

CANADIAN PACIFIC — THE HARVESTERS' SHORTEST ROUTE TO THE WEST

Due to the fact that the Canadian Pacific is the shortest route to the West, the greater majority of harvesters last year travelled via Canadian Pacific.

The company will maintain the usual high standard of collector car equipment this year with cars for the exclusive use of ladies, children, and their escorts, while lunch counter cars in which hot meals, refreshments, etc., may be obtained at most reasonable rates will also be attached to all trains.

Because the Canadian Pacific is the shortest route to Western Canada and due to the efforts of the Company to have the harvesters spread over as much territory as possible in a minimum space of time, it is expected that a number of extra trains will be necessary this year to transport the harvesters to the West.

Canadian Bacon Abroad. The following extract of a letter was received from the Co-operation and Markets Branch, Dept. of Agriculture, Toronto.

"Bacon is a fairly firm market. The highest price for Canadian bacon was 97 shillings a cwt. when we wrote a month ago. Canadian bacon are as follows: leanest 86 to 97 shillings a cwt of 112 lbs; heavy sides 82 to 97 and light sides 84 to 92. Canadian cured American is not quoted this week, while shelled American sides are 72 to 78 shillings. Best Irish is as high as 114 shillings a cwt. and best Danish 110."

It is rather interesting to observe that the present prices for Irish and Danish bacon are 2 or 3 shillings a cwt lower than the prices ruling during the corresponding period of last year, while Canadian is 2 to 4 shillings higher all round than was the case a year ago.

This seems to indicate that the position of Canadian bacon is improving in this market, although there are those of us who think that the margin between the price of Canadian and those of Irish and Danish are still wider than they ought to be. This would indicate that the grading of Hogs is having its effect upon improving the quality of Canadian bacon which in turn results in more demand with the subsequent higher prices.

Destroying Groundhogs. One of the worst nuisances which is encountered during haying and harvesting operations are the numerous groundhog holes found in the fields. This pest is easily destroyed by purchasing in the drug store some carbon Bisulphide and after pouring it on a rag, throw this soaked cloth into the burrows covering the hole with a stone or earth. About 1 teaspoonful is all that is necessary in each hole.

The fumes of Carbon Bisulphide is heavier than air, consequently will settle to the bottom of the hole destroying the animal. Carbon Bisulphide can be purchased in any drug store. It is very cheap, hence can be used by every farmer troubled with groundhogs.

Miller of South Grey; Dr. Michael Clark of Red Deer, and others who might be mentioned, are familiar figures in the big reading room. There are perhaps a half hundred or more M.P.'s who never enter the open doors except to show a visitor conduct a constituent around the building.
