

German Reports Finding Atlantis, Legendary Land

Plato's Description Declared Borne Out by Remnants of African Settlement

Region Covered by Relics

Berlin.—Paul Borchardt, a German scholar, believes that he has found the Lost Atlantis, of which Plato wrote and which is thought to have disappeared about 1300 B.C.

For hundreds of years scholars have argued as to whether this country really existed or whether it was merely a myth started in ancient times. Plato got his account of the destruction of Atlantis from Solon, who was told of it by the priests of Neith, the guardians of the veiled image of Sais in Egypt.

DISCOVERIES DESCRIBED.

Dr. Arthur Berger, in the "Tagblatt," gives the following account of Dr. Borchardt's discoveries:

"Scholars have tried in vain to determine the place where Atlantis sank into the sea. Tremendous amounts of earth were dug up, and the sea was sound—no rain. Finally the German savant, Paul Borchardt, put forth the hypothesis some years ago that Atlantis ought to be looked for somewhere near Gabes, in the north of Africa. Again the quarrel of scholars flamed up—and now came recently the report that Borchardt's hypothesis seems true. He himself writes me:

"The sun stood low on the sky; with my glasses I was able to see distinctly a flat hill which was surrounded by a big circle which plants had formed in a shallow valley. I started immediately for it, and twenty minutes later I stood on the hill. It was undoubtedly an old settlement, as the remnants of walls which peeped out of the ground proved. Around me was the above mentioned circular valley. My surprise was still greater when I suddenly discovered a second circle which ran concentrically around the first one. This was no doubt the circular plan which Plato had described. 'But then came the spectre of doubt. Was he not perhaps mistaken? Wasn't this all his own imagination?

MANY RELICS FOUND.

"And again he went out on the next day; this time the reactor of a French school accompanied him. The circular valleys or ditches were known to him; a native shepherd knew even the name for the hill in the center, which he called Kair Galal, which means 'water pitcher burg.' Plato wrote 'water burg.' Is it a coincidence or a change of the old name which nowadays does not fit any more? There is no water any more in these ditches. For thousands of years the earth has invaded this region, where formerly the sea and the canals and the harbor were. Around this hill one finds huge masses of old broken pots, stone spear points, broken fire stone knives and now and then those bits of walls which seem to indicate that once a big building, perhaps a temple, stood on this place. At many places the wandering sand of the desert has taken away the marks of a former civilization; but at other places there are rather numerous remnants."

"Wherever Borchardt rods he met with such traces of an old settlement. There is a fountain spring which, according to the tales of the natives, is supposed to date back to the days of the Romans, and everywhere there are fragments of pottery in the gardens of the cases; an entire region is called after these pieces of pottery: Dahret el Chuna, the 'Hill of Broken Pieces.' The entire country is literally covered with ruins and broken fire stone instruments. These could not have been carried here by the winds in the course of the centuries; they rather must be the relics of a time when many people lived in this region. This was not the case in historical days, since there is no report whatever about a town in this district. Everything else makes one believe that Professor Borchardt actually found the place where once the world-governing Atlantis stood. It is a huge spot, circular, and about five miles wide.

FRENCH RECOGNIZE DISCOVERY.

"And the scholar concludes in the letter he wrote to me:

"Plato's Atlantis was not a mere fairy tale, his report did not hint at Southern Spain; but the 'Sea of the Atalantes' is the 'Bah' Atala,' the Tritan Sea of Diodorus and the nowadays almost dried up Shett-Djered." "Now there was still one question: Would the French, in whose colony this place lies, recognize the discovery? Those were days full of worry for the explorer till the director of the archaeological department of Tunisia arrived. Borchardt explained to him his view of the matter, showed him everything, and—the great moment came. Professor Poinot recognized Borchardt's discovery unreservedly, and reported to the authorities in Berlin that the excavations could start next fall."

"There is no doubt," Borchardt found the place, where once a huge city stood. Perhaps, and we shall hope so, the fifteenth of February, 1928, will be to posterity the day when Borchardt stood for the first time on Plato's circular burg; it will be a day of glory in the history of archeology; and perhaps it will become possible to bring Atlantis back to daylight, just as the German scholar Schliemann brought Troy back to our eyes some decades ago."

