The melted snow runs through a hose to below the foundations of the City of Jerusahem. Within the heart of the Hill of Ophil these diggers after truth believe they will find the story of a civilization more primitive than Egypt's, but infinitely more precious

> The ancient lie that science is the natural foe of religion has been cast in the teeth of the scoffers very notably by that science which deals with buried civilizations. Year after year searchers in waste places have dug up evidence that the Bible is one of the most accurate historical works known to all literature. Lately the name of Nebuchadnezzar has been found upon a temple in Babylon, a ruin more than a thousand years old in his day, which he repaired and

restored. Many of the archeological treasures unearthed thus far have been in indirect confirmation of Biblical history, dealing with matters expedition to Jerusalem will seek direct, contemporary verification. To

National Conference on

Registrations of delegates are beginning to pour in from all parts of Canada for the big National Conference on Education to be held in Toronto during Easter week. From the far-away Province of Prince Edward Island delegates have already enrolled. Coming, as this conference does, during the same week as the Ontario Educational Association, it will bring together the greatest group of people genuinely interested in education that has ever assembled in the history of Canada, General C. H. Mitchell, who is sending out the invitations, reports that many organizations are asking permission to send three or four times as many delegates as were originally assigned to them.

Many Applications from Farmers for Helpers Under New Immigration Scheme.

A decratch from London says: - negotiated debt funding agreement Westward passenger travel to Canada was made on Thursday at the New is twice as great as this time last York Federal Reserve Bank. year. The increase is mainly in the third class, of whom 1,000 sailed in January as compared with 400 in the same month last year. What really counts in the way of immigration, however, is the spring movement.

Canadian immigration officials here say that proliminary discussions with the Imperial authorities indicate that if the Government's new immigration policy is approved by Parliament it will be possible to bring the first assisted settlers over in May. A considerable number will thus arrive in the Dominion in time to be of use for this year's crop. The C.P.R. has over 1,000 applica-

tions already from Canadian farmers wh are willing to engage help under the railway's new immigration scheme. In connection with the applications for female help a number of farmers have intimated that if the girls make good they are willing to marry them at the end of the year. This inducement, however, is not being mentioned by the railway officials | A. S. Brown, of Kingsville, President in their appeal for this class of immi- of the Lake Erie Fishermen's Associagrant.
