### BIG PRINCE AND LITTLE ELEPHANT

There is no more confiding an amusing young animal than a baby elephant. Indeed, says Mr. Charles Mayer, it is "laughter on four legs." One that he captured was part of a herd rounded up for the Malay sultan of Trengganu. It belonged to its captor, for the smaller elephants were to be his payment for obtaining the large ones for the sultan.

The sultan's brother and prime minister, who was known as the Tunku Besar, or Big Prince, had journeyed into the jungle to see the captive elephants while they were yet wild; he did not actually join the round-up, because if he joined it he would have had to ride one of the tame elephants, and, riding elephant-back always made him extremely seasick.

"You had better change your mind and come along," Mr. Mayer called down to him as they were starting off. "If I rode on an elephant," he answered, "I couldnn't eat for a month."

"True," admitted Mr. Mayer; "the first time I rode one was in a circus procession. I sat in a beautiful howdah. I was so sick a circus lady had to hold my head. The crowd thought ft was a love scene!"

"There is no circus lady here," said the Big Prince firmly. "I shall not

He did not. But he was eagerly on hand for the triumphal return of the hunters and for the festivities in their honor and was eager to see the haul.

He was a heavy man, continues Mr. Mayer, and not particularly active. It was impossible for him to walk the distance; so I had two swinging chairs made. He seated himself on one of them, and I sat on the other. The men between the poles moved quickly and Variations-Brody, Brothle. easily. When we reached the tied Racial-Scottish. elephants the Tunku was amazed at Source-A locality, or place name. the number of animals captured. He got off his chair and offered one of fruit greedily. Then he called for the boiled rice and held it out in the palm of his hand. The little elephant seemed to find the new food delicious, and stronghold. the Big Prince was as happy as a

"Look!" he cried. "It thinks I also am an elephant. It trusts me."

Perhaps, but its mother did not. She tish. sounded the note of warning to her young one. It paid not the least attention.

The little elephant fascinated the Tunku. He insisted on taking the first steps toward weaning it. He had brought condensed milk, which he put into a pail and mixed with warm water. He dipped the baby's trunk into it and then tucked the trunk into its owner's mouth. The little elephant sucked up the liquid, but instead of drinking it blew through its trunk and threw milk all over the prince. Fortunately, he had taken off his baju and stood dressed only in his sarong and loose Chinese trousers. "Look!" he

cried. "It thinks I also have a hide!" In a final interview with the sultan ground. after delivering his share of the prizes -there were in all three full-grown males, nine females and four youngsters, including the baby-Mr. Mayer asked permission as a tribute to the Tunku Besar's interest in his work to present him with that engaging infant. The Big Prince must have prepared the sultan's mind on the subject, for

witched him. Give it to him." The outcome was that the jungle baby, when it had been successfully weaned, spent about half its time on the verandah of the Tunku's house. It would run up and down the steps, Sask, writes: -"I have used Baby's giving its little squeal of pleasure. It Own Tablets with great success for followed the prince about. He played four years and always keep a box on with it by the hour. He even allowed hand." Thousands of other mothers it to go into the house; but the baby say the same thing-once they have has probably outgrown that privilege used the Tablets for their little ones

# Eyes for the Blind.

Marvelous strides toward helping the blind were made during the war, but a recent English invention promises to exceed almost all of them. Every one is familiar with the books made especially for the blind by the Braillie method, n which the letters are raised or indented by means of a sharp instrument. It is a slow and laborious process at best, and the supply of Braillie books is necessarily limited by the expense of the output and because Braillie letters wear down

into unintelligibility. But now comes the optophone, a machine which makes available to the blind all kinds of typewritten matter and even newspapers. It depends not upon the sense of touch, as do the Braillie books, but upon the sense of hearing, a faculty that is usually keenly developed in all blind persons. Only a few lessons are needed for the blind user of the optophone to learn the sys-

# Dogs Used for Fishing.

Fishing with dogs is a sport many headaches, or breathlessness, with palpeople have never heard of, yet it is pitation of the heart, poor appetite popular in some parts of the British Isles, chiefly on the north coast of

most always poor blood. If you have During the autumn, conger-eels are nervous headaches, neuralgia, sciatica and other nerve pains, the cause is exvery abundant there. They lie off the hausted nerves. But run down nerves coast beyond the low-water line, where are also a result of poor blood, so that the spring-tides, at this period of the the two chief causes of illness are one year, leave exposed a vast expanse of mud. The conger-hunters take advant-If your health is poor; if you are age of this to pursue their sport. Wearpale, nervous or dyspeptic, you should ing wading-boots, and armed with a give Dr. Williams' Pink Pills a fair thick stick some six feet long, one end trial. These pills act directly on the of which is sharpened after the fashion of a chisel, they set out, accompanied by a motley collection of dogs.

Boulders and large stones are turned over to lay bare the lair of the eels, the long sticks being used to stir up the mud. The eels then start to wriggle; this excites the dogs, who seize them as firmly as possible. It is no easy matter, however, for an angry eel is a ticklish, slippery customer, with more strength than one might credit. But the dogs soon become quite ex-

pert at their job. Having got a firm hold of an eel, they will stick to it until the hunter helps them to "land" it. The conger-eel weighs anything from five to nine pounds, and even larger ones are sometimes caught. A lucky hunt will result in some five or six congers, but no matter what the "bag," this method of fishing with

dogs will afford exciting sport. Ask for Minard's and take no other.
