WHO IS SHE?

Widespread interest and comment is being caused throughout Canada by the amazing life story of "The Wonderful Heroine" in the Family Herald and Weekly Star of Montreal. The heroine of the story is a remarkably beautiful young woman of romantic and tragic history, whose picture in colors is being given free to the subscribers of the Family Herald and Weekly Star. When one considers that the subscription price of this big 72 page family and farm journal is only \$2.00 per year, one is amazed by the value received, but with a magnificent picture thrown in, the value is indeed superlative.

the church in the Orient, and is very much impressed with the development of India and especially of China. The regular meeting of the Holstein Branch of Women's Institute was held at the home of Mrs L. B. Nicholson on Thursday, Oct. 18th. 44 ladies were present. Our President, Mrs. F. McLean was in the chair and after a lengthy business discussion, Mr. W. J. Sharpe gave a splendid talk on "Pioneer Days" which touched the hearts of many, especially the older members and we all owe our sincerest appreciation to Mr. Sharpe for taking so much trouble in helping us on these valuable talks. Another bright feature of the afternoon was a presentation to our President, Mrs. McLean, (nee Miss Reta Rogers). After a few pity remarks by Mrs. Rife, Mrs. W. A. Reid presented a box of silver which was much appreciated by the recipient. Five minutes were then given to physical exercise and all partook of a dainty lunch and with a hearty vote of thanks to the hostess hurried home, carrying with them pleasant memories of a happy afternoon. The next meeting will be held at the home of Mrs. T. McMillan.

YEOVIL

Our woods are stripped of their radiance and many trees stand in naked grandeur. The faded leaves have fallen, hurried by the strong winds of Friday and Saturday. Once more we are reminded of the prophet Isaiah's words, "We all do fade as a leaf." May it be a mellowing, beautifying developing of character.

What might have resulted in a disastrous fire originated in the burning of Mrs. McLaughlin's chimney last Saturday morning, when some sparks ignited the shingles. Fortunately it was immediately noticed and thanks to the telephones and cars, neighbors hurried there in time to extinguish the fire, although the roof was damaged. Such a strong wind was blowing that had it got past control, nearly all Yevovil might have been burned.

A Prosperous Rural Community.

That rural communities are much richer than the average person imagines is evidenced by the amount on deposit in the Home Bank at Alliston. Alliston is a town served by two banks. Upwards of \$400,000 was on deposit in the Home Bank when that institution suspended business. It is not known how much the other Alliston bank has, but it is probable that there is on deposit in this Simcoe village about \$750,000 or three-quarters of a million. It is an interesting speculation as to how other places would compare with this.—Ez.

We attended the meeting in Holstein on Friday evening last called for the purpose of re-organizing the Farmers' Shipping organization. Mr. Wm. Hunter occupied the chair and Mr. Neil Calder acted as Secretary for the meeting. A plump of 50 or more farmers were present and the meeting throughout was very business like and harmonious.

Mr. McMillan of Seaforth was present and showed very conclusively the great advantages of farmers combining together and shipping co-operatively. That the large packing houses are very persistent in trying to dishearten the system of selling co-operatively, one may safely surmise from the fact that time and again they have paid often 50 cents and occasionally as high as 75 cents per ewt. out of their pockets to drovers shipping against the co-operative shipper.

Mr. McMillan showed very clearly that through the co-operative system of selling on the open market, there was not a farmer in Ontario but what was a gainer by dollars through the loyalty of many farmers who were wise enough to see that the market would warrant, was simply a "red herring across their eyes" with the hope of getting it back double or more if they could only succeed in commanding the whole trade.

