SWALLOWED UP

By Mrs. Wilson Woodrow
Illustrated by R.W. Sattlerfield

BEGIN HERE TODAY

Hope Ranger is held prisoner in a sanitarium conducted by a group of criminals called the "Combine." Alderman Higgins is head of the organization and Dr. Bristow is superintendent of the hospital. Anita Copley, nurse, is in love with Bristow. Dr. Kelsey, another prisoner, becomes friendly with Hope and together they escape in Bristow's car. Hope is recaptured and Kelsey and Jurez Charlie, adventurer, repeat to send word of Hope's whereabouts to Ranger. Higgins tells Bristow that Hope must be killed. The doctor goes to the girl and offers to help her to escape. In a fit of jealous rage, Anita Copley kills Bristow and Hope walks from the sanitarium in Nurse Copley's uniform.

NOW GO ON WITH THE STORY

"I was just coming after you, Anita," she said. "Lovely night, you've picked to go out."
"Yes, and I'm late into the bargain," Hope answered, imitating as well as she could Miss Copley's voice and mannerisms.

Without stopping, she hurried on. Through the wide hall-door she saw the drenched lawn, the trees gray and unsubstantial in the heavy mist that was driving in from the sea. Thank heaven! The car was waiting.

Her eyes fixed on this welcome sight, she crossed the parquetted floor. "Wait!" bade a heavy cracked voice. She looked up startled to see the tall, bowed figure of Higgins. "Not so fast, my dear."

He gripped her arm, and slipped his own through it. Then leaning heavily on her shoulder, he forced her to step with him as he hobbled across the porch.

"Right down the steps now, and into the car. What made you so late, Anita?"

Hope mumbled an unintelligible response, and glanced wildly about her. What was before her now? The car, she saw, was not Bristow's but Higgins'. His chauffeur and valet sat on the front seat in their oilskins, the heads pulled down over their heads.

With a firm step she walked down to the driveway and entered the limousine. Higgins followed, and slammed the car door.

He picked up the speaking-tube and gave an order. Immediately they started. The gates were opened to them, and they rolled through.

Hope leaned back. A deadly faintness had come over her, when she heard that order. They were not going to town. The road he had mentioned led off through the sand and scrub-oak to the island.

Uncertain what to do, she looked through the window and saw that they were approaching one of the loneliest spots on the island.

Higgins lifted the speaking-tube again, and ordered the chauffeur to turn down a road even more unfrequented than the one they were traveling.

But instead of complying, the car was stopped; there was a word or two between the valet and the chauffeur, and then the valet jumped down and came around to the side.

Higgins grunted and swore. "Can't you damn fools understand plain English?" he asked as the valet

WRIGLEY'S

The cool, comforting flavor of WRIGLEY'S Spearmint is a lasting pleasure. It cleans the mouth after eating—gives a clean taste and sweet breath. It is refreshing and digestion aiding.

opened the door. "What the hell you stoppin' for?"
"You've said it!" The valet pushed the muzzle of an automatic against the old man's chest. "It's hell, and going to be for you from now on. Hands up!"

Hope gave a cry, and stretched out her trembling arms. The man in the valet's oilskins was Kelsey.

CHAPTER XXIX.

Calling to the chauffeur, who had also swung down and was now at his elbow, to keep his gun on Higgins, Kelsey sprang into the car and gathered Hope in his arms.

And as if to confirm the dream-like character of the affair, on top of the valet's abrupt transformation into Kelsey, the chauffeur at the door disclosed the lean, dark face and spoke with the devil-may-care drawl of the motor-cyclist Hope had sent for a doctor the night before.

Higgins seemed unable to comprehend. "Adolf! Bennett!" He called the names of his valet and chauffeur. "They've sold you out, old-timer. The rats, as usual, deserted the sinking ship."

"Humph! And who are you?" He peered from one to the other with his dim-sighted eyes.

"Nobody in particular, Bill. Just Lavez Charlie and George Kelsey."
"Hold on there!" he interrupted the little flourish of this announcement as Higgins involuntarily dropped his hands. "Keep those hooks up above your head. Kelsey, frisk him."

He waited to see that the search was thoroughly made. No weapon was found on Higgins' person; but still not content, Charlie himself care-

The valet pushed an automatic against the old man's chest.

fully investigated the lining and cushions of the car, and as an added precaution made the old man change places with Hope.

