YOUR ALARM CLOCK

By C. S. Enders

Clocks and watches are so common that one seldom stops to consider their real value, and how much they actually do mean to us. If all the faithful timepieces in Canada were suddenly to cease running, the result can be better imagined than described. And if it were not for the thousands of alarmclocks which "tick" faithfully all the night and then ring merrily to warn us that time for slumber is at an end, well-there'd likely be many catastrophes in the business world first morning!

It is sometimes advantageous to have a number of alarm-clocks about the house. One of them makes an excellent timekeeper for the kitchen, and the alarm feature can be used to tell when to start the meals, or call out the time whenthe bread or cake should be taken out of the oven. Another in the bathroom enables the man of the house to figure train-time to the minute, while he is shaving, and he'll most likely be on time for breakfast, too!

Alarm-clocks may be used to advantage in the library, the living-room or the garage; one installed in each of the various buildings, such as the dairy, tool-house or barn, enables the busy farmer to tell the time without stopping to consult his watch. On the business-man's desk it has a place, while in the factory it may be used to advantage on the foreman's bench, to regulate special and particular shop operations. But these are only a few of the uses for your alarm-clock. As you discover others, peculiar to your needs, the clock will become more and more serviceable to you.

My, How We Abuse Them! Alarm-clocks suffer abuse from the

average owner, and this abuse often tests them to the limit. Perhaps it is because of their usual faithfulness that they are so badly neglected. But whatever the cause, it is certain that the life of an alarm-clock may be-greatly prolonged by proper treatment. For instance, changes in tempera-

ture are very injurious to the mechan-The criginal manuscript of "Kid- ism. Your clock is in a warm room napped," by Robert Louis Stevenson, all day. Theredescribed by Virgil and near the "Isle fore, don't blame the clock if it doesn't of the Lotus Eaters," of which Homer last quite so long under such usage; a higher-priced clock would suffer in the same manner. Taking it all in all, the alarm-clock, on account of its low price and unusual faithfulness, is the ideal timekeeper for rooms like those named above.

#### The Electric Waiter.

In a certain restaurant in Detroit, the meals are served by electricity. The diner enters the restaurant, selects his table, notes on the menu the food he requires, drops the menu through a slot in the table, and waits a minute or two. Presently there is a humming noise, and in the centre of the table, on a four-poster tray, appears the food he has ordered.

When the menu is slipped into the slot it drops to the kitchen below; the server there attends to the order, presses a button, and the food is on its way to the table.

When the diner has finished his meal he takes the bill, which has also been delivered by electricity, and pays at the usual cashier's desk.

Looking for Her Friend. Clerk-"Now that you've seen all the

blankets in the store, which one do you wish?" Lady-"Well, I was only looking

for a friend, and didn't expect to buy." Clerk-"Well, ma'am, if you think she's in that remaining blanket up there, I'll take it down for you."