NEGLECTED ANAEMIA

Often Leads to the Most Serious Consequences.

In no disorder is delay or neglect more dangerous than in anaemia. Usually the first noticeable signs are pale lips and cheeks, dark rims under the eyes and a feeling of weariness. Then follow headaches, backaches, palpitation and breathlessness. The only way that anaemia can be overcome is to enrich the blood, and it is because of their wonderful blood-enriching and blood-making properties that Dr. Williams' Pink Pills have won such great success in the treatment of this often most stubborn disease.

Thousands of young girls who were in an anaemic condition owe their present good health to Dr. Williams' Pink Pills. One of these, Miss Kathleen McEachern, Port Hood, N.S., says:—"I praise the day I began the use of Dr. Williams' Pink Pills. I had not been feeling well for some time. I was very pale, had severe headaches, dizzy spells, and occasional fainting spells. The least exertion would leave me tired and breathless. In this condition I began taking Dr. Williams' Pink Pills. I continued their use until I had taken six boxes, by which time I was again enjoying good health. I hope my experience will lead other sufferers to give this medicine a fair trial."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills, and you will soon be well and strong. These pills are sold by medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Need of Forest Policy

Few people realize the urgent need which exists for a forest policy in Canada. The economic facts are that the forest is second only to agriculture in production of commodity values, and it contributes to-day one-quarter of Canada's total export trade. Therefore, continued depletion of raw materials essential to the well-being of the forest industries is a direct menace to our national prosperity.

YES OR NO

A parliamentary candidate in a rural district made the following remark in the course of his address: "There is no question in the world which I cannot answer with just 'yes' or 'no.'" An old farm laborer jumped up and said: "Please, maister, might I ask 'e a question?" "Certainly, my good fellow," said the candidate.

"Well, then, maister," said the old farm hand, "what's the time?"

The influx of Mexican peons into the United States would indicate that there is one border of that country that needs hemming.

In the days of Cromwell fine quality tea cost as much as thirty dollars a pound. To-day, you only pay a few cents more for Red Rose Orange Pekoe than for ordinary tea, but you get the highest quality and greatest value. Put up in clean, bright aluminum packages.

Cute in a Baby—Awful at Three—and it's Dangerous by Ruth Britain

Thumb sucking does look sweet in a baby, but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce adenoids, and it always interferes with digestion. Pinning the sleeve over the hand; attaching mittens, or putting on cardboard cuffs, which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit—irregularity in bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little Fletcher's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhea, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper as you'll get the genuine.

Must Develop Empire Markets

Empty Spaces of Dominion's Need More British People

EMIGRATION

London Paper Says Prosperity of Workers Depends on Policy

London.—The first tangible results of the post-war trend will be seen in four or five years' time," says the London Daily Express, "when the recruitment of labor will be considerably decreased. At the same time, the new scheme of pensions at sixty-five means an inevitable cutting down in numbers at the other end of the labor scale.

The immediate result will be a taking up of the slack in the unemployment line and a sense of well-being throughout the ranks of the employed. Unfortunately the situation will not be allowed to rest there. Under the pressure of the birth control campaign, unless it is checked, the birth rate will continue to fall. Fanciful as it may seem, we might eventually come to a labor shortage—a consumption of labor that is not the prospect of imported labor is not beyond the realm of probability.

But in the years ahead the prosperity of the country, and particularly of the industrial workers, depends supremely on one factor—the power to develop and hold the Empire markets. To do that the vast empty spaces of the Dominions must be populated by a preponderance of the British race.

There is no other way. We have carved our own destiny as a nation-bearing people. We must send out from these islands not thousands but tens of thousands of our men and women every year. It is the price and opportunity and glory of Empire citizenship.

Shorn of the Empire—and unless we can people our Dominions we will not hold them—we sink in importance and power and wealth until once more our industries will not support the population, no matter how the birth rate has reduced its numbers.