Higgins slumped down in his corner of the car, seamed grimly to have accepted the situation. Hope's breath was coming in long, broken sobs; she was trembling violently from head to foot.

"Don't try to be calm," Kelsey urged. "Let yourself go, dearest. Cry, if you can. Everything's all right now. Jurez Charlie's driving, and I am here with you."

"But how? How?" She clung to him. "He told me that you were at the old house."
"Who told you that? The old man here?"

"No, no. It was Dr. Bristow—before he was killed."
"Killed?" Kelsey cried.

"That clear, practical brain of hers was once more proving itself superior to the weakness of the flesh. With marvelous stendid noise, and with scarcely a quaver in her voice, she went into all the details, the quickly shifting scenes of that crowded half-hour."

Higgins leaning forward, his ear bent to catch every word, neither interrupted nor made any comment.

Charlie, driving steadily ahead, was turning over the information in his mind, wondering what effect if any this might have on their program; for Kelsey had lowered the sash between them, so that he might overhear Hope's story.

"Lucky thing, Jurez," Kelsey turned his head and spoke to Charlie, "that we decided to play your hunch."
Charlie nodded, looking straight before him; to drive through a thick

night requires one's undivided attention.
"After Morton had met us secretly," he went on, "I could see that Charlie was not entirely satisfied."
"Kelsey," he said, "I'm figuring on taking a chance. Did you hear me asking your friend about the menials that're closest to the noblesse over at the sanitarium?"

"I had; and it provoked me that he should be fiddling around with such irrelevant details, when time was so important."

"But he soon showed me that he had a reason for it. That chauffeur of Hobo Bill's," he said, "Slim Bennett, is an old acquaintance of mine, although I didn't tell friend Morton so. It strikes me, Kelsey, that it might be a good thing to hook up with Slim—dangle immunity from arrest and a bunch of jack before his eyes, and see what happens. Hang it! I can't feel sure in my bones of this Morton passer."

"I agreed to that," Kelsey said, "but I wanted to know what sort of a fellow this Bennett was. 'Can you trust him?' I asked."

"Sure, Gorgio. All we've got to do with Slim is to convince him that ole Marse has lost out."

"But how can you get in touch with him?" I asked. "Are you going to take the risk of telephoning again?"

"No," he said, "I can beat that, he told me. 'There's a kid fooling around down there in the woods; I've seen him several times from the window. I'll get hold of him, and have him carry a message. Here, give me a pencil and some paper.'"

"It struck me as a rather risky thing to do. A note might so easily fall into the wrong hands. But when I pointed this out to him, he only laughed."

"Nobody's going to read this," he said, "except the man it's intended for, unless it might be Higgins himself and we'll have to run that risk."

"I saw what he meant, when he showed me what he had written. One could hardly call it writing at all; it was just a few cross-cross lines, with a rude drawing of a combination safe below them."

"Jurez elucidated the cryptogram for me. 'That's hobo language,' he said, 'and it tells Slim that his brother Ed is waiting to meet him along this road. Ed is a yegg peterman—that's a safe-blower—and that picture of a safe down there is his moniker. It's a pitch that will bring Slim sure.'"

"He sneaked out then, and found the boy, gave him a dollar to carry the note, and came back to wait. It wasn't more than an hour afterward that we saw Bennett coming down the road. Charlie let him pass, and then by making a quick detour through the woods intercepted him."

"He came back as shining as a May morning."
"Hoot, laddie!" he cried. "That's the bravest little hunch I ever knewed. Slim fell on my neck and wept happy tears, when I crossed his palm with a bond. The valet, Adolf, he says, is suffering from a bad case of the shakes. Adolf, it seems, was all of a twitter this afternoon, and tipped Slim off that there was a big ruckus on between the three heads. From what he gathered by the keyhole route, the bottom is dropping out of all their plans. Also, Adolf learns that Higgins is fixing to stage a final automobile accident tonight, which of course would have to be handled by himself and Slim; and the prospect of taking a chance on the chair doesn't appeal violently to either of them."

"Then, without any warning of what was coming, Charlie shot at me: 'I've arranged for you and me to take their places tonight.'"

