Tea Shortage—Higher Prices

In 1920, so much more tea was produced than required throughout the world, that the market dropped to a very low level. The situation was so serious for the growers that they agreed to reduce their production 20 per cent during 1921. Consumption, which has increased tremendously, and the production of tea being curtailed, has resulted in the highest prices for tea in years. The recent reduction of four pence per pound on tea-tax in England has further stimulated consumption, which means that even higher prices may soon be expected.