These are crude facts presented without elaboration or sentimentalism. But as a people we have never lacked the courage to think in decades rather than in days. It is that sense of the centuries, so markedly the British heritage, that should point the human and national warning of the empty cradle.

Statistician's View.

"I.H.P." in the first number of The Statistician, the organ of the Society of Statisticians and Accountants, writes about an overlooked fallacy of the birth and death statistics published from time to time. "Standardized" death-rates are those which would have been recorded if the sex and age constitution of the population had been the same as in 1901. He says:

Throughout the country, local authorities are reporting, with satisfaction, rapidly declining death rates. In England and Wales the rate (standardized), per 1,000 of the population has fallen consistently, as the following figures show: Average: 1871-1880, 20.3; 1881-90, 18.6; 1891-1900, 18.1; 1901-10, 15.2; 1911-20, 13.5; 1921-25, 10.9; year 1926, 10.1.

Not so happy though—at least so many people believe—is the comparatively rapid fall of the birth-rate, which has declined as follows: Average: 1871-1880, 35.4; 1881-90, 32.4; 1891-1900, 29.9; 1901-10, 27.2; 1911-20, 21.8; 1921-25, 19.9; year 1926, 17.8.

The majority of reviewers of the vital statistics find consolation in the fact that the 'survival rate'—that is the births minus deaths—is still on the right side. This argument is all very well so long as the death-rate re-

Ailing Men and Women Need This Tonic

Poets sing of Spring, but practical-minded people, everywhere, turn at this time to the Doctor and the Druggist for help to build up run-down constitutions. And no better remedy can be taken than Buckley's TRU-BLOOD.

TRU-BLOOD, as its name implies, is a true blood tonic and a safe, sure, powerful corrective for all blood disorders, and rheumatic conditions as well.

But "TRU-BLOOD" is more than a blood purifier—it eradicates the outward evidences of impoverished blood, such as pimples, boils, eczema, blotches and all other skin affections.

Buckley's OINTMENT, used in conjunction with Buckley's TRU-BLOOD, heals magically and leaves the skin smooth and soft.

Especially during the adolescent age, pimples and various forms of skin eruptions are likely to appear. They mar the complexion and cause untold anguish. The combined TRU-BLOOD and Buckley's OINTMENT treatment promptly corrects the condition and leaves the skin clear, smooth and colorless.

Most druggists can supply you with these proven Buckley products.

Tones the Blood

Unable to support properly his wife and nine children on the wages of a blast furnaceman, and discouraged by conditions in the Old Country, Thomas Booth of Scunthorpe, Lincs., looks to Canada to give him a return more commensurate with his labors. Having had considerable farm experience he decided to emigrate and he arrived in Canada this week on the White Star Liner Calgarie. He will work a farm at Emo, Ont.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child.

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. The Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

OWL LAFFS
(ON WHAT'S LAUGHING)
First Twin—"What's the big idea? Setting on my husband's lap and necking with him."
Second Twin—"Don't blame me, Sis. I told him I wasn't you but he wouldn't believe me."
Sweetly Mated.
A license was issued for the marriage of Ebenezer Sweet and Jane Lemon. The inquiring reporter who got hold of the copy had a rhyming as well as inquiring instinct and he wrote it up: "Behold how great extremes do meet in Jane and Ebenezer; For Jane's no longer sour but sweet, And Eb's a lemon squeezer."

The only time a horse gets scared nowadays is when he meets another horse.

"What's the difference between a Scotchman and a cocoanut?"
"You can get a drink out of a cocoanut."

A shapely girl's idea of having good taste in clothes is to have a little of herself in them as the law will allow.

With a million or more laws and ordinances on our statute books now and with all the state legislatures and other law-making bodies busy grinding out more, why not adopt the Golden Rule, and scrap about half of the others?"

There may be splinters in the ladder of success, but you aren't likely to notice them until you're sliding down.

Don't throw away your old necktie. Possibly the Missus may want to make it over into a modern skirt.

Ten-year-old Richard had rescued a pal who had fallen through the ice while skating.

"Think what would have happened, Richard, if you had not had the courage and the presence of mind to pull him out!" exclaimed the rescued lad's mother gratefully.

