

**DEATH IN CITY**  
 Dies from Starvation.  
 A 4-year-old child has been missing for four days, and his discovery in a field the day after his death is a case of starvation. For four days and nights the child had been playing in the field, and his body was found on Wednesday. The child was 4 years old and the body was found on Wednesday. The child was 4 years old and the body was found on Wednesday.

**JAPAN A BUYER OF AUSTRALIAN WOOL**

**Demand From Orient Contributes to Successful Market.**  
 Melbourne, Vic.—The Victorian wool selling season has ended, although the Australian statistical wool year does not end until June 30.

Seldom has the selling end of the trade experienced so satisfactory a season, with the withdrawals at auction so small. Victorian sales have been held alternately at Melbourne and Geelong, the latter being the centre of a large wool-growing area, and after the last sale, the selling brokers' warehouses were practically empty.

From July 1, 1926, till Feb. 28 (to which must be added the March figures which are not yet available), 458, 030 bales were disposed of. The season opened in Melbourne in the last week in September at a high level, the only unsatisfactory feature being that competition was chiefly confined to the European section, with moderate support only from Japan and America.

The outstanding feature of the season was the activity of Japan in the market. The demand from this section throughout was most insistent, and Japanese requirements have embraced a wide range of qualities. The demand indicates that a large and probably increasing export trade in textiles has been established through-out the East.

Specular prices in top lots in previous seasons have been due to American competition for them but in the absence of any real keenness by these operators to put a premium on such wools they have come within the scope of the best Bradford and European spinners, the highest priced lots having been obtained during the season by one or other of these.—Monitor Bureau.

**DETROIT BRIDGE PROBLEM ARISES**

**Contractors Seek Legal Right to Cross Streets With Approaches.**

Detroit, Mich.—Although ground has been broken for the international bridge over the Detroit River connecting Detroit and Windsor, Ont., construction will be held up temporarily.

The American Transit Company, sponsor of the bridge, has definitely decided to ask the Detroit Council to call a special election upon a referendum ordinance giving the company permission to cross several streets with the bridge approach. The company has expressed its willingness to pay the expenses of this special election and has requested that it be held early this summer.

This action has been taken following the commencement of injunction proceedings by John W. Smith, Mayor, who contends that the approval of the people of Detroit must be given before a permit or franchise for the construction of the bridge can be given by Detroit city officials. These proceedings were started by Mayor Smith after a permit resolution approving the plans for the bridge was passed by council over his veto.

Officials of the construction company, in asking for a special election, state that bankers refuse to invest money in the project until all possible legal obstructions are removed. The power to regulate tolls for the bridge will lie solely with the Minister of Railways of the Canadian Government and the United States War Department, it is stated.

**Control of Liquor Declared Failure.**

Winnipeg, Man.—At the annual meeting of the Manitoba Prohibition Alliance, government control of the liquor traffic in Manitoba was termed an absolute failure, by speakers at the convention. It was shown that liquor convictions had increased steadily during the three years since the business was placed under the control of a government commission. More than 60 per cent. of the beer produced in the Province had been sold illegally, and each of the eight breweries operating in Manitoba had been convicted during the past year, some as often as three times.

The world would be much better off if it followed the example of the United States and adopted prohibition, declared Mrs. Helen Barton, of Glasgow, Scotland, who spoke at the meeting. A survey of the progress made by the temperance movement all over the world indicated that the prohibition sentiment was gaining headway. So far as Canada was concerned, Mrs. Barton asserted, it was regrettable that there seemed to be no vigorous effort to enforce the liquor law.

Dealing with the referendum to be held in Manitoba this summer on the question of extending the facilities for obtaining liquor, the convention declared itself as utterly opposed to the proposal. In case there should be a favorable vote, however, it went on record as preferring the "beer by the bottle" plan to that which proposed the sale of "beer by the can," as the latter would mean the virtual return of the bar and the treating system, and the return of private sale for private profit.

**OWL-LAFFS**

Hard luck stories are rarely valued at more than a dime.

