Some Winnipeg men make prediction that a great future is in store for the disposal of straw, by a process by which it can be transformed into paper.

safe, a match is applied and huge piles go up in smoke. If the process proves a success it will allay the fear of disappearing forests, for straw will be available wherever land can be cultivated, and will be especially valuable in our great western areas.

What You Get For The Last \$10 YES, there are lower-priced bicycles than the C.C.M., but the C.C.M. is by far the cheapest in the long run. That last \$10 you pay for a C.C.M. is the most important part of your purchase. It assures you— extra years of easy riding, extra reserve strength, extra durable finish, fewer repairs, a higher selling value for your "used" C.C.M. For that last \$10, you get, among other things—the smooth-running Triplex Hanger, a frame of English Seamless Tubing, reinforced at the joints, extra coats of rich, lustrous enamel, rustproof nickelling over copper, the classy Gibson Pedal with rustproof aluminum frame, the new improved Hercules Brake, a bicycle with everyone of its 1761 parts made with watch-like accuracy, a bicycle "trued up" at the factory. And, remember, five years from now your "used" C.C.M. will easily bring \$10 more than a five-year-old inferior machine—if the inferior machine has not already reached the scrap heap. You simply cannot lose by buying a C.C.M. Prices Are Again Reduced They're now \$20 to \$25 less than the "peak" prices. This year C.C.M. bicycles are the biggest values since pre-war days. C.C.M.