"Nothing could have suited me better. We were going to do something at last."

(To be continued.)

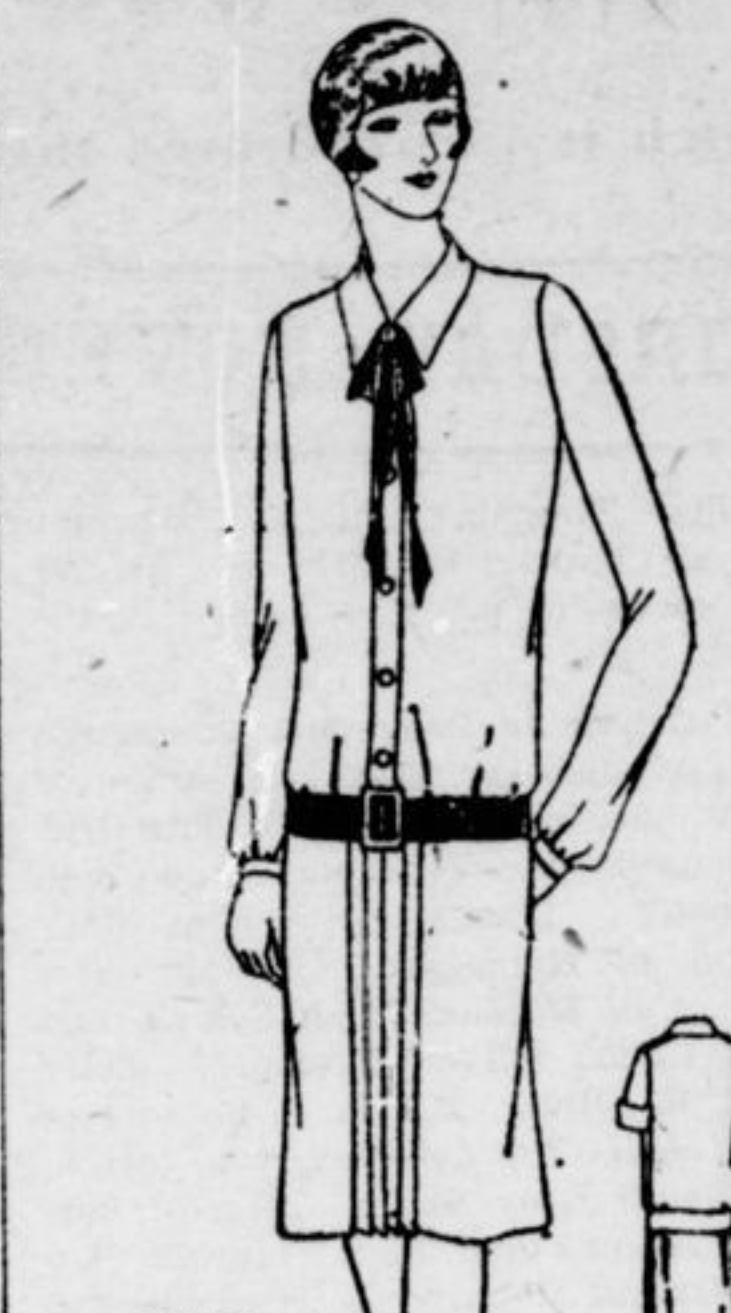

He: Why do they call this "Lovers' Leap?"
She: Because men who are disappointed in love jump over it.
He: Well, ain't they all disappointed sooner or later?