A dispatch says girls will be grisly again in the summer styles although there certainly was no effort on the part of style to conceal the fact.

In gambling it isn't the first loss that is so expensive; it's getting it back.

The reason some men accomplish more is that they attempt more.

The average lawyer's brief is anything but.

It's quite a trick to be a magician.

Ned—"Why do you call money 'jack'?"  
 Ted—"It lifts such a load off of a fellow."

A kiss is alleged to shorten life and the lack of them in families has been known to shorten married life.

If music be the food of love, jazz must be the poison.

One of the nice features of ice cream is that it is boneless.

Few things are so expensive as those we try to get for nothing.

Arithmetic problem—A young woman, at 7.45 last night went up stairs to dress. She is 19 years of age and weighs 122 pounds. State the wait of the young man downstairs.

Nurse—"Yes, Johnny, the doctor brought twins."  
 Johnny—"Gee, that's what we get for having a specialist."

The best balance of power is the bank balance.

"Are you sure it was a marriage license you gave me last month?"  
 "Certainly, sir; why?"  
 "Because I've led a dog's life ever since."

Beautiful girls are more plentiful than intellectual ones, says a groucher, who adds that this is in keeping with the demand.

There are many arguments in favor of matrimony, the best being an old maid and an old bachelor.

Small Brother—"Ha, ha! I saw you kiss Sis!"  
 Suitor (hurriedly)—"Er-ah-here's a quarter."  
 "And here's 10 cents change. One price to all, that's the way I do business."

Luck has a way of breaking for the fellow who doesn't depend on it.

Last winter a fire broke out in a railway station waiting room. The passengers were most annoyed when their train came in just as the place was warming up.

Stinginess is a virtue too many of us are ashamed to own.

So many of the girls who are easy on the eyes are very hard on the pocket-books.

**FRANCE AND ITALY.**

Rome Lavoro d'Italia: (Cassist circles blame the French for creating difficulties for Italy in the Adriatic.) If they continue to follow this policy certainly the Adriatic will become a grave of good relationship between the two countries. . . . To be quite sincere, we are beginning to lose hope of any possibility of agreement between France and ourselves.

**SHARPENS RAZOR BLADES LIKE NEW**

Five years ago I bought one dozen Safety Razor Blades and a "TO" Sharpener, and I have shaved myself every day since, sharpening the blades according to the simple directions, after having used them a second time. These blades are giving me just as nice and smooth a shave as the first time I used them. Send \$2.75 for this shaving offer to-day and be convinced. Your money will be promptly refunded if you are not satisfied after a ten day trial. SALESMEN WANTED.

FRANK WOLFE, 70 HILTON AVE., TORONTO

**WEAK, LISTLESS GIRLS**

**Need Such a Tonic as Dr. Williams' Pink Pills to Restore Health.**

When a girl in her teen becomes pale and sallow, especially if at the same time she shows inclination to tire easily, a listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements Dr. Williams' Pink Pills can supply. But an analysis of the blood is not needed—the physical signs are plain. Among these signs are a pallor of the cheeks and lips, dark circles under the eyes, easily tired and breathless after slight exertion. Poor appetite, headaches, and sometimes fainting spells follow; often the patient is nervous and is started at the least noise. In all run-down conditions there is no other tonic which will build you up so quickly and so surely as Dr. Williams' Pink Pills. The statement of Miss Dorothy Lamblin, Bush Island, N.S., will bring hope to other weak girls. She says:—"I wish from my heart I could persuade every person who is in a run-down condition to give Dr. Williams' Pink Pills a trial. About a year ago I was a weak girl suffering from impoverished blood and a run-down system, with many of the attendant symptoms. I had often read of Dr. Williams' Pink Pills and decided to take them, and after using six boxes I feel as well and strong as ever. Dr. Williams' Pink Pills will be my standby in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to others."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**TRIPS DEMAND SAFETY IN CAR**

**A.A.A. Gives Advice on How to Prepare Machine for Summer Tours.**

Washington.—With the time for annual summer trips drawing near, when the automobile must perform its best, with especial dependence on brakes and steering gear, the American Automobile Association has issued a bulletin containing helpful counsel on the preparation of the car for the jaunt. The car must be greased, the oil changed, all loose joints must be tightened, the tires, if any of them are worn to any extent, should be replaced, for starting out on weak tires may in some cases prove very unwise.

