

STORIES OF WELL-KNOWN PEOPLE

Royalty to the Rescue.

The rescue of a drowning sailor by King Christian of Denmark, near Copenhagen recently, recalls an earlier incident of which this deservedly popular monarch was the hero.

While cruising off the Danish coast in the Royal yacht the King heard the sound of firearms.

Cutting quickly through the water, the yacht came up with a spectacle more suggestive of the days when piracy was still a fairly respectable profession than of the twentieth century. From the deck of a steamer a number of men were firing on a rowing boat.

As the yacht approached, a girl jumped out of the rowing-boat into the sea. Quickly a motor-launch was lowered from the Royal yacht, and the drowning fair one was hauled aboard this by his Majesty in person.

It was at this point that the King observed another boat in the offing with a large camera aboard, and discovered that he had provided the movies with a right royal thrill.

In Everybody's Memory.

Here is a delightful story about Sir John Foster Fraser, whose career has included many amusing episodes, but not many more amusing than those of this incident which happened in a large provincial town.

Sir John was due to give a lecture, but the local mayor had to have his little say first.

"Ladies and gentlemen," he said, "the lecturer we are about to listen to tonight is a gentleman whose name is known in every quarter of the globe. Amid the frozen deserts of Siberia, the high tops of the Himalayas, the grim regions of Tibet—there is, in his own words, a fair and a just, north, south, east, or west, where his name is not known and respected. Ladies and gentlemen, I have much pleasure in introducing to you Mr.—er—Mr.—er—Mr. John Foster."

Lord Renfrew.

The Prince of Wales likes traveling "like any other Johnnie," and sometimes carries his seal to surprising lengths. A train-traveler was surprised not long ago to find himself in the company of the Prince at luncheon, the Prince insisting that the end on the man regarding himself as his guest; and, if the story of a certain Canadian immigration officer is true, the Prince filled in the information form at Quebec with all the serious precision of a traveler whose confession album was really required by the authorities. As "Lord Renfrew"—his nom-de-voage—answered the following questions:

Present occupation?—Nothing. Future occupation?—Nothing. Purpose of coming to Canada?—To enjoy myself.

Amount of cash?—Enough for my present needs.

Can you read?—Yes.

What language?—Some five of them. The answers were quite satisfactory, and he was allowed to proceed on his way.

Before Winter.

September, October and November. They are fearless, they are the smolder of leaves in the ditches.

With tongues of flame and fire they utter words of autumn prayer. Let you, my neighbor, and I, go through the silence of the tented evening corn.

Let us light a fire at the edge of the fields and the woodside, and let us stand round it watching the leap of the shadows.

Saying over and over to ourselves, "This is our mother, our sky mother autumn."

Who brings shadows and death all about us,

Who fills our hearts with the glory of dying,

And soothes us with the promise of snow.

We trust our hands into the memory of the night.

And grasping the hands of our earth fathers, earth mothers,

They who were loyal,

We stand till the last flare and flicker yields to the darkness,

And the darkness is peace.

—F. R. McCreary.

Took Them Cooked.

A vegetarian had an amusing experience the other morning at breakfast. His family was out of town, so he went to a restaurant and took a seat next to a stranger. The vegetarian took occasion to advertise his creed by telling the stranger all meat was injurious, and that the human diet should be strictly vegetarian.

"But," replied the stranger, "I seldom eat meat." "You just ordered eggs," said the vegetarian. "An egg is practically meat," the kind of eggs—stranger quietly answered the stranger, "Good gracious," cried the vegetarian, "what kind of eggs do you eat?" "Principally boiled eggs, sir."

Birds of remote regions, tropic and arctic, accommodate come to our doors every spring and autumn.

A fat person's bitterest foe is a sweet tooth.

Surnames and Their Origin

BATES
Variations—Beatty, Batson, Betson.
Racial Origin—English.
Source—A given name.

The following family names are all developments of the given name of Bartholomew, a name the sound and unusual spelling of which just naturally lent itself to violent variations from the original form, particularly when it is remembered that in the Middle Ages the individual writer came pretty near to spelling as he pleased.

As a given name Bartholomew is of Hebrew origin. Like other Biblical names, it was widespread in medieval England, where the Anglo-Saxon trend toward short forms of names, however, brought it down to the popular form of "Bat."

