Prof. Howe Tells 'Em

Toronto Forestry Expert Tells the United States a Few Plain Solid Truths

Hanover, N.H.—Criticism of the rapid depletion of United States forest reserves, as compared with Canada's careful husbandry of her timber, was made in a candid paper read by Dr. C. D. Howe, director of Forestry School of the University of Toronto, before the annual New England Forestry Conference here.

"Canadians," said Dr. Howe, "are a very conservative people. They cannot be stampeded into hasty action by economic pressure. They build slowly because they are more interested in the character of the foundation than in the size of the structure. They do not worship bigness simply because it is big. This leads to a misunderstanding of us in trade relations by the people of the United States, and the United States is open to the charge that, having depleted her own natural resources, nearly to the point of exhaustion, she believes she has the right to go to other countries and repeat the process.

"It is not my intention to criticize the United States tariff regulations as applied to Canada," said Dr. Howe. "Canada is the United States' best customer, but she is being alienated by what seems to be short-sighted tariff regulations. These restrictions will in the long run be of benefit to the Canadians because they are developing our home industries and leading to greater trade with other parts of the Empire."

Dr. Howe said that Canada had already been compelled to prevent the exportation of pulp wood, which had made it necessary for American capital to move into Canada, and that in a short time the New England hardwood manufacturers would also be compelled to move across the border. "Canada has its virgin forests, and it intends to preserve them," he said. "It will use proper forestry methods.

In Ontario alone we have set aside four townships for experimental purposes, we plant 16,000 acres of white pine annually, and we are greatly interested in the regeneration of spruce on our cut-over areas."

The forestry conference, which was largely attended by foresters and educators from the New England States and Canada, met to consider New England's timber supply, especially with relation to Canadian resources. Papers were read on state taxation, regional zoning, the problem of preserving the scenic beauty of highways, reforestation and allied topics.

USEFULNESS

We sometimes wonder of what use we are, and why we are put on earth. One day is added to another and we seem to be no farther advanced on the pathway or our lives. As Mark Twain would have put it, we do not appear to be gaining on the scenery. Yet there is room in the world, and need in the world, for each and every one of us, and therefore we must keep on going to the end. Emerson has a poem in which the squirrel takes to the mountain and says: "If I cannot carry forests on my back neither can you rack a nut. You can do something nobody else can do; namely, live your life. You have your chance, if you will only take it, and I have mine. If we can do nothing else we can at least be someone's friend, and there is nothing that the world more keenly wants and more sadly needs.

GOOD MEN

Nature seems to exist for the excellent. The world is upheld by the veracity of good men; they make the earth wholesome. They who lived with them found life glad and nutritious. Life is sweet and tolerable only in our houses, and every circumstance of the day recalls an anecdote of them. R. W. Emerson.

The Affair at Flower Acres

by CAROLYN WELLS

BEGIN HERE TODAY:

Douglas Raynor is found shot through the heart in the early evening on the floor of the sun room of Flower Acres, his Long Island home. Standing over the dead man, pistol in hand, is Malcolm Finley, former sweetheart of Raynor's wife, Nancy. Eva Turner, Raynor's nurse, stands by the light switch. Then Nancy, her brother, Orville Kent, Ezra Goddard, friend of Finley, Miss Mattie, Raynor's sister, and others, enter the room. Detective Dobbins is official investigator. Lionel Raynor son of Douglas Raynor by first marriage, comes to claim his father's estate. Nurse Turner, arrested in New York, confesses that she attempted to poison Douglas Raynor for revenge. But the shooting remains a mystery and Pennington Wise, a celebrated detective, is called to take charge of the case. With him is his girl assistant, Zizi.

Now go on with the story. Eva Turner looked dumbfounded. "You see," Wise went on, "Miss Turner noted the frightened face of Mrs. Raynor, although she swears that Mrs. Raynor was going out of the door—fleeing—I believe she said. A person doesn't flee backward. Now, Mr. Finley, for your account of this moment. You entered at the east door—after you heard the shot?"

"Yes," said Finley shortly. He was not gruff or annoyed, but he felt as if he were to be tripped up unless very careful, even though telling a straight story. "You were inside the sun parlor before the light flashed up?"

"Yes." "You had involuntarily picked up the revolver before the light appeared?"

"Yes." "How could you see the weapon?" "It was dark—entirely dark, and the metal shone clearly." "Yes, it would. You could see Mr. Raynor?"

"As a huddled heap on the floor."

SHE SPOKE LIKE ONE HYPNOTIZED. "I SAW—I WON'T TELL YOU WHAT I SAW!"

Seeing the pistol, I knew what must have happened, and I picked it up—"Yes, I know, and then the light came and—here is the point, you glanced at once toward Mrs. Raynor?" "No—or, I don't know," Finley spoke slowly. "I should say I looked first at Mr. Raynor—naturally he caught my attention."

"Of course—of course," Wise assented, "and then?" "And then—oh, I don't know! I suppose my eyes glanced round—" "Try to think—your eyes glanced round and you saw Mrs. Raynor—" "Going out or coming in at the west door?"

