Mr. Magrath is chairman of the Deep Waterways Commission and was former Dominion fuel controller. He is an engineer by training and drafted pany formed with private capital to successful the way will be paved for the first Ontario good roads report for Sir James Whitney. The Premier says the appointment is decidedly non-political.

Caring for the Farm Tools.

The crop of 1925 will soon be secure

against weather conditions. Grains and root crops, hay and ensilage will be ready to turn into money ,either by means of feeding to live stock or di rect sale. The farmer can then con mence to ease off slightly. There is one thing, however, that should be havrake, the mower, or the many other farm implements been put away where they will be protected against the rains and snows between now and next spring, when they will be required again? The other day in a short trip made by a member of the staff of the Department of the Interior, it hurt to see how many implements that had cost the farmer good money were left in the corners of the fields where they had been last used. Much of the farmers' hard work was The little girl was taught to close represented in the value of the impleher evening prayer during the tempor- ments, and it did seem a pity to see

---Accompanied by a suite of more than twenty people and two hundred trunks, the Maharajah of Patiala arrived recently in London, where a whole wing of a famous hotel had been reserved for him.

Banknotes recently circulated in the "Republic" by the Riffs were printed in three languages. First came, in English, "State Bank of the Riffs"; then an Arabic inscription, followed by a statement of the note's value in both English and French.

New Road Map of New Brunswick.

ACCOUNT TO THE WAY

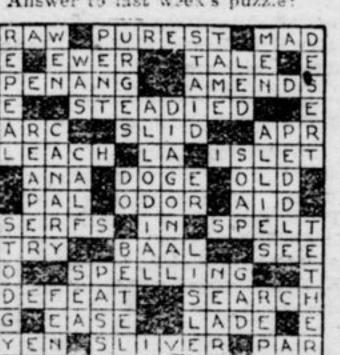

"I was most delighted with the condition of the roads down in New Brunswick," This was the way an enthusiastic Ontario motorist expressed his appreciation of the touring conditions in the province by the sea. New Brunswick has good roadsthey are the result of long-time construction and of efficient up-keep. They are practically all hard gravel roads, of which material New Brunswick has an ample supply; the result is that even after a wet period, the drainage provided soon dries up that

The fact that these good motor roads are available has very material-! ly increased their use. Touring parties from other portions of Canada and the neighboring states are visiting the province in increasing numbers, to the benefit of both residents

The Natural Resources Intelligence spring, when activity again reigns in Service, recognizing this intensity of motoring in the province, has just natural resource-the land-someone ment to Montreal, Ottawa, and other when the child added: "And you'd bet- may have to go without what he would issued a most useful map, known as like to buy because the money is the "New Brunswick Motor Roads and Recreational Map." The map shows needed to replace a neglected plow or at a glance the motor roads of the much more satisfactory to have the province, segregating in colors the present plow in good condition and trunk roads, secondary roads and other roads. Cobalt metal is used in the manufacture of stellite, which is a cobaltchromium-tungsten alloy used extensively for making cutting tools. It is also employed in making certain kinds of tool steels and in the manufacture of magnet steels.

Cobalt oxide and numerous cobalt salts made from the cxide find wide application in the ceramic and enamel industries and in the production of various pigments. Cobalt salts are also used in electro-plating.

Natural Resources Bulletin.

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

Half the pleasure of the fishermen tourist's holiday is in the camping, whether it be done on a large scale with luxurious appointments and a large following of guides, or by the sportsman travelling with an Irreducible minimum of baggage and taking only a single guide and canoe.

There are guides, of course, to be hired in all the good fishing districts; the cheery French-Canadian, skillful with paddle and landing net; the highclass guide who provides the entire camping outfit and sees that you live, not only in comfort, but in luxury; and the "silent smoky Indian" of whom Rudyard Kipling speaks, who watches you with critical eyes, and will leave you in disgust to your own devices if you make a mess of things, just as a good pointer or setter will desert you if you are muffing your birds after he has found them for you. But they are all worth cultivating, and there is much to be learned from themin the way of fishing and other lore. on the unforgettable nights by the glowing red coals and flying sparks of the camp fire, when the forests are

silent under the starry sky. Canada this year is welcoming great numbers of visitors who are bent on testing out our streams. They will be found in the most remote areas, and, as usual, fishermen are good fellows, and good sportsmen, and the many guides bear witness to the fact also that they are good spenders. When they return to their homeland, whether it be the United States or Great Britain or other country, their experience in Canada and the reception they were accorded will be one of the pleasant memories of years to come and each will be a good missionary for Canada.

The Test.

A gray old practitioner of the type of the last generation, who is the of ficial physician of the schools of a nearby town, was examining the pupils recently.

With watch in hand he gripped the slender wrist of a little girl under

"Hear that?" he asked, holding the timepiece at arm's length. "No, sir," came the timil reply.

"Hear that?" he repeated, bringing slightly nearer. This was too much for the frighten-

od kidd's, and she didn't reply. The doctor brought the watch nearer and nearer, with no better results, then finally, 'he jamel'it up against her ear.

"Now, : don't you hear that?" Le There was the same monosyllable reply, and with an air of deep disgust

the old man held the watch to his own ear, exclaiming: "Goah, the old thing Isn't going!"

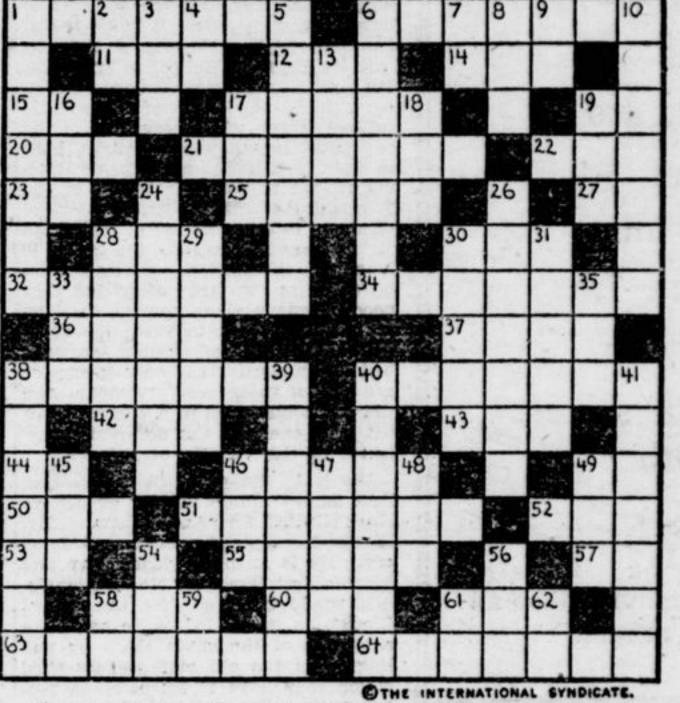

Germany is Growing.

Germany's population 3s now practically the same as that of 1908, in spite of the fact that in area she is now much smaller than she was then.
