PRICEVILLE AND VICINITY

PRICEVILLE AND SOUTH LINE The Gaelic service in the Presbyterian church, Priceville on Sunday, 15th Oct., by Rev. Mr. Matheson, the former pastor, was largely attended, there being 100 to 150 present on the occasion. It shows there is some life in the highlands of Scotland yet as the people came from the four directions leading to St. Columba Ch. The former faithful pastor received a grand reception from all his hearers. Mr. Matheson enjoyed the pleasure of seeing so many of his old parishioners to greet him on his arrival. In his preliminary remarks he said he didn't hear a word of Gaelic from one end of the year to the other where he now was, but he gave a good sermon all the same. He referred to the many changes that took place by the removal by death of many who were in the prime of life, when he was there. In the evening he preached in everybody's language the English, to an over crowded church and met with greetings from all present. As he enjoyed the pleasure of seeing so many present, he felt quite at home in the old church where he preached for nearly 21 years. At Swinton Park he preached at 2.45 and we fancy to an overcrowded house there also. Mr. Matheson is going to stay a few days visiting his many friends in the vicinity of Priceville. The pastor, Rev. Mr. Jones, was at Caledon last Sunday preaching in the church vacated by the Rev. Mr. Burkholder. Mr. Wm. Ramage of North Egre-

S. Grey Teachers' Institute

"One of the best Institute meetings in S. Grey. Attendance and interest particularly good. Every teacher from Normandy there and they had the greatest distance to go. Every High and Continuation School in S. Grey represented, except Markdale School." Thus exultantly does Secy J. A. Graham end up his minutes with which he has kindly provided us, and from which we extract. This year's meeting was held in Markdale, Thursday and Friday, Oct. 12th and 13th, and the non-representation of Markdale High School represented an old proverb "Nearer the church the further from grace." The chair was taken by Mr. W. J. Messenger, Principal Markdale Public School and President of the Institute, whose pleasing and tactful manner did much to make the sessions pleasant and profitable. After devotional exercises and reading of the minutes, the Auditors' Report was presented, receipts and vouchers correct and institute in good financial condition. In the afternoon there was a happy reunion of West Grey and South Grey teachers, and seating room was at a premium. Mr. T. S. Cooper, the efficient Agricultural representative, for South Grey, talked on Agriculture in the Public Schools, advising teachers amid much useful information, to make a closer study of the birds and insects of the district so as to discern the injurious and beneficial, and get an idea of the constituents of the soil adapted to it. He was gratified at the interest taken in the school fairs. The President took as his topic "What constitutes an efficient teacher," and amongst the qualities necessary, he enumerated sympathy with his work, ripe scholarship, always a student, be honorable and honest. Mr. J. R. Seavy, Art Teacher at Hamilton Normal School, was the representative of the Dept. of Education and showed a mastery of his subject he, we understand, being the principal author of the "Art Manual." His first topic was "The spirit of the North," bringing out Art as a patriotic factor in schools, especially where there was necessity of transforming foreign elements into good Canadian citizens. He advised using wall pictures of a patriotic nature in teaching the history of Canada. His samples of class work were the best yet shown at a Teachers' Institute. Mr. Thos. Allan spoke on "Co-operation," which should be between pupil and teacher, teacher and parent, teacher and trustee, teacher and teacher. Mr. Allan's enthusiasm and long experience makes him a valuable adjunct to any meeting of teachers. Adjourning at 4 p. m. about 20 Markdale citizens with autos took the teachers for a trip to Eugenia Falls and was the best outing of the kind for years. The trip ended at the Methodist Church where the ladies of Markdale had invited the teachers for tea and social time. Addresses of welcome were given by Reeve McArthur, Mr. Shaw of High School Board, Dr. Ego of the Public School Board and by Rev. F. Bowes, Methodist minister, who was toastmaster. Inspector Wright fittingly replied and votes of thanks followed to all who had contributed in any way to the teachers' entertainment were cordially passed. At 8.30 p m all repaired to Regent Theatre where some special educational features were shown on the screen. Friday morning, Rev. Dr. Gray of Markdale Presbyterian Church, conducted devotional exercises and gave an address on what he regarded as the true functions of the teacher, which had many valuable points for young and old teachers. Miss Leeson's paper on her trip to Europe last summer was most interesting by her excellent descriptions of places visited, scenes viewed, &c., making it the next best thing to going oneself. It was worthy of a wider audience than even S. Grey Institute. Dr. Campbell took the subject, "Mouth Health as a factor in Education." He is intensely earnest on this subject and furnished much useful information. Mr. Seavy a second time dealt with his favorite subject "Art" as it is related to drawing and color. Mr. Harold Ermel of Neustadt, opened the afternoon session with a paper on "Promotion-Examinations" in which he urged that the standard of Entrance and Department Examinations should be raised and the teachers agreed with him, for they carried a motion favoring this. Miss Mabel Leitmyer of Hanover, laid stress on "Entrance Literature." This was not merely searching the meaning of words or the location of places. The great makers of standard literature were those who saw the miraculous in the common place. Many would like to have Miss Leitmyer take the subject at another meeting. Inspector Wright spoke on "The Difficulties of young teachers," than whom there is none more qualified to speak. His wide experience, his sympathy, his knowledge of conditions all combine to enable him to make a profitable presentation. He favors township conferences as a benefit to young teachers especially: he liked the predecessor who tried to make things easy for his or her successor. Also the successor who appreciates and speaks well of her predecessor. Everyone should teach and practice the "square deal" in and out of school. The address was full of good advice

