Persia Halts British Air Plan

"All Red" Plane Service to India Barred by Refusal to Grant Landing Place

Great Britain's plans for its "all-red" air route to India, and eventually to the Antipodes, which was heralded as one of the greatest of projected world airways, have been brought to a standstill by the action of Persia in refusing to grant a landing place on Persian territory.

pointed Shah, at one time a humble pirations behind it. member of the Persian proletariat | The British airway to India was in and also said to have been a flunky at operation at least once some eight the British Ministry in Teheran some months ago when Sir Samuel Hoare, years ago, seemed personally to be the Air Minister, accompanied by his well disposed toward Great Britain wife, flew to Delhi and back. The when he converted himself into a route was surveyed and prepared at royal figure almost over night. An heavy cost by way of Basra-the teragreement was signed last year be- minal at the present time-Bushire, tween the Persian and British govern- Bandar Abbas and Chahbar. ments granting landing rights in Persia to the British. But the Persian Parliament subsequently refused to time as the British Government made tion in London. Many difficulties some kandsome monetary offer for would have to be overcome before such a privilege.

Germans Get Concessions.

Shah Riza is something of a dictator, but so far he has done nothing to bring his Parliament to the point of ratification. In fact, the Shah is probably bringing no pressure to bear on the refractory Parliament. As Persia is not a member of the Convention for the Regulation of Aerial Navigation she has the right to prohibit foreign machines from landing on her tempt by wealth; Persians to obtain soil. Important concessions have been made, however, to a Russo-Ger- to certain areas where the Anglo-Per-

the Porto Rican girlat San Juan, had no bearing on the murder two months later. He hurried on to the relations between Mrs. Battice, the Negro's wife, and Waldemar Karl Badke, the engineman, while the schooner Kingsway was in mid-Atlantic on its way to the Gold Coast of Africa. He declared that when Battice saw his wife in the embrace of the engineman he became

wife nineteen times with a razor. "Knives were in his mind," said Mr. Ewing, "and ought to have been there, nothing else could have been."

He pictured the defendant as "physically weak, cowed and crushed" in the face of Badke, "the bully, coward and yellow bound."

Tuttle Charges Premeditation Mr. Tuttle told the jurors that the defendant had willfully intended to kill his wife from the time he fell in love with Emily Zamot. The defense was untenable, he said, because the only evidence to support it was the testimony of Badke, who he admitted, agreeing with Mr. Ewing, was "an im-

measurable liar." Every wound on Mrs. Battice "cried out for justice," he declared, and no evidence showed that Battice had ever asked the captain for protection from

"I agree," he said, "that Badke is a one thing worse and that is to take a man by the hand and say, 'Come aft, my wife is crying for you."

Judge Anderson pointed out that them to weigh carefully the testimony should discover that the murder was committed in the heat of passion they

The English and Welsh birth rate for 1926 again has shown a decline, following the descending curve which has obtained since 1920, according to figures published by the Registrar-General. The rate for the calendar year was 17.8 per 100,000 of population.

Against this the official report shows that the death rate of infants less than a year old was the lowest on record. Scotland experienced a higher birth rate as well as a higher infant death rate than England and Wales.

The 1926 birth rate tied that of 1917 and was barely higher than the 1918 rate of 17.7, the lowest on record for England and Wales, In France, where the low birth rate for years has presented what is regarded as a grave national problem, the proportion for 1926 was 18.8 for each 100,000.

Cancer, heart disease and tuberculosis of the respiratory system led the list as causes of death in England and Wales.

British Grants Aid Migration

Imperial Assistance Stimulates Affortestation in South Australia

Adelaide, S. Aust.-An imperial grant of £358,250 to South Australia as a nucleus for starting afforestation on a larger scale was recently announced by the State Premier, Rich ard L. Butler. Representatives of the British Government have had an eye on the southeast for a long time. I is here that they expect an opportunity to be able to place migrants from England. In addition, the Scottish societies of this area are now drawing up a scheme for the importation of families from Scotland. Several estates have been offered to the Government for purchase and subdivision into farms, and a substantial income is assured from these lands, where onions, potatoes and cereals grow to perfection.

In accordance with the terms of the above grant, a minimum of 50,000 acres is to be planted over a period of 10 years, and paper pulp works will also be started. It will be necessary for the state to secure a further 100, 600 acres of land to carry on the project, and already44,000 acres have been purchased at a cost of £69,000 It is estimated that the expenditure on on acre for 30 years' work will be £57. Every acre harvested will, on presentday costs, enable the state to replant,
