# Surplus Herds

Indefinitely

How to take care of the natural increase of Canada's buffalo herd. which is 14,000 strong, is becoming a serious problem. Zoological gardens take a few bison, but the market for such specimens is extremely limited. and the Government herd is increasing at an alarming rate. It has been decided therefore to ship the animals in large numbers from the buffalo park at Wainwright, Alberta, to the forest wilds of the Far North. recent bulletin of the Department of Natural Resources at Ottawa sheds some light on the problem.

In 1907, according to a recent Ottawa bulletin, the Canadian Government acquired the nucleus of its present herd of bison, and enclosed the animals in a fenced area, 13 by 15 miles in extent, near Wainwright growth of the herd, it was decided to transfer as many as possible to Wood Buffalo Park, in the forest fastnesses of the Great Slave Lake region. Now there are about 9,000 buffalo at Wood Buffalo Park and about 5,000 left in the fenced park near Wainwright. It your care cannot prevent them. has been decided that the moving of you can be prepared. Then you can the animals to the Far North will have do what any experienced nurse would to be continued indefinitely.

sands of buffalo, while the United Castoria. No sooner done than Baby States virtually has none, begins in is soothed; relief is just a matter of laws—and strict laws—for experience 1907, when the sole remaining speci- moments. Yet you have eased your and personal observation have taught mens of bison were in the possession child without use of a single doubtful of a man in Montana, named Pablo, drug; Castoria is vegetable. So it's Pablo's herd totaled 706. He made safe to use as often as an infant has an offer to the United States Govern- any little pain you cannot pat away. ment, but Washington was slow to And it's always ready for the crueler take action. In the meantime, Sir pangs of colic, or constipation, or diar-Wilfrid Laurier, then Prime Minister rhea; effective, too, for older children of Canada, learned of the bison herd Twenty-five million bottles were and thought it would be a fine thing bought last year. to obtain it for Canada, so that the historic buffalo, which had played such a large part in the pioneer life of the whole continent, might be preserved for posterity Accordingly he authorized an offer to Pablo, which the latter accepted. The Canadian Government agreed to pay \$250 per buffalo for the entire herd. It took Pablo three years to round up all the animals and ship them to Edmonton,

Now the problem seems to be to prevent the herd's becoming too numerous. The transfer to Great Slave Lake, continued indefinitely, will mean a large herd roaming through undeveloped country, for the animals thrive there in company with a few "woodland type" buffalo which have never quite disappeared.

### Ford Will Outdo Last 20 Years in Next Five, He Says

Stresses Value of Men Over 50—Regards Profits as Trust From Uublic

Detroit.-Henry Ford expects to do more in the next five years than he has in the last twenty, he told visitors who came to congratulate him upon his sixty-fifth anniversary. Mr. Ford was in optimistic mood and made it clear that he had not yet found his "age limit."

Mr. Ford believes the judgment and experience of men over 50 are essen-"You take all the experience and judgment of men over 50 out of the world and there would not be enough left to run it," he said.

"Youngsters have their place and are necessary, but the experience and judgment of men over 50 are what give purpose and meaning to younger men's efforts.

Mr. Ford spent the day as he spends most days-in making the rounds of his various plants in the Detroit area and otherwise concerning himself in the activities of his interests here.

Some one asked Mr. Ford how much money he had lost in making the change from the model T to the model A car.

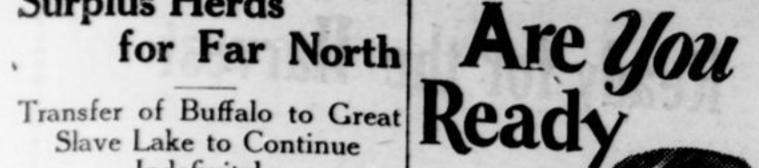

"Who said I had lost anything?"

"We can't lose what doesn't belong to us," he went on. "The profits we made on 15,000,000 model T cars was not our money. The public paid it to

"The money profits came from the people and we look upon them simply as a public trust which must be put back into the manufacture of something that will help men and women to live better and more productive

A couple of students on a vacation trip through Scotland frequently stopped at small farmhouses for a drink of milk, the usual charge for which: was tuppence a glass. Calling one Sunday at a cosy cottage they were sourly received by the cotter's wife. Though the milk was supplied, the proffered tuppence a glass was refused, with a solemn admonition as to the impropriety of buying and selling on such a day. The young mon were about to continue their tourney when meaning clear. Liva, na," she cried. no break the Sawbath for less than sixp nce apiece."

Seedsman (to customer looking at picture on seed packet): "Very rich color, that, sir." Customer: "Umyes-clever fellows, artists!"

### The Color Problem in South Africa

Round Table (London): The native in South Africa will slowly penetrate into the higher ranks of labor and establish a claim to equality of economic opportunity with the white man. . . . There are many who fear and oppose the doctrine of economic equality, for they see in it the road to social and political equality-not in the immediate future, perhaps not for five or ten generations, but in end inevitably. With social equality they see the extinction of the white race, with political equality the disappearance of white ideals. . . They fear that five hundred years from now Sir Rarry Johnston's

prophecy may have justified itself and t may have been shown that the colonization of Africa by alien peoples produce a compromise-"a darkskinned race with a white man's features and a white man's brains." ' ' But what the dim future may hold no one can now usefully predict.
