sional dose given to the well child Mother England Vs Mother India

I have always argued that there is only one sense in which the idea of progress has any meaning-in the sense of plumbing and its equivalents. Tested by its plumbing and by analogous tests India is in a sad state. But when I closed Catherine Mayo's "Mother India" I began to reflect on certain criticisms of our own cherished Western civilization which I have heard, not from disgruntled Indian agitators, but from sensitive and intelligent men and women who were able to view the situation in perspective. The drunkenness of Glasgow on a Saturday night, the slums of Manchester, the waste of public revenue on unproductive expenditure, the system of primogeniture, the existence in the British Isles of class of permanently unemployedthese are phenomena which might well prompt a writer from Mars or even from the continent of Europe, to write a book about "Mother England" which would be as true and as untrue as "Mother India." After all, perhaps the Indians, like other nations, have a right to go to the devil in their own way .- (Ernest Boyd in The Independent).