As the family name developed from it it took the various forms of "Batson," "Beatson," "Bateson," "Beatson," etc.

The dropings of the ending "son" from "Beatson" left Beatty or Beatty and "Beatson" minus the "on" became Bates. The variation Bateson is due undoubtedly to a change in spelling after it had become a family name. Were it not for the fact that the woman's name "Betty" is a comparative modern derivation from Elizabeth, and did not take place until after the period in which family names were formed, there might be grounds for the belief that in some instances at least, Bateson is a development of "Betty's son."

It is interesting to note some of the variations of the given name of Bartholomew, for they show the widest dissimilarity in form. In German appear the forms Bartold and Mewes; in Bavarian, Bartelme, Wavel, Wabel and Wabm; in Russian, Vartolomei.

TO ENGLAND IN A MINUTE!

In spite of the rapid strides made by wireless, the undersea system of sending message from one country to another is more popular to-day than it has ever been, a fact which is emphasized by the laying of what is now the largest cable in the world, running from West-super-Mare, England, to Far Rockaway, Long Island, U.S.A.

More than 1,500,000 pounds of gutta-percha, 4,000,000 pounds of copper, and 80,000 miles of iron and steel wire were used in the construction of this mammoth cable, which will be capable of transmitting hundreds of words from the Old World to the New in less than a minute.

The cable system was the outcome of the genius of both British and American telegraph engineers, who joined forces at a very early stage by way of giving effect to their ideas. The first satisfactory cable was laid between the South Foreland and Sangatte seventy-two years ago.

A Battle Against Odds.

Behind the laying of the first Atlantic cable, projected sixty-seven years ago, there is a stirring story of indomitable perseverance and battle against odds.

Two warships, one British and one American, were lent for the purpose of laying the cable, which snapped every three miles had been paid out. As a result, 700 miles of new cable had to be made, and the attempt was renewed the following year. Scarcely had the operations begun when the cable broke again. The ends were spliced, after a delay of several days, and the task continued, only to be interrupted by yet another break.

Finally the cable was properly bedded.

ded. Once again, however, the Pates stepped in, this time so effectively that the project was abandoned. The chief electrician ruined the cable by working it with too high a power!

250,000 Miles of Cables.

It was not until ten years had elapsed that further efforts were made to link England and America by cable, the work being carried out by the Great Eastern. Over a thousand miles of cable were laid; then a snap occurred, all attempts at picking up the lost cable being futile. Subsequently another cable was laid, the older cable afterwards being located and spliced. By the end of the seventies four cables were operating between the two countries, the total length of cable in use at the present time being over 250,000 miles.

The network of cables linking up the continents is now so complicated that ships are constantly employed in surveying the different systems, locating faults and remedying them. Each ship carries a staff of electricians and telegraphists, and their voyages occupy from two months to a year or more.

One of the commonest causes of damage to cables is corrosion, brought about by the action of the sea. Chafing is another potent cause of trouble, instances having been recorded in which a cable has been worn clean through in a few months.

Breakdown Through a Whale.

Submarine upheavals frequently cause interruption of the services; while up to within a few years ago a little creature known as the boring worm did considerable damage to cables. Hundreds of miles of cable were destroyed by the pest, which is now combated by covering the core with brass tape. Fish also cause breakdowns by biting into the cable and upsetting the insulation. In the Eastern Telegraph Company's offices the writer was shown sections of cable in which were firmly embedded

Self-Adjusting Wrench a Success.

One of the handiest Yankee tools yet devised is a self-adjusting wrench that is able to grip small nuts or large ones, and even set and hold pipe up to one and one-quarter inches in diameter. The new wrench has a curious, movable jaw at one end of the handle, the holding face being attached by two claws or links of different lengths. These claws are connected by a stout spring. Once it has gripped the bolt or nut, the harder you turn the wrench the tighter it holds. Yet it releases instantly when the pressure is put the reverse way.

Site of "Ivanhoe" Opened to Public.

Temple Newsum, which was opened to the public of Leeds recently, has been called the "Hampton Court of the North," and it must certainly rank as a serious rival of the ancient pile in the outskirts of London, which was built by Cardinal Wolsey and refitted by Henry VIII.—"For his own darling, Anne Boleyn."