The speaker made a very earnest plea for the farmers to be alive and loyal in holding up the co-operative system of selling, as they were only making a whip for their own back by putting themselves in the hands of the packers. At the close of the speaker's address, a motion was moved and carried that we organize. Mr. Wm. Hunter was elected President and Mr. Neil Calder, Secy. Treasurer, 8 or 9 directors were elected, including your humble scribe and Mr. Andrew Hunter was chosen as shipper. Mr. Hunter did not definitely accept but it is hoped he will see his way clear to do so. Tuesday of each week was decided as a good shipping day as Mr. McMillan showed Mondays were often slotted as the packers send out word to the drovers to hustle in as the market is brisk and as a result they make a pull when the other fellow can't help himself. As Holstein is a good shipping centre, let the farmers rally round the flag.

P. S. Curriculum to be Revised

A revision of the Public School curriculum is being undertaken by Dr. F. W. Merchant and officials of the Department of Education at the instance of Premier Ferguson, in the capacity of Minister of Education. The Premier and the officials have exchanged ideas along certain lines and now a report and suggested curriculum is in process for submission to the Premier. Primarily the aim of the Minister and the Department is to curtail the number of subjects which it is obligatory upon public school pupils to study. The essentials, of course, are to remain obligatory, but the Premier's view, which has been worked out on paper with a view of giving it still further consideration, is that there are branches of the public school work which can be regarded as non-essentials, the imposition of which are burdensome and detract from the abilities of the young child to get a thorough grounding in essentials. Hygiene and nature study are said to be among the items regarded as non-essentials.—Telescope.

Bank of Montreal's Final Crop Report

The final crop report of the Bank of Montreal for the season, summing up the result obtained in the various provinces of the Dominion, makes encouraging reading. It shows that despite lateness of the season, yields were not so much as to be considered as satisfactory but have been harvested in nearly all districts throughout the Dominion. The Prairie Provinces as a whole show increases of all kinds of grains as compared with last year. Estimates based upon Dominion Bureau statistics give the yield of wheat as 445,000,000 bushels as compared with 375,000,000 bushels last year and with 360,187,000 in the banner year of 1915. The yield of wheat, oats and barley is placed at 550,980,000 bushels, an increase compared with last year of no less than 232,464,000 bushels. Low grades in Manitoba are balanced by higher grades in Alberta, and so far high grades in the wheat inspected in Ontario's crops generally are lower than the record breaking crops of 1922 but returns are good. In Quebec the farmers have had a good year, on the Maritime Provinces returns on the whole average up well. In British Columbia returns generally are better than last year.

HUSKY PUPS BORN AT CHATEAU FRONTENAC

1 and 2—"Over the Top." 3—"Makwathie." 4—"Nerik" was born in April and is considered the most promising of the litter. It will be seen that wolf blood runs strong in his veins.

THE Hudson Bay dog team which has been such a popular feature in connection with the winter sports activities inaugurated by the Chateau Frontenac at Quebec three years ago, shows promise of future teams of exceptional merit. Two very fine litters have been produced. On the morning of April 15th, the Indian who is taking care of them was delighted to find that Wobeska, a beautiful white female husky, had presented as her contribution to Quebec winter sports, three pups which very much resemble wolf whelps. One very fine pup developed rapidly and was named Nerik. Wobeska was jealous of the attention shown the family of her team mate and, not to be outdone, presented the Indian with a litter of eight. Great hopes are entertained for the future of this litter as wolf blood runs strongly in the veins of Makwathie, the sire, a splendid beast of some 100 lbs. with shaggy grey coat, long vulpine muzzle, pointed ears and pale amber eyes glistening through narrow

slits. Makwathie was born in the wilderness north of Lake Superior. The Indian is already making plans for the training of this last litter and expects to have them partly broken in before the first snow. This is usually done by taking a trained leader and placing her in harness with the pups. At first, traces are attached to a light birch log and the initial try out usually results in a wild scramble, the pups going in various directions with the leader turning around with a puzzled look as much as to say "what's it all about." The tangle is straightened out to the accompaniment of a chorus of yelps but gradually the young ones come to understand what is expected of them, and as the team becomes more proficient the weight of the log is increased. By the time a sleigh can be used they are able to draw heavy loads. In the North Country they can draw with ease on a broken trail a hundred pounds per doz.