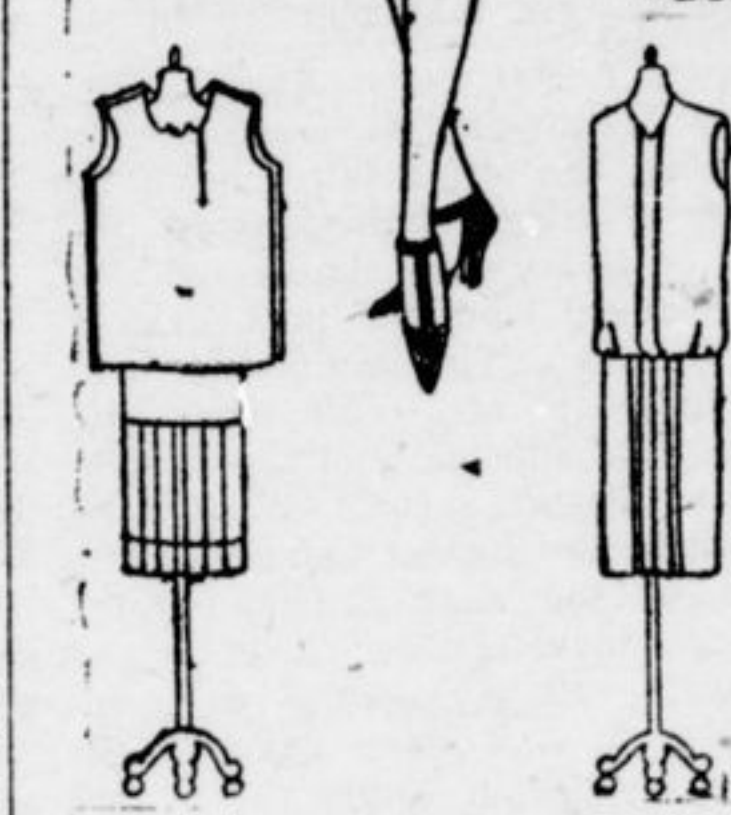

Knows His Janes
Wife—"Remember now, meet me at the Biltmore for lunch at twelve."
Lawyer—"Very well, dear, but please be there by one, as I have an appointment with a woman client at three and can't wait any longer than two, if I am to meet her at four."

TAILORED SIMPLICITY

A simple tailored dress of sheer tweed or wool jersey either plain or printed—a type every woman needs so much for general utility wear—is illustrated in Style No. 282. The slightly bloused bodice has an applied band at centre-front which is interesting made of contrasting color or fabric. The grouped plaits in skirt combine with applied band or bodice, to carry out vertical line, so essential for smartness. The turn-over collar with pert bow tie is decidedly youthful. Printed velveteen, crepe velvet, sheer rayon printed velvet, crepe satin, flat silk crepe, canton-faille crepe, crepe, and wool crepe are unusually attractive for this snappy sports model. Pattern in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Price 20c in stamps or coin (coin is preferred). Wrap coin carefully.

HOW TO ORDER PATTERNS.
Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred); wrap it carefully for each number and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by return mail.

Annoying Bugs

River Jungles of Bolivia Hold Plague of Malignant Insects

In the jungle along the River Beni, in Bolivia, are found some of the most malignant blood-sucking insects in the world.

Here lives the apasana, a bird-eating spider, attaining a length of from eight to ten inches, whose poisonous bite is sometimes fatal. It has a body resembling a ball of wool, with black hairs on its body and red ones on its legs. Its eyes are black and quick moving, with a most malevolent expression. It is very active and jumps about two feet at a single bound.

The palo santo ant, a fire ant, which lives in hollow-stemmed trees, is common here. A touch on this tree brings down a shower of the ants, whose bites feel like red-hot coals, the sting lasting for hours.

Other plagues are the zaputana, an almost invisible insect which lies in the grass, bites the legs of men and causes an almost intolerable itching; the guanaco, a bug which lives in the sand and whose bite is usually fatal; the baregul, a sand fly with a painful sting; sweat bees, which suck the perspiration from the hair; the anopheles or malaria-carrying mosquito, and wasps, ticks and jiggers.

Minard's Liniment for Asthma.

To Raze St. Lazare Prison

In the three-cornered struggle between French antiquarians, the Ministry of Justice, and humanitarians and hygienists, the last have won, and the Ministry having failed to suggest improvements to their satisfaction it has reluctantly consented to the demolition of the notorious women's prison of St. Lazare at the junction of the Rue de Faubourg and the Boulevard de Magenta, Paris.

The old prison, some buildings of which date back to the twelfth century, was first used as a leper hospital, then as an abbey, and then as a seminary—all before the French Revolution. During the Revolution it was used to house debtors and political prisoners—some quite famous.

It became a women's prison in 1868, and at one time it had fewer than 7,822 women crowded in its tiny cells and stuffy dormitories. Within recent years it guarded, while awaiting trial, the beautiful Mme. Steinheil alleged to have been perpetrator of the "studio crime"; Mme. Caillaux, wife of the former Premier, who slew Gaston Calmette in the office of Le Figaro, and the Anarchist girl, Germaine Berton, who shot down Marius Platcau in the office of Leon Daudet.