Finley fidgeted. It was one thing to tell a glib tale to Dobbins and quite another to meet these clear blue eyes with an indefinite statement. "I don't know," he said, at last, desperately; "I should say she was just standing there—neither going out nor coming in."

"Certainly not 'fleeing' then," Mr. Wise nodded. "You saw her face, Mr. Finley?"

Again Finley pauses. "Mr. Wise," he said, "I cannot say. I was so startled by the occasion, and also so blinded by the sudden light, that I cannot say whether I could see Mrs. Raynor's face or not."

"That will do, Mr. Finley," Wise looked at him contemptively. "You are uncertain because you want to be. You are uncertain of what to say—rather than as to what you saw. You are trying to think what will be best for Mrs. Raynor's interests."

"If I say which, I shall certainly say my own—for I have no reason to suspect any one else."

"Did you shoot Mr. Raynor?" "I am not obliged to answer that question, as you will know, Mr. Wise." "And you prefer not to do so?" "Now, as to the mark of the crescent shoe on the floor." The detective seemed to jump from one subject to another easily. "Who saw it?"

"I did," Miss Raynor vouchsafed. "The other detective showed it to me. He said it was a clew."

"It is," Wise said gravely. "Was it a whole print of the sole?" "Oh, no; just a partial print—of one side of the rubber."

"Which side?" "Let me see, now," Miss Mattie was called and a little flustered. "Why it was the right side of the right foot—yes, that was it. I looked at it most carefully. It was positively the print of a new overshoe; it was on the floor between the two rugs, and—why, I could draw you a picture of it! It was the clear, full print of the right side of the right foot."

"Are the rights and lefts of overshoes so clearly defined?" asked Goddard.

(To be continued.)

Herd of Reindeer Makes Long Trek

Big Step Towards Raising Food Supply in Mackenzie Basin

Vancouver—Canada's reindeer industry takes a big forward step this year with the trek of 3,000 northern animals from Alaska into the Dominion. In November this herd, secured by Canada from the United States herds in Alaska, will begin a trek which will take 18 months and will land the animals, in 1921, on the Arctic coast east of the Mackenzie River.

A. E. Forslid, botanist for the Northwest Territories Branch, Department of the Interior, at Ottawa, is on his way to Nome, whence he will go by ship or airplane to Kotzebue for the start of the movement. Forslid went from here to Seattle to meet Ralph Lomen, head of the Lomen Reindeer Corporation which has the contract of delivery to the Dominion.

The deer will be driven by easy stages to Kattigauit which is the destination, where corrals and buildings will be built. It is estimated the herd will double itself in three years.

The deer, it is hoped, will take the place of cattle in supplying Eskimos with food. A reindeer is worth about \$25, and Canada's new herd is declared to be a profitable investment. Cost of the animals and their 18-month migration will be about \$200,000.

From a herd of 1,250 Siberian reindeer, brought into Alaska at a cost of \$300,000, the United States has developed a stock of a million animals, Canada, it is believed, can duplicate that.

Fiscal Imperialism

Glasgow Herald (Cons.): A good deal of misunderstanding of the Dominion position in this matter is due to the fact that many people at home fail to take account of the rise of overseas manufacturing interests. They persist in viewing the "new" countries as almost exclusively occupied in primary production. They fail to see Sydney for sheep stations, and Toronto for wheat fields and apple trees. They forget that manufacturers in Australia and Canada are faced with competition from manufacturers at home and are convinced that a measure of protection is essential to their salvation and survival. We may consider them wrong-headed or we may not, but we are compelled to take account of the attitude as a fact and not to advance ideal theories as if competition did not exist.

Make Better Bread Ask your grocer for ROYAL YEAST CAKES

STANDARD OF QUALITY FOR OVER 50 YEARS

A HIGH CALLING

The highest occupation of genius is to diffuse useful information, to further intellectual refinement—a sure forerunner of moral improvement—to hasten the coming of that bright day when the dawn of general knowledge shall chase away the lazy, lingering mists, even from the base of the great social pyramid. This indeed is a high calling, in which the most splendid talents and consummate virtues will press forward to bear a part.—Brougham.

Kill that corn with Minard's Liniment

LIFE

And life is thorny, and youth is vain, And to be wroth with one we love Doth work like madness in the brain. —S. T. Coleridge.

AN IDEA

There is only one thing stronger than armies and that is an idea whose time has come.—Victor Hugo.

A Little boy at his Scripture lesson said: "Please, teacher, was Pontius Pilate of an airship or a liner?"

NEVER wait to see if a headache will "wear off." Why suffer when there's always Aspirin? The millions of men and women who use it in increasing quantities every year prove that it does relieve such pain. The medical profession pronounces it without effect on the heart, so use it as often as it can spare you any pain. Every druggist always has genuine Aspirin tablets for the prompt relief of a headache, colds, neuralgia, lumbago, etc. Familiarize yourself with the proven directions in every package.