Bottle of Tea and Sandwich to carry him to North Pole Amundsen to hop off on seventeen hundred mile Aeroplane Flight, relying only on the invigorating and sustaining qualities of Tea and a Sandwich. Word was received from E. J. Ward, Government School Teacher, at Wainwright, Alaska, who is in Seattle, Washington, that Captain Roale Amundsen and his pilot, Lieut. Omdahl will hop off from Wainwright the latter part of May or the first of June to fly across the North Pole to Spitzbergen. Amundsen plans, Ward said, to make the flight of approximately seventeen hundred miles across the polar solitudes in one jump, carrying for subsistence only a thermos bottle filled with hot tea and a sandwich. Capt. Amundsen feels that the stimulation and invigoration given by pure fresh tea will sustain him and his pilot while making his unprecedented Arctic flight. Ward said Amundsen and Omdahl were building their winter quarters at Wainwright before he left. They consist of a cabin on the beach near the schoolhouse. They were well supplied with food and fuel. The schooner "Maude", Amundsen's exploration ship, according to Ward is drifting northward on the ice floe at such a speed that the explorer is expecting that the ship may cross the Pole and reach Spitzbergen in a year, although it may take longer. The "Maude" has a supply of provisions to last seven years.

Winter Feed for the Dairy Cow.

How to keep up the winter milk flow is a problem confronting a great many dairymen, more so in sections where the temperature is severe than in the milder climate of British Columbia. Invariably the price of milk goes up in the fall and down in the spring and just as untrillingly the supply drops in the fall and increases in the spring. The dairyman given good cows, the proper proportion bred to freshen in the fall, and conditions suitable for good general management in the matter of sanitation and thorough and regular milking, it is then up to the feeder to keep the milk supply up to the maximum. The dairy cow is a manufacturing machine and requires suitable raw material from which to manufacture milk. She can make excellent use of much rough feed if supplied in conjunction with concentrates in the proper amounts. Among the most popular or widely used winter roughages are hay, straw, ensilage and roots and for dairy cows legume hays are much more valuable than grass hays. For milk production good alfalfa hay has no equal but, if this is unobtainable, good clover or mixed hay is satisfactory. Damaged hay can be made more palatable by cutting and mixing with silage or pulped roots. The same holds true regarding straw. To provide the necessary succulence in a ration for dairy cows roots or silage, or both, are invaluable. Not only are these feeds succulent but they are bulky and comparatively cheap. Generally it is good business to give a milking cow all these feeds she will consume. This does not hold true regarding concentrates. A popular practice is to feed the cows one pound of grain for every 3 to 4 pounds of milk they produce. This is a good general rule to follow. What the grain mixture should be will depend upon prices of the different feeds at that time; bran, oats, barley, oil meal, shorts, soybean meal, brewers grains and cotton seed meal are the commonly used concentrates. Bran 4 parts; ground oats 2 parts; ground barley 2 parts; oil cake meal 1 part; makes an excellent dairy herd. It should be kept in mind that a freshly calved cow abundantly and carefully fed will usually produce the cheapest milk. At this time a pound of grain is equivalent to several pounds given later after the cow has decreased in her milk flow. Besides the roughage and concentrates heavy producing cows should have plenty of clean water and salt, and many successful feeders at the present time provide bone meal, lime, charcoal and other minerals. —W. H. Hicks, Supt., Experimental Farm, Agassiz, B. C.

Farms for Sale

190 acres. Splendid stone house. Hard and soft water inside. Good furnace. Bank barn 74 x 60. Straw shed 44 x 24. Stables all cemented, equipped with litter carrier. Good driving house. Hog pen and hen house Windmill pumps water to house and barn. Good bush. School half mile. Town of Drayton 2 miles. This is one of the best farms in Wellington County and is priced right at \$14,000. Half cash, balance at 5% per cent. If you are looking for a good home and a first class farm, see this. We also have a large number of farms from 50 to 200 acres for sale, priced right.