Its books, pictures and antique furnishings are worth a fortune and are now the property of the Corporation of Leeds, which body obtained the mansion on very generous terms from Hon. Edward Wood, Minister of Education, the latter having to relinquish the estate owing to the great burden of post-war taxation, says a London despatch. There is a herd of cattle in the park belonging to the corporation, and a scheme is on foot to establish a model municipal dairy farm there.

Not every lover of "Ivanhoe" knows that many of the stirring incidents in that romance take place in the courtyard of Temple Newsum. Sir Walter Scott visited the historic Jacobean mansion and was so impressed with its perfect environment for a story that he took Temple Newsum for the locale of the chief scenes of "Ivanhoe," the name becoming "Templestow."

The mansion fitted in exactly because it received its real name from the fact that it had originally been the site of an ancient priory of the Knights Templar.

WORK-WORN WOMEN

Care of Home and Children Often Causes a Breakdown.

The woman at home, deep in household duties and the cares of motherhood, needs occasional help to keep her in good health. The demands upon a mother's health are many and severe. Her own health trials and her children's welfare exact heavy tolls, while hurried meals, broken rest and much indoor living tend to weaken her. No wonder the woman at home is often indisposed through weakness, headaches, backaches and nervousness. Too many women accept these visitations as a part of the lot of motherhood. But many and varied as her health troubles are, the cause is simple and relief at hand. When well, it is the woman's good blood that keeps her well; when ill she must make her blood rich to renew her health. The nursing mother more than any other woman needs rich blood and plenty of it. There is one way to get this good blood so necessary to health, and that is through the use of Dr. Williams' Pink Pills. These enrich the blood, and through their use many weak, ailing women and mothers have been benefited. If you are ailing, easily tired or depressed, it is a duty you owe yourself and your family to give Dr. Williams' Pink Pills a fair trial.

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Broken Bowl.

One of the most extraordinary cases of what may be called an accidental invention is that of the lifeboat. A man named Wouldhave was out walking one day when he was asked by an old woman to help her lift a can of water which she had used by means of a broken wooden bowl.

The bowl was floating on the surface of the water, and as he talked to the woman, Wouldhave turned it over with his finger. It immediately righted itself. Amused by its antics, he repeated the performance; then it struck him that he had made a wonderful discovery. The result of his chance meeting was the self-righting lifeboat, which was designed by him on the lines of the wooden bowl.

What he had discovered was that anything made of floating material and shaped like one half of a basin could float. Only with its convex surface downwards. A boat made on these lines cannot remain upside down for more than an instant when it is turned over by a heavy sea.

MONEY ORDERS.

Pay your out-of-town accounts by Dominion Express Money Order. Five Dollars costs three cents.

A Wonderful Invention.

A lady employed a very ignorant servant, who would not rise in the morning at a sufficiently early hour, so an alarm clock was bought and presented to the girl, with the words: "You know, Mary, that I require the fire alight every morning by seven o'clock; but I cannot get you to do it, so I have bought you this alarm clock."

Mary examined it, and said: "Thank you, mum; it's very nice. But fancy a thing like this being able to light a fire; sure it's a wonderful invention, mum!"

It's always a pity when the people who quarrel over trifles haven't something worthy of their talents.

Wisdom begins when foolishness is asked.

Asked for Minard's and take no other.

THE FALL WEATHER HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day it is warm and bright and the next wet and cold. These sudden changes bring on colds, cramps and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

For the Canadian Mother.

It is a matter of interest to note the relative esteem in which Canadians hold increases of Canadian population by immigration and increase by natural processes. Although everywhere its service is given to the principle of healthy increase of Canadian population by natural processes we find, if we consider our position frankly and from a detached viewpoint, that we are actually bending more effort to attract outsiders to our country than to the more important duty of making it possible for our own Canadian families to increase in healthy normality. Federal appropriations for the promotion of immigration projects are a great deal larger than the combined provincial appropriations for the conservation of health—a fact, for which no one but the people of Canada themselves are to blame.

Important as our immigration problems are, it is undoubtedly more important that our problems of maternal and infant welfare be given full, immediate, and continuous attention. In the first place, we find that our maternal death rate, although lower than that of the United States, is higher than that of England and Wales, higher than that of Norway, higher than that of a good number of countries which have given serious thought to the welfare of their citizen mothers. Our Canadian maternal deaths for 1922 were more in number than similar deaths for 1921. And the tragic, yet hopeful, feature of the situation is that a large percentage of these deaths—a great deal more than half of them—were preventable. Scientific knowledge has progressed to an advanced point, so that it is now possible to say, "If men and women are given the information easily available, and if there is careful supervision during pregnancy, and proper attention during and after delivery, the maternal death rate of any country will diminish almost to the vanishing point."

