DEPT. OF AGRICULTURE

Pig Clubs

Since the announcement of the hog Club policy of the Live Stock branch, Department of Agriculture, five Clubs have been formed in Grey County. Of these three have secured their sires. The other two are waiting until bears of select conformation can be secured or until the Club is ready for their hog.

Re the quality of the sires supplied - be it said that the winners at the National Exhibition in Toronto and Western in London have been sent out. The hog positively must conform to the bacon type.

More Clubs should be formed at once. Grey Co. can and should be the leading hog producing County of Bacon Selects. To achieve this result improved sires are necessary. As these are difficult to secure it is well to get any orders in at once. Delivery will not be made till the boar is wanted.

School Fairs

Again the season is at hand when School Fair applications may be sent forward. The number of Grey Co. Schools entering have greatly increased as shown by the following figures: 1920-101 schools in 11 School Fairs; 1921-126 schools in 15 School Fairs and in 1922-157 schools in 18 school fairs. It is anticipated that in 1923 Osgoody and Glenelg Tps. Schools will enter in sufficient numbers to have a School Fair in each

Township. The greater number of Schools, the greater will be the prizes given. Let every one boost the School Fair.

Short Courses

During the week the members of the Clarksburg Short Course have had instructions in Field Husbandry, Veterinary Science, Bees, Markets and Bacteriology. On Tuesday afternoon the Class was taken to Messrs Claude Runnings and Reekie Bros where classes in Shorthorns and Yorkshires were judged. On Friday the class visited Mr. J. J. Buchanan's herd of Shorthorns and flock of Leicesters.

During this coming week Mr. Dickson, Vineland Horticultural Experiment Station, will be on hand to give lectures on Fruit and Vegetable Growing. A large crowd of fruit growers may be expected.

This week application forms have been sent out to the Township of Egremont. As some applications have come forward before announcements were sent out, a large crowd is anticipated.

The Ladies' Course in Domestic Science at Clarksburg, has increased until upwards of 50 are now attending. Next week Miss Helen Hobkirk, graduate nurse, will be in charge of the Home Nursing Course at Clarksburg.

A Port Elgin United Brethren Minister has taken the contract for rural mail delivery. This is another proof that the average country village has too many preachers.

A Century Of Banking

ALL of this Bank's service, all of its knowledge attained in over a century of banking, are dedicated to the interests of all of Canada.

LOCAL AND PERSONAL

Miss MacPhail, M.P. in Holstein

Mr W Coleridge, Owen Sound, was renewing acquaintances last week and attended the annual meeting of the Egremont Creamery Co.

Mrs Carter of Gladstone, Mich., visited her sister, Mrs Geo. McCall, over the week end.

Mr Mobery of Wingham, has moved his family into Mr Brown's house until lately occupied by Mr G McCall. Mr Mobery is a railroad man and is on the section

Mr. Reid received a message on Tuesday that his mother, who has been in poor health for some time, had died at her home near Ottawa. We sympathize with the bereaved.

The Anniversary Services in the Methodist Church on Sunday conducted by Rev. Mr Cousins of Allenford, was well attended. Financially it was also a decided success.

The crop judge is on his rounds this week taking samples from the bins. Egremont is noted for good oats. Last year Messrs Cowan and Caulfield were awarded prizes in Toronto. This year J. A. Dixon was successful on two counts in Guelph.

Creamery Co. Had Good Year

The Annual Meeting of the Egremont Creamery Co. was held on Thursday, Jan. 12th, with a fair attendance. Mr Scott of Toronto, Prov. Butter Grader, addressed the meeting on the necessity of greater care in the production of first class cream. He stated there is too much second grade butter manufactured in Ontario. He cared not who were the butter makers or what they were paid, if the cream was not taken proper care of from the time of milking until reaching the factory, it is an utter impossibility to make first-class butter. He strongly advised paying by grade.

The Board of Directors are as follows: John McArthur, A. McEachern, D. Gillies, J. H. McDougall, R. T. Dodds, N. McDougall, R. Aitken, and Neil Calder.

The financial statement shows that 100,808 lbs of butter were manufactured, which realized \$31,654.40. Patrons, numbering 250 in all, were paid \$26,654.27. \$289.82 was realized from sale of buttermilk. \$2264.38 was paid for drawing cream and \$1008.05 for manufacture. Non shareholders were paid 52c first sale, dropping to 34c and 32c most of the season, then up to 35c again last sale. Shareholders got 20c per cent more each sale. After paying \$50 principal and \$87 interest on the mortgage, the balance on hand was increased from \$87 at beginning to \$333 at the close of the year.