"Yes," replied Richard feelingly, "I'd have lost my new skates. He had 'em on."

Son—"Daddy, who was Hamlet?"
Daddy—"Aren't you ashamed of your ignorance? Bring me the Bible and I'll show you."

Over \$1,500,000,000 is at present invested in the motion picture industry. Where did all that money come from? From your pocket and mine, of course.

Grocer—"Who broke the window when I was out?"
Delivery Boy—"The butcher did, sir. He ducked when I threw a potato at him."

Minard's Liniment for Toothache.

Value of Shelterbelts
The planting of shelterbelts on prairie farms in Western Canada has given appreciable results from an agricultural standpoint. The water-conserving power of the soil has been increased; better crops have resulted; and the protection from extremes of temperature and wind movements has enabled the introduction of the harder fruits in many localities. Of particular importance is the additional moisture secured through the formation of snow drifts which, melting gradually in the spring, provide water after adjoining treeless areas have largely dried up.

Large Area of Forest Land
Of the total non-agricultural area of Canada about one-half can be made to produce timber crops if permanently dedicated, protected, and managed to that end. Investigation show that the only economic use for one-third of the land area is in the growing of wood.

In clean, bright Aluminum.

Chinese Armies Open Offensive

Yenchowfu Invested by the Nationalist Troops, Says Gen. Chiang Kai-shek

Nanking, China.—The spring offensive of the Nationalist armies, with Peking, ancient capital of the Manchus, as its goal, has got under way with a rush.

From the theatre of war stretching from the southern tip of the Province of Shanai to the coast, where almost three-quarters of a million men are in arms, has come the first word of fighting—an official communique from Hsu-chowfu, Nationalist headquarters, reporting the capture of two important key cities in southern Shaning.

The communique, sent from the headquarters of Chiang Kai-shek, Nationalist Commander-in-chief says that Yenchowfu on the Tientsin-Pukow Railway line and Ichowfu, on the Li Ho in southeastern Shangtung, have been invested by the Nationalist armies. Yenchowfu is approximately 70 miles north of the battle line which existed at the beginning of the spring offensive on April 7, while Ichowfu is about 35 miles north of that line.

Shanghai.—With the advent of spring, the long-talked-of Nationalist offensive against the north, in which probably 750,000 men will be engaged, has opened on a 400-mile front and is rapidly advancing.

Minard's Liniment for insect bites.

Uses Made of Our Timber
Of the total of 2,500,000,000 cubic feet of standing timber cut in Canada annually during the period, 1922-6, the proportions put to various uses were approximately as follows: fuel-wood, 35 per cent; lumber, etc., 29.8 per cent; pulpwood, 21 per cent; railway ties, 7 per cent; shingles, 2.5 per cent; posts, poles, mining lumber, logs, and square timber exported, 4.7 per cent.

WOMAN SO SICK COULD NOT WORK

Helped by Taking Lydia E. Pinkham's Vegetable Compound

Grainland, Sask.—"I am glad that I heard of that good Lydia E. Pinkham's medicine and I will not be without it again. I was so sick that I could not work at all and could not sew on the machine. My aunt told me of Lydia E. Pinkham's Vegetable Compound and I am telling all of my friends how good it is and I will answer all letters I get from women."
—MRS. MARY SCHULTZ, Grainland, Sask.

LEONARD EAR OIL

An ear oil of great benefit in cases of Catarrhal Deafness and Head Noises. Simply Insert in Nostril and Rub in gently back of Ears. Soothing and Penetrating. On the market since 1907, and many thousands have written of the relief obtained. This treatment is recommended by Dr. John Bergerson, the eminent Ear Specialist. Price \$1.25 at drug stores. Folder about "Deafness" on request.

A. O. LEONARD, INC.
70 Fifth Avenue, New York City

Indigestion

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after effects. Once you learn the fact, you will never deal with excess acid in the crude ways. Go learn now—why this method is supreme. Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

PHILLIPS' MILK OF MAGNESIA

For Troubles due to Acid Indigestion ACID STOMACH HEARTBURN HEADACHE GAS-NAUSEA

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude herbs. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.
