### **Bathing Pool Gift** Won Fuad Friends

War-Time Royal Courtesy to British Army

London-King Fuad of Egypt while visiting in London was remembered by many British officers for a concession which they regard as one of the most kindly acts of the World War, and is now being told in London military circles. This was to set aside a beautiful bathing beach at Ras-el-tin in Alexandria for the use of English hospital "Sisters" and officers from neighboring camps.

There was just one restriction. A pavilion built over the water was the private gymnasium and swimming place of the Princess. When a red flag "Do you think he will lead her to was hoisted this signaled the fact that she was taking tea in the Kiosk, and "No; I think he'll follow her there." men had to keep at a distance. The hospital women, however, might watch the procession of Egyptian maid attendants robed in black, with the white yashmaks which hide all the

Use on Increase in Poland.

In 1922 the production was 10 tons of carbide and 130 tons of cyanamide per day. This has been increased to 300 tons of carbide and 250 tons of cyanamide. The nitrogen content has been increased, and the electrical power required per kilo of pure nitrogen has been reduced by one-third. The products are exported to adjoining countries and to France, but latterly the use of nitrogen fertilizers has increased to such an extent in Po-

The pioneer achievement of the German chemical industry in this field are already well known. During the of sulphate of ammonia have been very profitable to the Chemical Trust, and now that the merits of the new complete fertilizers are widely known among German farmers, this branch of producion is becoming increasingly important. But the British development has opened out an entirely new

Plant Started in War.

The Billingham site was bought by the British Government during the war with the object of trying out the Haber process. The war came to an end before anything had been done, however, and after protracted negotlations the Brunner Mond Company took over the site, which is particularly valuable because it has large deposits of gypsum, which is used in the manufacture of the sulphate of am-

The plant will be in full operation shortly, and the output is expected to jump from the present 250 tons of sulphate of ammonia a day to 800 tons. Negotiations are now on foot between the Mond Trust and the Ger man Chemical Trust with the object of avoiding the intense competition that might easily arise.

British Use New Processes.

It is believed that an agreement will be reached in the near future for the allocation of markets and for collaboration in other ways. Already the British Trust has acquired territorial rights in the German patents for the complete fertilizers, and for certain new products which will give the farmer a much larger nitrogen content in a given weight of fertilizer. One new process is to mix nitrogen with the carbonale of lime, which is a by-product of the sulphate of ammonia process. This is not only very cheap, but it enables the farmer to apply to his land nitrogen-and lime imultaneously.

Already the use of nitrogen fertilizers is rapidly increasing in Great Britain, especially for the improvement of grass lands, and it is believed that a huge potential market exists in the British colonies and the Far East.

#### Glass Blowers Profit

Owing to a scarcity of skilled labor in Venice, it has been found necessary by most of the glass factory employ ers to admit the master glass blewers into their firms. This has been done by permitting them to buy stock, so that many of the works are new operated on a co-operative, profit-sharing plan, each master laborer owning at least a share of stock and sharing at the end of the year in the division of net profits, in addition to getting a weekly salary.

"Dear Bettie," wrote the young man, "pardon me, but I'm getting so forgetful. I proposed to you last night, but really forgot whether you said yes or no." "Dear Bud," she replied by note, "so glad to hear from you. I know I said 'no' to some one last night, but I had forgotten just who it was."