Trustees and Ratepayers Meet

The first meeting of the Egremont Trustees and Ratepayers' Association, was held in the Public School, Holstein, on Wednesday evening, Jan 10th. The meeting was very well attended and was fairly representative of the Township.

Mr Segesworth, Field Secretary of the Ontario Trustees and Ratepayers' Association, delivered a splendid address on Education. He said that the Trustees and Ratepayers had organized that they might have an exchange of ideas in Conventions, Provincial and County and in district meetings to discuss the problems of education until they become their master and to work out progressive schemes in Education.

Mr Segesworth asked "What has Education done for us?" and answered no achievement has ever been made without Education. Progress corresponds with intellectual development. All problems are solved by intelligence of those interested in the problems. He pointed out how a country's wealth depended on the intelligence of her citizens and illustrated the statement by stating that Canada's resources were the same in the time of the North American Indian as today, but it took the intelligence, Canadian to make them into usable products.

When is a person educated? There is a difference between passing examinations and getting an education. It should be impossible to graduate from any school of learning without being educated, but it is possible, he said. "Education is not being prepared for professional life, not getting; but it is the training we receive in development of powers, so that when problems arise, we may meet them unafraid."

The interest in education of those present was shown in the questions asked and by the discussion that followed.

The Association expects to have Miss Mae Skilling give an address on "Music in the School" some time in February.

SPLENDID FARMS FOR SALE

Lots 1 and 2 of 14, 2 and 3 of 15, on the Provincial Highway at Orillia, 200 acres in a good state of cultivation. Good water, good brick house and a good bank barn, shed and outbuildings. W. T. PINDER, R R No. 1, Holstein

SOUTH BEND

We have been having some real winter weather but is getting milder again. Quite a number are suffering from severe colds which never seem to fail this time of the year.

Mrs Thos. Smith and daughter Ina, are visiting at Mr Gordon Legge's. Miss Agnes McQuarrie of Riverview, visited at Mrs Sarah Rawn's recently.

Mr Alex Rawn is spending a month with friends around Proton. Miss Margaret Ainlay returned to her home in Kitchener, after a fortnight's visit at her uncle's, Mr G. Legge's.

Neighbors and friends, numbering over 70, gathered at the home of Mr. and Mrs. J. Legge, prior to their departure for their future home in Kitchener, and presented them with a silver casserole and silver knives and forks. Mr Robert Sim read the following address:

To Mr and Mrs Legge and family: As friends and neighbors we are gathered here to-night to express our deep regret at your leaving our midst. Yet while we feel it is a great loss, we are assured others will gain by our loss.

You and your family have always taken an active part in the social side of our community, having always a helping hand for those in need. We regret that your health has been such that you decided to leave the farm. May you soon gain the required strength, so that we may even hope for your return to our community in the near future.

Your family will leave our merry young circle, something we wish we could prevent, as they have always been bright, cheerful and willing at work or at play.

As true friends we have lived together, may we still maintain that true friendship as we wish you health and all that the future may have in store for you. May you long be spared to enjoy a life well filled with kind deeds and acts as those which we have received and will long cherish. As a parting token of our friendship, we ask you to accept this small remembrance, and may they often allow your thoughts to wander back to this evening of Jan. 10th, 1923.

Signed on behalf of the friends and neighbors. Mr Legge made a suitable reply, thanking them for the kindly remembrance. A sociable evening was then spent in music and games, followed by a sumptuous lunch.

Egremont Council

Council met January 8th, members elected, subscribed to the statutory road filling on a big scale or for thrashing, motor for every dollar he would be required. Asked as to the wear of a motor, the speaker, himself an engineer, said a motor in a smelting furnace over which he was overseer, showed signs of wear but only the roller bearings mostly, after running 22 1/2 hours for 14 years.

The speaker told of two farmers using Hydro, giving full details down to the minutest point what they did, the hours, the work, the power etc. One of these farmers, who farmed on a large scale, using his motor for everything said for every dollar he had invested, he got back \$2.50. The other farmer on a smaller scale said \$1.50 for every \$ invested.

