ORCHARD

Here we are again after a long quietness, due to being busy. Well the excessive heat of two weeks ago, was certainly dampened last week, but the cool wave seems to have passed on again and the days are becoming quite hot.

Election excitement is almost at an end for this time, though we still hear some heated arguments over political affairs. However as one of our chief enemies is "self-centredness" probably we will yet be led to see that a change was better, if for nothing else than to keep the government from becoming "self-centred".

The Football schedule has been completed but on account of a tie between Holstein and Midway, another game will be necessary to decide the winner of the district. This will likely be a splendid game and we hope the luck favors the right way.

How to Make Red or Black Currant Jelly. Crush well about 3 1/2 lbs. ripe fruit, add 1 cup water, stir until boiling, cover pan and simmer 10 minutes. Place in jelly bag and squeeze out juice. Measure 4 1/2 cups juice into large saucapan. Measure 7 1/2 level cups (3 1/2 lbs.) sugar in separate pan. Bring juice just to boil, and begin to add sugar slowly, with constant stirring, taking about 5 minutes to add sugar, keeping juice nearly at boil. Then bring to boil, and at once add 1/2 bottle (scant 1/2 cup) Certo, stirring constantly, and bring again to a full boil, for 1/2 minute. Remove from fire, let stand 1 minute, skim and pour quickly.

The Duty of Fire Prevention

Carelessness with cigarette butts, cigar ends, matches, pipe ashes, camp fires, fly smudges, railway locomotives, slash-burning operations—human carelessness of some kind accounts for over 95% of the forest fires in Ontario. It is impossible to say how many fires along railway lines are not due to engine sparks, but to the thoughtless smoker tossing away his cigarette or cigar butt. However, there is no doubt a fair number of forest fires originate in this way, and such are preventable. Each individual should realize his personal responsibility to be careful with fire in any form in northern Ontario.

Save Ontario's Forests

The Ontario fire ranger is at the mercy of all types of carelessness, and cannot prevent fires starting, as a rule. He can only attempt to limit the consequences. He is entitled to your help and co-operation by being careful with fire.

Canadian National Railway's Solid Steel Press Special.

This magnificent train was that which carried delegates to the annual convention of the Canadian Weekly Newspapers' Association, through the Maritime Provinces and back to Toronto. It was composed of the best equipment which the Canadian National Railway could furnish. There were seven standard sleepers of the latest design, two modern diners with special crews, a specially equipped baggage car, a tourist car for the use of the train crew and a locomotive engine of the transcontinental type. From start to finish the train was of solid steel construction and excited much interest and admiration among the delegates and at all points visited. The special was the longest all steel passenger train ever run over the Atlantic division of any Canadian railroad. The sleeping cars were similar to those used on the transcontinental run of the Canadian National Railway and they found much favor among the 200 passengers on board, all of whom expressed themselves as being astonished at the accommodation, comfort and conveniences which these sleeping cars provided. The dining cars found similar favor in the eyes of the passengers and, in fact, the whole train from the engine to the last car was the subject of many compliments from accompanying delegates were the following members of the Canadian National Railway staff: C. K. Howard, General Tourist Agent, Montreal; F. W. Robertson, General Passenger Agent, Moncton; A. E. Agent, Halifax; F. L. Dougan, Travelling Passenger Agent, Moncton and G. H. Lash, Publicity Representative, Montreal.
