does not cost much over ten cents, is of the natural wood are used.

square molds for the bottom and top group and two of a little larger size Mrs. A. C. M. for between are needed.

Paint them bright colors, using enamel or artist's tube paints. Water colors may be used, but a coat of varnish or shellac is then needed to prevent dampness affecting the color. enameled the square button molds a peacock blue and the silk cord on which they are strung is bright orange, thus giving a pleasing combination but still a bright touch of

Always knot one end of the cord to prevent its fraying out when working and to hold the lower molds. A twenty-four-inch cord is a good length. String on two flat molds and tie al knot down close, thus holding the molds closely together between the end knot and the one just made.

The two larger molds are then strung, and a knot tied down close on top of these two. Leave about three inches and tie a knot and string two small molds and tie a knot on top of these. In making pulls of other designs be sure to have good proportions between molds.

In the other pull I used round molds of two sizes. These are painted bright yellow and have little conventional rose designs in black and green. The cord is a turquoise blue. A green or black cord would go very well with the yellow. In this pull I separated each bead, holding them in place by a knot on top and bottom, which also adds to the decorative effect.

# Banking by Mail

The security afforded by the Province of Ontario Savings Office, together with the facilities extended by every Post Office in Canada and other countries, make it possible for everyone to deposit their savings in this institution. Interest is allowed, compounded half-yearly, with full checking privileges.

The confidence the rural communities have shown in this Savings Office is indicated by the large increase in deposits, which are now over \$20,000,000.

All deposits are secured by the entire resources of the Province of Ontario.

Remittances should be made by Post Office money order. bank cheque, express order or registered letter, and should be addressed to your nearest Branch, where they will receive prompt attention.

### people of Ireland for a few months each year. So now the old Clanri carde castle, which came to Lascelles on the death of his eccentric old uncle the Marquis of Clanricarde, and which has been in the Clanricards family for

for a country home. Ireland as well as England is greatly excited over the news, for, unlike his uncle, Lascelles is a general favorite with all the people surrounding his estate. As for Princess Mary, she has long been loved by the Irish people, and on all occasions has tried to favor Ireland. Even when her trousseau was being made she saw to it that a great part of it was made by the women and girls of the land for which

she has always had such a tender re-

Year Residence.

London Viscount Lascelles and Prin-

cess Mary are planning an Irish residence. It is said that Lascelles has

been contemplating the move for some

time and that Princess Mary is even

more eager than he to live among the

centuries, is soon to be rebuilt and

will be used by the Lascelles family

Castle Burned in 1826.

The ancient castle, which came to Lascelles on the death of his uncle, was erected in 1588 by the Earl of Clanricarde at a tremendous cost. In 1826 it was destroyed by fire and, since, nothing has been done toward rebuilding the structure. The outer walls were not much affected by the fire, for they still stand straight and tall, a majestic pile of stone fronting on the silvery waters of Lough Derg. The castle, set in the green acres of park by which it is surrounded, will, when it is rebuilt, be a fitting home for a princess. Acres and acres of emerald meadows stretch away from its enclosure and in the distance can be seen the winding river tranquilly making its way through the peaceful country. The little town of Portumma, where the castle is situated, is a very ancient and historic one. It lies on the Galway side of the Shannon and was once the chief pass and means of communication between the provinces of Connaught and Munster. Many times the famous bridge resounded to the tramping of feet on their way to mortal conflict and many valiant knights rode over it in days that are long past.

Most of the Clanricarde estate, which was formerly the largest in area. and extent in Ireland, has now passed to the ownership of the tenantry. For many years a bitter fight was waged "Freddy," said the teacher, "you over this estate, Lascelles's muchhave spelled the word 'rabbit' with hated uncle having been one of the two t's. You must leave one of them last of the absentee holders of vast tracts of land to consent to restore the "Yes, ma'am," replied Freddy: estate to its rightful owners.

Historic Associations.

Like all the large estates in Ireland, A grouch is only a fellow whose Clanricarde castle has many historic smile is sort of rusty. Try rubbing associations. Poets have sung its Pattern mailed to any address on father was gone, and for that I was all the better it is for the boys. I hope Museum at Munich. The gown is of sessed. For, until it came into the hands of the late marquis, its owners were looked up to by the people of Ireland as possessing all the attributes that make real men. And Lascelles is credited with inheriting some of the traits of his forbears, for he, too, has proved himself. His record during the World War was a splendid one. During the great conflict he served with distinction and was wounded three times, each time insisting on going back to the trenches -a warrior that was worthy to be a descendant of a fighting race.

It is believed that the coming of the Lascelles family will do much to promote a more friendly attitude from the people of the northern countries toward their southern neighbors. In fact, it is hoped that it may help toward the settlement of the vexing boundary question for, when the former glory of the old castle 's restored what man or woman of the North would refuse to come and participate in the big affairs that will surely take place. And as North and South visit with each other under the friendly democratic roof of the Lascelles surely a better understanding of each other and of each other's problems will be the result.

## How High is Fog?

----

The fogs which at this time of the year are apt to afflict London and other great cities are in their essentials merely camulus clouds resting upon the ground, or near it. It is the soot and other impurities

they hold in solution that cause them to be so unpleasant. A sea fog is the same thing, minus the impurities. Being composed of particles of watery vapor, it is clean, and though dangerous to shipping, it is not particularly so to breathe.

Low-lying city fogs are usually shallow, though some have been found by aeronauts to extend upwards to a height of 2,500 feet.