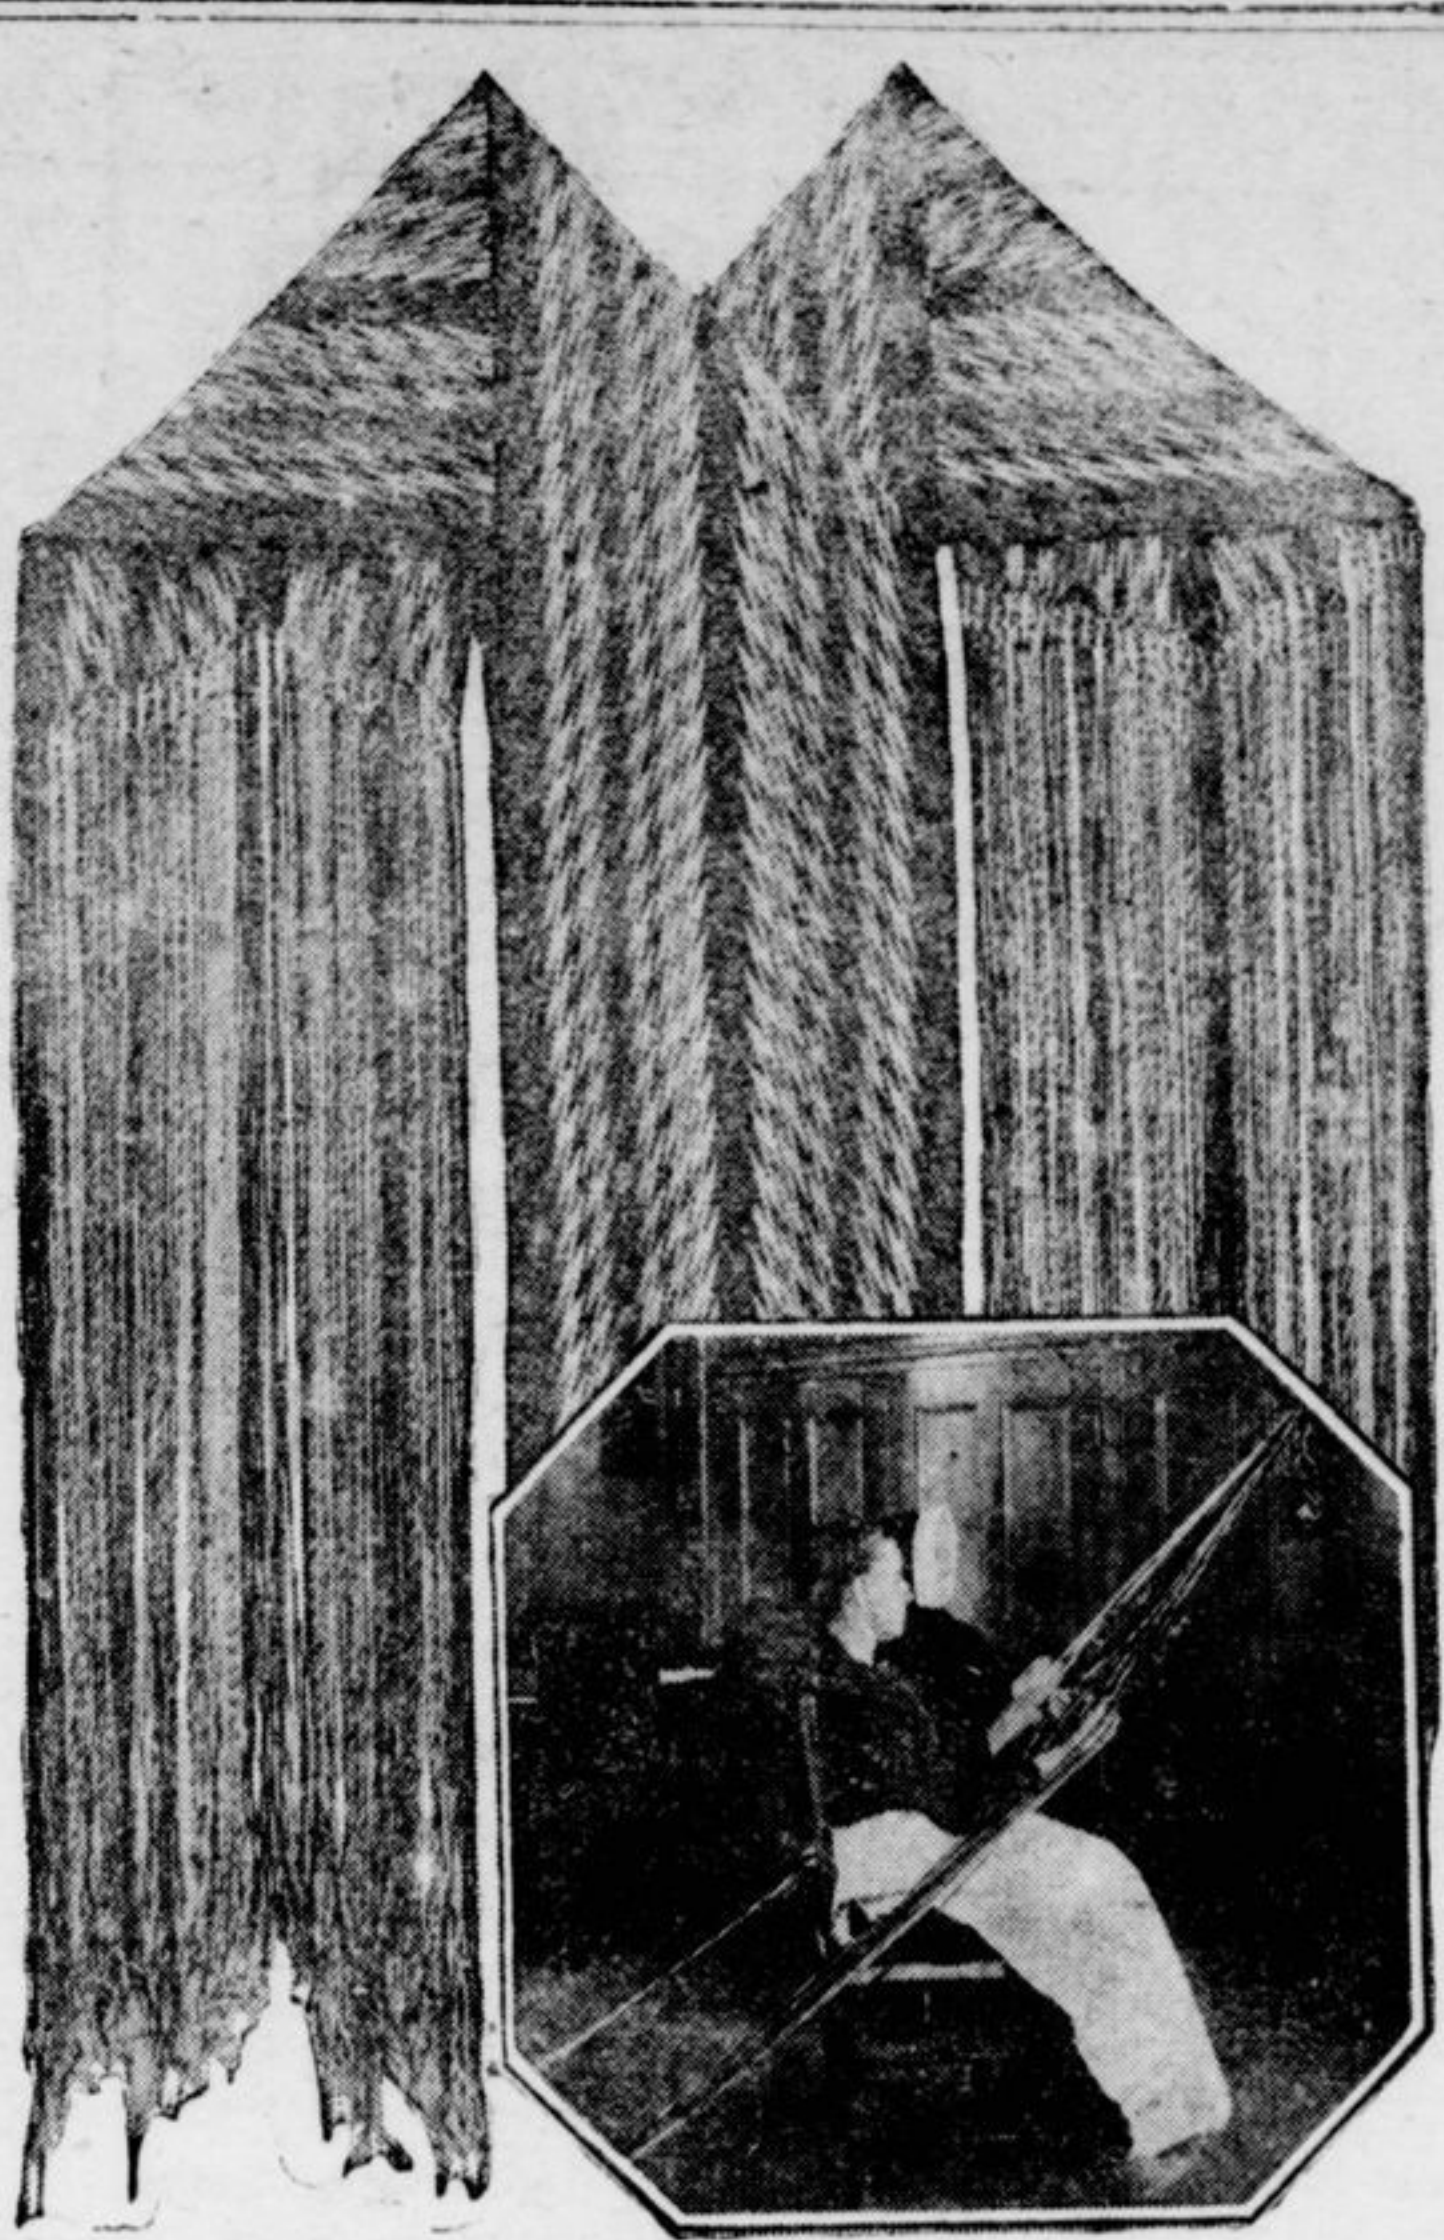

"No tour should be undertaken until the car has been thoroughly inspected," Thomas P. Henry, president of the A. A. A., is quoted as saying. "Particular attention should be centered upon its safety features. Brakes adequate for normal driving may prove incapable of performing up to the standard demanded on the tour. Another feature that frequently escapes attention is the steering mechanism. Travel on the tour will be faster than one's usual pace, therefore this gear must be in the best of condition.

"Although it is not generally so regarded, the engine is one of the car's most important safety features. It must be performing at its best to deliver the extra power necessary for long trips at high speed. If one is certain of the carburetion and timing, one will have little trouble under ordinary conditions."

"One thing to be remembered is that driving consistently at a reasonable speed you will cover many more miles a day than driving at a fast and irregular speed."

**Aviation in Canada.**

Le Devoir (Ind.): Canada has agreed to establish a Canadian airdrome and a special mooring-mast in order to assist in the experiments which the British Government is now making. . . . Britain is now in the process of building giant dirigibles which will commence to operate next fall. Their first trip will be to India. This will be a less dangerous trip, as the flight will be overland from start to finish. But in the spring of 1929 they will make an attempt to come to Canada. And it is in order to allow them to be brought to earth and to be moored out in safety that the Canadian Government has consented to make certain disbursements.

