The mighty forces which open the petals of the rose and bring the color of the peach which unfold the leaves and flowers, work stlently, noiselessly.

Scientists tell us that there is chemical force, power enough in the sunlight, working upon a few acres of glass, to run all the machinery in the world. Yet we hear no sound, not a particle of noise, although the forces are

There is a moral for everyone in this. Think it over.

### Origin of Some Famous Church Hymns.

Interesting and sometimes pathetic are the stories connected with the writing and history of certain famous church hymns.

A pretty story is told about the origin of the favorite Christmas bymn, entitled "Christians, Awake, Salute the Happy Morn." The composer, John Byrom, who lived in 1745, had a favorite daughter, Dolly, for whom he had promised to write something for Christmes day. She reminded her father of his promise. The result was that among her Christmas presents there was an envelope containing the hymn in original manuscript form, the title of which was: "Christmas Day for Dolly." This original manuscript is preserved in Cheetham's Hospital, in Manchester, England, and bears evident traces of having been carried around in Dolly's pocket.

"Jesus, Lover of My Soul" is a hymn around which many traditions and sacred associations cling. The story connected with its origin is very beautiful. Charles Wesley, the composer, was sitting at his desk near an open window when a dove pursued by a hawk, flew into the room. The dove was saved. This incident inspired John Wesley to write his famous hymn. His Christmas hymn, "Hark, the Herald Angels sing," originally written, "Hark, How All the Welkin Rings," is to be found in almost all hymnals, and has been translated into many languages.

"Abide With Me" was written by Henry Francis Lyte at Brixham, Eng. land, and it was his last compositon One Sunday evening, after leaving his church and congregation, he walked down to his garden near the seashore. He returned to his study at sunset. An hour later he wrote the bymn and showed it to his family. He died a few days later.

Toplady, who wrote "Rock of Ages," did not dream it would become so widely known and so highly esteemed as it is among people of all religious beliefs. Gladstone translated it into three languages, and it was the hymn for which the Prince Consort asked on his death bed. It was this hymn that was sung when the ship London went voices of the people singing "Rock of Ages" on the doomed ship was the last | are published by the Government. sound heard by those who were fortunate enough to be rescued.

## Windows Made of Rubber.

As a result of experiments which \$44,244,402. have extended over a period of four pounds have been spent, two British for 1921 \$10,852,000. They are probwhich is as transparent as glass and remark will apply also to the other as elastic and non-breakable as ordin- provinces. The total, therefore, wagary rubber.

sible to break these rubber windows in \$12,000,000 less than for 1921, the ordinary way. A ball bouncing whole difference being in Ontario.
