some of them.

Quack remedies and academic theories beset her path on every side. Some suggest that our debt worries can best be eased by going further into debt. Others preach blue ruin, decry their own country and indulge in mischievous propaganda generally, while still others look for a new social order or some miraculous sign to indicate a better coming day-all this in apparent forgetfulness of the fact that just as there was no royal road to win the war, there is now no royal road to pay for it or regain our

former buoyancy, vigor and confidence. Some are leaving Canada hoping to escape taxation, only to find there is no escape anywhere. In seeking for easy remedies too many of us overlook the fact that the greatest remedy is honest, hard work faithfully and

panied by old-fashioned thrift. It takes time, it takes patience, it takes grit. But every Canadian knows in his heart that Canada

intelligently performed, accom-

is coming through all right.

Our Experience Proves It

Look back over the path Canada has trod. The French Colonists, cut off from civilization by 3,000 miles of sea, faced a continenta wilderness-without the aid of even a blazed trail. They had to fight savages, frosts, scurvy,

loneliness and starvation. The United Empire Loyalists subdued an unbroken forest in one generation, growing their first wheat amid the stumps and

snags of the new clearing. The Selkirk settlers came to Manitoba when the prairie was a buffalo pasture, and grew wheat where none had grown before and where those who knew the country best at that cime said wheat would never grow. Today the Canadian prairies grow

the finest wheat in the world. In proportion to population Canada stands to-day among the wealthiest nations in the world, with average savings on deposit per family of \$800. Canada's foreign trade per head of population stands amongst the highest of the commercial nations, being \$192 per capita in 1922-23, as compared with \$135 in 1913-14, the

"peak" year before the war. New Opportunities for

Canada In Canada, although prices in the world markets fell below war level, our farmers reaped last autumn the largest grain crop in Canadian history, and Canada became the world's largest exporter of wheat, thus in

large measure making up for lower prices. Last year, Great Britain, after an agitation extending over thirty years, removed the embargo on Canadian cattle, and a profitable and practically

unlimited trade is opening up for Canadian stockers and feeders. "The 20th Century belongs to

Canada"-if Canadians keep faith. The next article will suggest practical opportunities for profit making

on our Canadian farms.