**Quebec Handicrafts Flourish**

Contrary to the belief of many, spinning, weaving and many other household arts are not lost but still flourish in Canada. The old arts still live in the Province of Quebec, where they are an integral part of the household duties of the French-Canadians.

One of the most interesting handicraft products is the "arrowed sash" or "Ceinture flechee" once the popular and almost indispensable part of the winter garb of the French-Canadian "habitant." The arrowed design accounts for its name and one can judge from the above photograph of a fine specimen that the art of weaving such a sash by hand would be difficult and extremely delicate.

The finest "ceintures flechees" were made in L'Assomption, near Berthier, Quebec, this handicraft still being carried on there. The use of a white sash somewhat similar dates back to the seventeenth century, when it formed part of the costume of the scholars of the Seminary of Quebec. Sashes were also worn in the early days by the "coureurs des bois," but these were not the sashes of finely twisted wool and workmanship that are popularly known as the "ceintures de l'Assomption," made in the district of that name.

**BABY'S OWN TABLETS HELP A PRIZE WINNER**

Baby's Own Tablets are without an equal for little ones. From the newborn babe to the growing child they are an absolute safeguard to health. Once a mother has used them she will use nothing else. Thousands of mothers always keep them on hand. Among the mothers who state that Baby's Own Tablets are the best medicine for little ones that they know of is Mrs. Russell Hill, of Norwood, Ont. Her experience with the Tablets should be of great benefit to any mother who has not already given the Tablets a trial. Mrs. Hill says:—"I have five fine healthy children, and from the youngest to the oldest they get no other medicine but Baby's Own Tablets. When our baby girl was eleven months old she won second prize at the Norwood Fair, and when she was a year older she won first prize in competition with twenty-eight other babies. It was the Tablets that gave her the health and development to carry off these prizes. I always delight in telling other mothers what the Tablets have done for my children."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Golf—the Rich Man's Game.**

Ottawa Droit (Ind. Lib.): (By all means raise the tariff on golf balls.) There is only one Canadian company, in Toronto, which makes golf balls. There must be at least 100,000 golfers in the country, and golf balls should be imported to the number of some 50,000 dozen. Yet in this case it seems that the tariff could never be too high. . . . because gold balls are only of use to the favorites of fortune. Everything, in the game of golf, contributes to the multiplication of expenses—clubs, clubhouses, and caddies, who are tipped so lavishly. It seems quite natural that the Government should seek to extract as much as possible from these millionaire performers if they are determined to go abroad for the apertures of their sport.

**Ladies Wanted**

To address and mail cards at home. Earn up to \$15 weekly. Write or spare time. Send stamp for particulars. Ladies' Agency Service TORONTO, 3

**Use SIMONDS SAWS**

BECAUSE guaranteed to cut 10% more timber in same time, without loss of labor than any other saw. SIMONDS CANADA SAW CO. LTD. VANCOUVER, B.C. MONTREAL, QUEBEC, TORONTO, N.S.

**FARMERS!**

Minard's is good for colic, strains and collar bolts. Keep a bottle handy.

**YOUNG WOMEN SUFFER MOST**

These Two Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Ayer's Cliff, Quebec.—"I have been teaching for three years, and at the end of the year I always feel tired and have no appetite. I was a full sick each month, too, having pains in my back, until sometimes I was obliged to stop working. A friend recommended Lydia E. Pinkham's Vegetable Compound to me, and I heard many women telling how good it was so I thought it would help me. And it did. Now I take six bottles every year and recommend it to others." —DONALDA FANTUEUX, Ayer's Cliff, Quebec.

**"Unable to Work"**

Canning, Nova Scotia.—"I had irregular periods and great suffering at those times, the pains causing vomiting and fainting. I was teaching school and often for some hours I would be unable to attend to my work. Through an advertisement in the papers I knew of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the troubles being completely relieved." —LAURA J. EATON, Canning, King's County, Nova Scotia.