The principal defenders of the old prison have been the antiquarians; its principal enemies, the hygienists. Some months ago the latter succeeded in having the Ministry remove all the prisoners to other places of detention.

Now M. Paul Fleuret, President of the Conseil General of the Seine Department, has submitted a proposal that the site of St. Lazare should be used for a new boys' school. This the Government has accepted, transferring the historic edifice to the Ministry of Education, which will immediately begin its demolition.

FOR NEURALGIA

ASPIRIN

You doubtless depend on Aspirin to make short work of headaches, but remember that it's just as dependable an antidote for many other pains! Neuralgia? Many have found real relief in an Aspirin tablet. Or for toothache; an effective way to relieve it, and the one thing doctors are willing you should give a child—of any age. Whether to break up a cold, or relieve the serious pain from neuritis or deep-seated rheumatism, there's nothing quite like Aspirin. Just make certain it's genuine; it must have Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Huge Guns Guard Singapore Port

Britain to Mount Largest Weapons in World at Strategic Naval Base

Singapore.—Three eighteen-inch guns, on the way here from England, will make this great British naval base in the Pacific Ocean one of the most heavily fortified spits in the world.

These gigantic weapons, which are about sixty feet long, weigh nearly 150 tons each and fire projectiles which weigh 3,333 pounds, are the biggest guns in existence. Their immense range and destructive power will be able to keep any warship now afloat at a respectable distance. There is no battleship in the world with guns of more than 16-inch calibre.

The guns, which are being shipped here by ordinary cargo steamer, were constructed experimentally during the World War. One of the guns was mounted on the 19,000-ton cruiser Furious, one of the warships designed by Lord Fisher for his projected naval campaign in the Baltic Sea.

Originally, the Furious was to carry two of these guns, mounted fore and aft, but an airplane deck was constructed in place of the forward turret.

When the ship was completed and the aft gun was fired a few times the concussion was found to have been so great that it had badly damaged the ship. The British Admiralty then decided to mount the guns on the monitors Lord Clive, General Wolfe and Prince Eugene for use in bombarding the German positions on the Belgian coast. The war ended, however, before they could be thus employed.

The monitors were thereupon discarded, and the War Office still had the monsters on its hands. Only recently did the British naval authorities decide to use them for the defence of Singapore. As the guns have seldom been fired, there still exists a large reserve of ammunition on hand for them.

Also on the way here is the largest floating dry dock any British warship. It weighs 50,000 tons and contains 20,000 tons of steel. It is being towed here from England. Recently it passed through the Suez Canal.

Singapore is an important spot on the maps of the general staff of the British navy. Standing between Japan and Australia and just opposite the Philippine Islands, in effect it guards the eastern trade routes of the British Empire and provides a potent base from which British fleets could operate, take on supplies of fuel and food and effect repairs in time of war.

New Sugar Is Discovered In Residue of Dahlia Tubers

Washington.—Discovery of a new sugar in the juice of dahlia tubers is announced by the United States Bureau of Standards.

It was discovered during tests to find out the structure of insulin, which is a starchlike substance found in the dahlia juice. About 92 per cent. of this juice was resolved into the already known sugar called levulose or fructose, but the remaining 8 per cent. was a mystery.

This residual substance was subjected while in syrup form to a light polarization test. Fructose when given a similar test rotates the polarized light to the left, but this unknown syrup rotated it to the right. Other tests reduced it to crystalline form, which the announcement says is a sugar that has "never hitherto been isolated."

Britain Recovers

Cape Argus: The relations between Labor and Capital are better than they have been for years past and hold out the promise of more effective co-operation in the future. Nor should it be forgotten that that indomitable spirit which enabled Britain to see the war through to a triumphant issue still survives; and that the potential resources at her command are unequalled by those of any other nation with the possible exception of America. One does not hear overmuch about the steps which have been taken by the British Government to develop the resources of the Crown Colonies and dependencies. But they are none the less of far-reaching importance, and if they bear the fruit which is to be reasonably expected, the British people will discover that once more a new world has been called into existence to redress the balance of the old.
