Paris Fears Birds Will Leave City

Trees Kept for Homes of Warblers—No Nooks in Modern Buildings

Paris.—Steamship, railway and travelers are not the only kinds of tourists that Paris wishes to attract and hold. Along with the campaign which has been instituted to promote "tourism" in France there is being conducted a campaign to make birds feel at home in the capital, and to prevent them from yielding to the impulse to leave the city for the country, an impulse which appears almost as strong as that which has been drawing people from the country to the cities.

It happens that still another campaign is being conducted to prevent the deforestation, or debilitation of France, and the bird lovers have coined the word desoisement (from oiseau, the French word meaning "bird") to describe the tendency which they wish to overcome in Paris. In fact, the two things usually go together, and the friends of birds are keen on keeping as many trees standing in the city as possible in order to provide leafy homes for the warblers. The music of winged songsters is highly esteemed, and it is significant that an ornithologist of note, M. Berriz, has inherited the name of a great composer.

The modern school of architects came in for a certain share of the blame for the "desoisement" of Paris, until one of their leaders, M. Mallet-Stevens, gave convincing proof of their innocence. It was said that the newer types of buildings, being designed on strictly straight lines, did not afford the convenient nooks and corners for nests which birds used to find in abundance in the older houses. M. Mallet-Stevens has proved his devotion to birds by pointing out that there is no better place than a "modern" terraced roof in which to make friends with the birds. He keeps a meal spread for them on the roof of his house, and there is always a bath ready for them in his roof garden. He has even designed a special type of bird house or shelter which is admirably adapted, both artistically and from the practical viewpoint, to the more modern type of city dwelling.

The French Birds' Protection League, which is playing an important part in this campaign, has created 1500 bird refuges in France, where proprietors of wooded lands have agreed to protect winged tenants and visitors, provide shelter for them, and feed them in winter. In the Parc Monceau, a pretty public garden in Paris, the league has installed, by way of experiment and demonstration, several devices for feeding the pigeons, sparrows and blackbirds which frequent the park.

War Robs World Of Garden Cities

The League of Nations reports the cost of the Great War at \$362,000,000 and 37,000,000 lives—that is four times the total population of Canada, not merely in lives, but lives of selected men, competent in virtue of admirable qualities to meet the most terrible responsibilities that an imperfect civilization can place upon men. The cost in money would have built 181,500 garden cities, where the evils of congested living, the sordidness, the ugliness and the despair that breeds resentment, anger, broken homes, ill-bred children, crime and disease would have no seed bed for growth.

Hospitals Require Efficiency And Flexibility, Says Prince

"A really good hospital service must combine, in due proportion, the qualities of efficiency and flexibility, of organization and freedom," said the Prince of Wales at a hospital function recently. "Hospital work requires all these qualities. It is from one point of view a part of public health administration. At the same time, from another point of view, its essence consists of a number of individual doctors treating a number of individual patients; one of the most intimate personal and human relationships that exists outside family life. It must also provide for the advance of medical science; and allow scope both for the individual genius and for the organized team work which together produce that advance."

"Yet, again, it is a form of mutual aid, in which all members of the community can take a direct personal share, on behalf of their fellow-members who are disabled by sickness. This is why our people value the voluntary hospitals to the tune of £2,700,000 a year in voluntary gifts in London alone, besides £850,000 a year from the patients themselves. And this is why it is so important that the spirit of the voluntary hospitals should be preserved."

One of the largest employers of disabled labor is the British Legion. In its poppy factory alone every one of the 257 employees is a disabled ex-Serviceman, and they turned out over 31,000,000 poppies last year. A man has just married an actress who cut him dead when he first asked for an introduction. A case of love at first sight.

AS A MATTER OF FORM 25 YEARS AGO . . .

women wore leg-of-mutton sleeves and ostrich plumes . . . and during the same period men first began smoking Wilson's Bachelor cigars. The "furbelows" have long since been discarded but, today, more men are smoking Wilson's Bachelors—100% Havana filler—than any other ten cent cigar in Canada.

Canadian Forests Owned by People

Only 8% of Forests Privately
Owned—Direct Revenue
\$15,000,000

Toronto.—Through the Dominion and Provincial Governments the people of Canada own 92 per cent. of their forests, the remainder being privately owned. The direct revenue received by the Federal and Provincial Governments from forests in the form of rentals, royalties, etc., amounts to approximately \$15,000,000 annually. The total stand of timber, including all species, both hardwood and softwood, is placed at 242,127,000,000 cubic feet.

Fires, insects and fungi are taking a great toll of Canada's forests. Foresters, forest entomologists, and forest pathologists are co-operating in their defense. The direct revenue received by the Federal and Provincial Governments from forests in the form of rentals, royalties, etc., amounts to approximately \$15,000,000 annually. The total stand of timber, including all species, both hardwood and softwood, is placed at 242,127,000,000 cubic feet.

The forest is second only to agriculture in the value of Canada's products. The capital invested in forest industries is approximately \$675,000,000, one-third of which is in lumbering plants, sawmills, etc., and the balance in the pulp and paper industry. The forests provide 29 per cent. of the entire freight haulage on Canadian railways; supply over 14,000,000 ties annually and almost an equivalent amount of timber for bridges, buildings, etc., and substantially affect the passenger traffic earnings of the railways through the attraction of tourists.

