#### Scottish Nationalism

London): Whether or not the Scottish Nationalists will increase and thrive remains to be seen. Certain it! is that the party numbers among its disciples vast numbers of the younger intelligentzia. "It is, indeed, so much a party of youth that older people not unnaturally regard it with suspicion, believing its adherents in most cases to be self-seekers, using it as a short cut to political power. Sir Robert Horne doubtless had this in mind when he spoke of the triumph of Nationalism as bringing "an increase of pride to the breasts of the parochialminded." Herein, I think, lies the crux of the whole question. Is national pride-a fine thing and in no way related to parochialism-at the bettom of the Scottish Nationalist Pressure Reverses roots in a baser soil? Will the dissension caused by the propagation of the Nationalist aims be justified ultimately by an era of increased peace and prosperity? These are the questions perplexing the minds of thinking men and women of Scottish blood all over the world today.

#### Modern Values

Edith Sitwell in the Spectator (London): Money has no relation to life at present; it has no relation to anything real; it has no true relation to the things which it buys. It has got outside human control altogether; it is a Frankenstein monster dominating the unhappy world which created it. Where Charity once spread a cloak which was permitted to cover venial faults, this Frankenstein monster now offers the one garment which is allowed not only to cover, but to glorify, any kind of mortal sin. Nothing matters if you can spend more money than your neighbor; and if you can spend it in such a way that noone who really needs it benefits by it then so much the better.
