This stage is followed, at 14, by an interest in periodicals and in literature dealing with hobbies and nterests. too," he replied. "I often sell a part I garlic clove, scraped, I level table- things, or to keep pets become popu-

Parents are often perplexed by an unaccountabl dropping off of interest juvenile clubs, companions and current events. In their preoccupation with the world of reality they lose interest in the world of books. Many young folk drop their reading at this age for the want of tactful guidance on the part of someone who understands their needs. If, however, the love of reading survives this stage, it becomes firmly fixed and remains a

source of stimulus, delight and solace. The aim of the parent and teacher at every stage should be not to thwart th natural interests which the child displays, but to make use of them and guide them aright. At the stage when adventure is the child's ruling interest and he is in danger of becoming addicted to the trashy and cheap periodicals which are published to sup-"Mother Knows Best," is the title ply this want, he should be introduced o fa new novel by a famous authoress. to Ballantyne, Marryat and R. L. Stevthrough which he passes. If the best of each type of literature be put in his way, he will be more likely to levate his taste while satisfying his desire. Even the chil who seems to prfer outdoor life, nature study, or other active occupations need not be allowed to escape from the influence of literature. His understanding and enjoyment of nature will be enhanced by Gilbert White; and for very activity into which he may enter is a library of books to which he may profitably be introduced. The difficulty of the undesirable

book is one that is best met by the supply of literature of the better kind. The good will drive out the bad-provided it is there in plenty and at the right moment.-Christian Science