ASPIRIN

Aspirin is a trademark registered in Ontario

The Most Beautiful BLACK you have ever seen

THE most beautiful black you've ever seen! "All my friends admire my new black silk!" "The coat I bought was hopelessly spotted, is now a new, beautiful black!" These are typical comments from women who have used these true, jet black dyes.

Diamond Dyes

Sun Proof

EASY TO USE—BETTER RESULTS

Diamond Dyes contain the highest quality aniline dyes that money can buy. And it is the aniline dyes that count. They are the life of their colors; the source of their rich colors; brilliance and permanence.

Hybrid Plant to Produce Cotton

"Brotex" Latest Substitute Discovered by English Scientist

Considerable interest is being taken in textile circles in England in connection with a development of a hybrid plant which has been named "brotex" and which has been discovered by Leonard Browning, a research horticulturist. It is learned from McGill University.

It is stated that the plant grows from seed and matures rapidly, requiring about 15 months. It attains a height of eight to 10 feet, and a stem circumference of from eight to 10 inches.

It is a biennial and produces a commercial crop of fibre in the first year and seeds at the end of the second year. It is claimed to yield three raw materials of great commercial value: a fibre for textile purposes which it is stated forms an efficient substitute for cotton wood cellulose in the second year from the fibre stem which can be used in paper making, and seed which can be used in the manufacture of cattle food.

Apparently the experimental trials have proven highly satisfactory to those financing the scheme and this coming year thousands of acres are to be planted with seed obtained this fall.

In well-informed quarters it is considered there are market possibilities for the development of the plant as a substitute for cotton possibly in part for wood and undoubtedly experiments will be made in Canada and in other parts of the Empire to try out the possibilities for growth of the plant.

Tasty Sandwiches

Apple Sandwiches—One ripe apple, 1 stalk celery, ½ green pepper; chop together and moisten with mayonnaise. Use with white or graham bread.

Peanut-Pineapple Sandwiches—Use 2 parts pineapple to 1 part peanut butter and spread on white bread. Chopped Meat and Nut Sandwiches—Use equal parts chopped chicken, beef or other cold meat and walnuts. Moisten with mayonnaise.

Jam and Cheese Sandwiches—Spread 1 slice of buttered white bread with cream cheese, the other with jam or jelly. Sprinkle with nuts and put together.

Raisin, Celery and Nut Sandwiches—Cook 1 cup of chopped raisins till soft. Add 1 cup chopped celery, 1 cup chopped walnuts, and moisten with 1 teaspoon of lemon juice and mayonnaise. Keep in covered jar for use.

Cheese Sandwiches—One half pound cheese, 3 sweet cucumber pickles. Grind through the food chopper. Thin out with mayonnaise dressing and place between buttered bread.

Dried Beef Sandwiches—For 12 sandwiches, soak ½ pound dried beef in cold water one hour. Then dry, roll in flour and fry in dripping; place between thin slices of buttered bread.

Indian Sandwiches—Mix mashed sardines with yolk of hard-boiled egg and cooked salad dressing. Spread on unbuttered bread.

New Sandwiches—Thin out peanut butter with a little water and add 1 tablespoon ketchup. Mix well and spread on buttered bread.

Salmon Sandwiches—To 1 cup salmon, chopped fine, add 3 tablespoons cooked salad dressing. Season and spread on buttered bread.

Date Sandwiches—One-half cup of dates, ½ cup walnuts chopped, ½ cup sweet cream; mix well all together and spread on buttered bread.

Celery Sandwiches—Equal parts of finely minced celery and cheese, moistened with 2 tablespoons salad dressing. Season with salt and paprika, spread on thin slices of buttered bread.

Sunday Les

September 29. Le Significance of Restoration—Text—The merciful overlooking to them that fearlessness unto Psalm 103: 17.

We do not know the significance of pen. We may be a factor in the restoration of the world as we have occasioned it which is leading time as rapidly, we able to see the it all and discernance in it.

There can be no case with the rest of Jerusalem. When the nation was loved centre in de to a far foreign day of unbroken in the light of its perspective, understood and its demptive elementized. Through the lessons that thing of the far away to the dissonance as it is.

During the past of these people in the life from God the and teachers give having learned—that lesson, we planted once again in Judah.

What difference in the Jewish life re-established old kingdom, just preceding the religion over again, national religion, abroad" something of an outlook on the measure, the religion God was no longer time, but the God. What was the effect on their own? Recall the emphasis individual responsibility of getting the accountability in the life was no longer turned Jews. Did of the Jews take idolatry? Before been the cause of their religion, it was this a true church.

What effects character of the here they developed mercantile tendencies them as a people. In what way did pare the way for Messiah and the of God? Glorify were largely cut to a new date. In national outlook, veloned, prepared, cention of a unit universal brotherly.

It would be an outstanding leader so largely to the education of the leadership in the life, the restoration of the restoration of the shabbat, Ezra, N.
