EASTERN TOWNSHIPS OF QUEBEC PROVINCE.

French-Canadians Returning From New England States to Their Favored Homeland.

Already that territory known as the Eastern Townships of Quebec has two claims to world distinction which will never be wrested from it. It leads the world in the production of asbestos, accounting for 85 per cent, of the globe's entire supply, and likewise, with a production of eight million pounds annually, has the leadership of the world in maple sugar output. Now the Eastern Townships are making a new bid for fame and seem to be destined to become one of the principal, if not the leading centre of the textile industry in Canada,

minion Silk Dyeing and Finishing situation is peculiarly favorable, the a few feet below the surface. We dig Company, a branch of the National province being regarded with envy all into the earth for all kinds of queer Silk Dyeing and Finishing Company over the American continent for its things, but these are probably the only of Patterson, New Jersey, has located freedom from strikes and labor dis- gum mines in the world. at Drummondville, Quebec; the Pre- orders. Transportation facilities are mier Silk Mills, capitalized at \$250, unsurpassed, the Eastern Townships 000, has established at Cowansville, being served by no fewer than eleven Quebec; and the Franco-American Canadian and United States railroads, made by men who have worked it. Company, engaging in the dyeing and finishing of all textiles is erecting a commodious plant at St. Johns. This makes a total of fourteen textile industries which have located within the past three years in the Eastern Townships, expending about twelve million dollars on plants and equipment Among them are manufacturers of tire fabrics, corsets, silk hosiery, gloves, silk dyeing and finishing, cottons, furs, and silks.

this territory will be the home of all high transmission line distributing the silk manufacturing industries of this to the various municipalities and Canada. Already practically all the urban centres. textile plants of Canada manufacturing tire fabrics are to be found there manufacture of fabrics and fire hose Union. and has woollen and knitting mills. Whilst the Eastern Townships of Lennoxville has important hosiery Quebec are largely drawing their inmanufactures and Magog textile dustries, in the shape of branch facprints, whilst Richmond, Victoriaville, tories, from the Eastern United States, Farnham and Waterloo are occupied they are without doubt drawing a supon a smaller scale with the manufac- ply of their labor from the same ture of woollen and cotton goods. St. source. The industrial prosperity of Hyacinthe has wootlen, cotton, and the New England states and Quebec's clothing establishments.

A Wide Range of Products.

The textile industry, it must be realized, is only a phase of an industrial activity which is general throughout the area, but which has come in a peculiar manner to centre about the growing cities and towns of the Townships. Practically every line of manufacture necessary to the mainterance of the economic life of the province and the Dominion is followed there. whilst the export trade is growing substantially. In addition to the above, and to asbestos and maple sugar, stone products, copper milling, rubber goods. machinery, biscuit making and matches are all important, whilst the principal centres of the Canadian tobacco industry are to be found within the area. At St. Johns are located felt establisments, insulated wire factory, clay and pottery works, collar and shirt factories, and an immense sewing machine establishment, whilst St. Hyacinthe possesses the largest pipe its unumfactures to Europe.

There is only one test by which to decide a student's fitness for promotion or graduation, and that is his daily work. That's what counts. Examinations or a few memory tricks are nothing in comparison with this. The teachers and professors who come in contact all the time with their scholars. know perfectly well by their written exercises, their daily work, their recitations and their general class work whether they are well grounded in their studies or not. This is the only safe guide as to their mental calibre and their degree of scholarship. -Success.

Nature poured her gifts lavishly upon this section of the Dominion, and in developing the area industrially. heart of the richest farming areas of are very valuable indeed. Within the past few weeks the Do- rural and urban population. The labor trees that died centuries ago is found

One of the greatest advantages the area possesses lies in the fact that it is served by one of the largest and most efficient power concerns in Canada, the Southern Canada Power Company. Ltd., ensuring an adequate supply of power for the operation of any industry on any scale at terms which About sixty cities and towns in a territory of five thousand square miles are supplied by the company with East. Developments would indicate that power, two hundred and fifty miles of