Our problem in this generation, then, has become one of disseminating knowledge, of insisting on the observance of the simple yet vital rules of hygiene, and of providing adequate care of the expectant mother and of the mother who has already given birth to a child. If there were to develop a strong popular demand that these necessary conditions be met, we should soon discover that our Provincial Departments of Health could extend their activities so as to reach each most ignorant and helpless parent in our crowded cities, and each most remote and fearful mother in isolated rural districts.

What has been done already? The Federal Department of Health at Ottawa has prepared a booklet for mothers, available to any parent who wishes information. It describes simply and briefly the important things which every expectant mother should do. It tells also how to care for a very young infant. A whole

THE CHILDREN'S COUGH REMEDY

MINTINE
Sole Agents: Harold F. Ritchie & Co., Limited, Toronto

Mrs. Dyer Fell Off to 72 Lbs; Gains 33 on Tanlac

"For nearly seven years," recently said Mrs. Katie Dyer, of 27 Railway St., Hamilton, Ont., "I had suffered from a complication of troubles peculiar to women, and finally my strength all left me and I broke down completely.

"When I began taking Tanlac I only weighed seventy-two pounds, and had been so weak and nervous for nearly two months that I had to be assisted from my bed to my chair.

Many times I could not even retain broth and toast on my stomach and restful sleep would not come to me.

"Neither myself or my friends thought I would ever get well, but I am now feeling as fine as I ever did in my life and am weighing one hundred and five pounds, which makes me heavier than I ever was before. I can never praise Tanlac enough."

Tanlac is for sale by all good druggists. Accept no substitute.

series of booklets for mothers and fathers is prepared for distribution in this department, and these publications have been sent to thousands of homes.

But the provinces have a heavier responsibility in the matter of health. What are some of the plans they are following for the reduction of maternal deaths?

Some are increasing the numbers of their public health nurses. Others are establishing small hospitals in various localities where mothers may receive adequate care; Saskatchewan is training nursing housekeepers who will enter rural homes and take efficient charge of the whole family while the mother regains her strength. The Red Cross and the Victorian Order of Nurses are saving the life and health of many mothers annually. These are good beginnings.

But yet we are losing about five mothers out of every thousand who give birth to a child, and for no reason at all except that our mothers have not been taught to observe simple health rules, or they have not received proper care before, during and after delivery. The remedy lies in our own hands. It is to be found in a demand for increased appropriations for health work by provincial governments and a determination to keep on extending government and voluntary maternity welfare schemes until every family in Canada is within reach of proper help.

Norway has reduced her maternal mortality from 8 per 1,000 to 2.3 per 1,000. Canada can reduce her maternal mortality from 5 per 1,000 to 2 per 1,000 if Canadians insist on it.

MOTHER OF TWIN BOYS

Tells How Lydia E. Pinkham's Vegetable Compound Relieved Her of Inflammation and Great Weakness

West St. John, N. B.—"I was in a general run-down condition following the birth of my twin boys. I had a great deal of inflammation, with pains and weakness. Finally my doctor recommended Lydia E. Pinkham's Vegetable Compound. He said that your medicine would be the only thing to build me up. I am sure he is right, for I am feeling much better and am gaining in weight, having gone down to ninety-three pounds. I was in bed for over a month, but am up again now. I have recommended the Vegetable Compound to my friends and give you permission to use my letter."—Mrs. ELMER A. RITCHIE, 82 Rodney St., West St. John, N. B.

There are many women who find their household duties almost unbearable owing to some weakness or derangement. The trouble may be slight, yet cause such annoying symptoms as dragging pains, weakness and a run-down feeling.

Lydia E. Pinkham's vegetable compound is a splendid medicine for such conditions. It has in many cases relieved those symptoms by removing the cause of them. Mrs. Ritchie's experience is but one of many.

You might be interested in reading Mrs. Pinkham's Private Text-Book upon the "Ailments of Women." You can get a copy free by writing the Lydia E. Pinkham Medicine Co., Coughour, Ontario.
