When the Child Creates His World

Edith L. Reid

"The minute Lonny comes home from school he wants to run right over to Roy's house," complained Mrs.

"That's exactly the way Dick acts," sympathized Mrs. Martin. "He stays at home barely long enough to eat his

Mrs. Palmer shook her head dolefully. "I fixed Lonny's room all up beautifully when he was away last vacation and had it all ready to surprise him when he came home. We got him a desk and painted his bed, and Daddy even built him a bookcase. But he is not satisfied to stay at home if he can get over to Roy's."

Mrs. Martin nodded in agreement. "I spent a lot of time on Dick's room, too, last summer. I made him a darling bedspread to match the drapes and knit a rug to make it look homey. I just adored it and wanted to sit up there myself. And then one daywhat do you suppose! I found three of the boys sitting on that lovely spread calmly playing with their marbles, and Dick cried because I scolded him before the others."

And so the conversation continued between the two perplexed mothers who were doing so much for their children yet failing to make home the most desired place on earth.

Their deploring voices reached me at intervals for half an hour as they talked from their back porches and I weeded my flower-bed behind the hedge. And I thought how little one can tell of a home from the outside. I knew Roy's home and his parents. They were able to give Roy no more advantages than Lonny and Dick had, but there was this distinction: Lonny and Dick were presented with possessions; Roy was given the opportunity to create his own environment.

Roy's room is exactly as he wants it. His bed is a comfortable cot with a durable Indian blanket as a cover. Not dainty, to be sure, but something that six boys could sit on without making a wrinkle. Roy made his own bookcase from an apple crate by puting in two rather wobbly saelves. It is not a work of art, but represents tive work in the basement. Its upper shelf possibly holds a j r of live polli-

When Roy's mother found his chemistry set in his closet she omitted any scolding about his putting hose old bottles of acid near his best suit. Instead she quiedly removed the new suit to the spare closet away from harm.

Roy's friends actually went into the kitchen one rainy day and made a chocolate cake after Mother's recipe. They washed the dishes afterwards, ate the cake and then roller-skated in the basement.

Lonny's mother would have said she couldn't have them baking a cake in her kitchen. Dick's mother would have reproved them for being too noisy at their skating. Yet both of these mothers bemoan the fact that their sons do not love the homes which they, the mothers, make and

The home spirit which is truly valuable and appealing is the co-operative one where the child has a share at least in creating the environment out of which satisfaction and enthusiasm spring naturally.-Issued 'y the National Kindergarten Association, 8 West 40th Street, New York City. The Foreign Trade of the U.S.A.

Quebec Soleil (Lib.): So long as nations of Europe, shattered, ruined and disorganized by the War, needed American products, the high tariff was no great handicap to the foreign trade of the United States. But in 11 years of effort, the great nations of Europe have been able to pick up bit by bit the aormal course of their industry, and many a market on while Uncle Sam used to count is gradually escaping from his clutches and recovering its autonomy. They are all the more ready to make their escape, as they long to be freed of a com mercial imperialism compounded o egoism and the exploitation of the human species. Thus, because they wished to get everything for nothing, finding themselves utterly de erted
