Judge Scott in retiring from the Presidency of the Trustees' Association of Ontario denounced the Teachers Federation as a purely mercenary movement backed by all the trickery of trade unionism, such as "black-listing" school boards which refused to meet their demands, and thus compelling as it were, teachers to refuse to engage with boards thus posted. Judge Scott was in favor of giving teachers a fair salary for their services but he thought the Department and not the teachers themselves, should be the ones to decide what the salary should be.—Bruce Herald and Times.

Tea Prices Rising

Rumour has it that the labor unrest and general dissatisfaction in India, the largest tea producing country in the world, have made production so expensive and hazardous that a general rise in prices may be expected in the near future. The estimated consumption this year will be much larger than the crop available.

Publicity Methods Used in Forwarding the Campaign.

The ultimate object of the campaign for better sires is to improve the quality of the beef and dairy herds of the country. To achieve the object it is necessary, first, to create in the minds of farmers an interest in and a desire for a better class of cattle. This cannot be done by writing and talking alone.

Louis' Brew had a Powerful Kick

Louis Coopersmith's home brew, seized at his home in Chesley last week by Inspector Beckett and Constable Kidd, was powerful stuff. Analysis by the Inland Revenue officers here showed that it tested 112.5 per cent proof spirit—ordinary whiskey runs about 60 and the strongest not over 75. It was so strong that it killed the grass on the lawn of Heroes' Square, where the Inspector dumped it.