That Hydro is fast becoming a popular power, one may safely judge from the fact that notwithstanding the full cause during the war, 84 municipalities are now using it in the province.

Previous to speaking a half hour in amusement by way of moving pictures comic as well as instructive, were given which was enjoyed and appreciated by the fairly large and orderly crowd present. A committee of three was appointed, namely, Messrs Jas Blyth, Norman Kerr and Julius Keller to push Hydro if public opinion so desired and encourage it. A hearty vote of thanks was tendered the speakers at the close for their able and plain explanation of Hydro power and its workings.

In the absence of Mr Earl Mead, U F O President, through sickness, your humble scribe occupied the chair—don't tell anybody.

Miss McPhail Considerate

Agrees that M P's can Smoke during Meetings of Committees she Attends. Miss Agnes McPhail is Progressive member for South East Grey when attending a caucus or committee Meeting, rather than the only lady member of Parliament. And because Miss McPhail insists on recognition of that fact the comfort of mere male members of committee who like to smoke during their committee work, is not interfered with.

When one morning last session, Miss McPhail appeared in the committee on Banking & Commerce some of the members began tucking pipes and cigars away, but seeing the Progressives still smoking brought them out again after a few minutes. Subsequently the Progressives explained that in caucus Miss McPhail insisted on being regarded as an ordinary member, for whom the rest would not think of putting their pipes away when she entered the committee room.

BLYTH'S CORNERS

Our mail courier, Mr. Finnigan, was the subject of much sympathy this Tuesday afternoon, plodding his way along the heavy roads and facing the bitterly cold stormy weather for a drive of over 7 miles. When the roads become heavy and the weather more or less stormy, we think all rural mail couriers would be justified in starting earlier to deliver the mail, which would, of course, necessitate the mail being one day later, but what of it for a month or two? Try it a crack Jim, we'll shoulder the blame.

As announced in the Review, the U F O held an open meeting on Friday evening last to hear a discussion on Hydro by two Government experts who proved to be reasonable speakers thoroughly conversant on their subject and convincing on their arguments. Briefly speaking the Gov't will undertake to supply Hydro along any Highway, providing there are 3 subscribers to the mile. One of the speakers very ably showed that subscribers in a rural district, by co-operating with the Gov't, can greatly assist in keeping the cost of the line down by supplying poles, hauling and digging the holes, etc. Poles now 30 ft long with 6 in. top, are costing Gov't \$19 each laid down at the hole, while farmers co-operating in many instances, supplied them at half that cost.

The Gov't asks no credit, they pay \$3 per day for a man and \$5 per day for man and team. Subscribers have to put in their own poles from the road to their buildings and do their own wiring subject to inspection by a motor sufficient for lighting would cost about \$19 a year. A five horse power motor would develop as much power as a 7 or in some cases 10 horse power gasoline engine. For silo filling on a big scale or for thrashing, motor for every dollar he would be required. Asked as to the wear of a motor, the speaker, himself an engineer, said a motor in a smelting furnace over which he was overseer, showed signs of wear but only the roller bearings mostly, after running 22 1/2 hours for 14 years.

The speaker told of two farmers using Hydro, giving full details down to the minutest point what they did, the hours, the work, the power etc. One of these farmers, who farmed on a large scale, using his motor for everything said for every dollar he had invested, he got back \$2.50. The other farmer on a smaller scale said \$1.50 for every \$ invested.

That Hydro is fast becoming a popular power, one may safely judge from the fact that notwithstanding the full cause during the war, 84 municipalities are now using it in the province. Previous to speaking a half hour in amusement by way of moving pictures comic as well as instructive, were given which was enjoyed and appreciated by the fairly large and orderly crowd present. A committee of three was appointed, namely, Messrs Jas Blyth, Norman Kerr and Julius Keller to push Hydro if public opinion so desired and encourage it. A hearty vote of thanks was tendered the speakers at the close for their able and plain explanation of Hydro power and its workings. In the absence of Mr Earl Mead, U F O President, through sickness, your humble scribe occupied the chair—don't tell anybody.

There is a permanent job in each case for a good man.

MECHANICS WANTED

J. R. Eaton & Sons, Limited, of Orillia, have openings for one each of the following:

Dry Kiln Operator (one with good experience on Grand Rapids Kiln preferred.)

Resaw Operator (no filing.)