Canada is also the principal source of softwood supply in the British Empire, while the only economic use for one-third of the land area of the Dominion is in the growing of wood. The forests form the most important factor in equalizing stream flow and therefore have immense value in relation to power development.

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acid, and at once. The symptoms disappear in five minutes.

Apocalypse By Ruth Frost

I ask for heaven no brighter blue than this,
No street more golden than this quiet lane—
The bending, sun-flecked branches stoop to kiss
The shadowy bank, where lately summer rain
Has come to garnish thus the common sod
And make each blade of grass a glittering gem
Lo! here I see the temple of our God,
The holy city of Jerusalem.
—The Christian Century, Chicago.

"Is Miss Swift going to Europe for her vacation?"
"No, but she's got her press agent to say she's going, and she's just as happy."

A sailor and his parrot were enjoying a conjuring show in a room adjoining a gunpowder factory. The conjurer changed a penny into a sausage. "Now that was good," said the sailor, lighting his pipe. "I wonder what he'll do next?" Then he threw down his match. There was a shattering explosion. Two miles away, the parrot, with one feather left, was sitting on a steeple. "Now that was good," it said. "I wonder what he'll do next?"

Minard's for Falling Hair.

Too Much ACID

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.
Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Aerial Problems To Be Discussed

Special Section in League of Nations Will Handle Matter

Montreal.—A number of aspects of air communication which are still subjects for discussion and sometimes for disagreement, are to be taken up by a meeting of the air committee of the transit section of the League of Nations, which will be held in the near future, according to Laurence C. Tombs, an official of the section, who is spending a short holiday in Montreal.

Mr. Tombs spoke warmly of the work in the League done by Canada and particularly by such Canadians as Sir Herbert Ames, Major George Washington Stephens, and Col. T. A. Hiam. Dr. W. A. Riddell, the Canadian advisory officer, is doing excellent work, he said.

WHEN YOUR CHILD IS FEVERISH

Give Him Baby's Own Tablets

The health of babies and little children is subject to rapid changes. Thus the mother must be on her guard. At the first sign of feverishness Baby's Own Tablets should be given—this may avert a serious illness.

Concerning the Tablets Mrs. Norman Lee, Uxbridge, Ont., says: "My little boy, now three years old, was not at all well. He was feverish and had no appetite. I gave him Baby's Own Tablets and he was soon well again. I would not be without the Tablets as long as there are young children in the house."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Lord Gives Britain Famous Library

London.—One of the finest private libraries in Britain shortly is to become a possession of the nation. Lord Brotherton having decided to present his collection of books and manuscripts, including a rare copy of the first folio of Shakespeare's works and copies of the second, third and fourth folios to Leeds University, where the collection will be housed in the new library buildings now being constructed as the result of a previous gift of \$500,000 by Lord Brotherton.

In addition Lord Brotherton proposes to give \$150,000 for maintenance and administration purposes as well as the continued services of J. Alex Symington, present librarian. The collection includes a wealth of medieval illuminated manuscripts.

Retired naval officers adopt many and varied professions, from boarding-house keepers, schoolmasters, and insurance agents to rabbit-breeders and coal dealers.

Crop Information Service Proposed

Experts Would Be Maintained
In all the Countries of
the World

Ottawa.—Creation of a world-wide commercial intelligence service to be used in collecting expert crop and market information on all lines of agricultural products was discussed here recently by M. H. Lloyd, assistant secretary of the Empire Marketing Board, and Dr. J. H. Grisdale, Deputy Minister of Agriculture and Canadian representative on the executive council of the Imperial Agricultural Bureau sub-committee of the board.

Mr. Lloyd, who is touring Canada in the board's interests, admitted that the creation of such a corps and the dissemination of timely and expert knowledge has been a matter of consideration by the Empire board for some time. It might be discussed, he said, at the forthcoming Empire economic conference. Expert agriculturists, schooled in the collection of marketing and crop conditions would be maintained in practically all countries of the world, if the plan were set in operation. Their reports would be collected in one central depot and from there distributed all over the Empire.

Such a scheme, Mr. Lloyd believed, would be of great assistance to the Canadian wheat pool and other co-operative marketing organizations. The world's marketing and crop conditions could be gauged quite accurately and the dissemination of this information would be of great value to agriculturists all over the Empire. He will visit Toronto, Winnipeg, Regina and further west.

BRIGHT EYES, ROSY CHEEKS

The Birthright of Every Girl.

Dull eyes mean misery and weakness—sure sign of a bloodless condition. Anemic girls and women have dull, heavy eyes with dark lines underneath. The bright-eyed girl or woman is always happy and well.

There is one way to make the eyes bright—to bring the glow of health to pale cheeks—th t is to invigorate the body with new blood—rich, red health-giving blood. Dr. Williams' Pink Pills do this and the, do it well. Concerning them Mrs. Robert Devitt, Brockham, Ont., says: "My daughter became so ill and nervous we had to take her out of school. She was pale and thin, her eyes were dull and the least exertion upset her. I began giving her Dr. Williams' Pink Pills and in less than six months you would not know her. She gained in weight and strength and is now the picture of health."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Grass and Moss Stains

During the summer grass and moss stains are common, and as these are unsightly—especially on white garments—steps should be taken to remove them as soon as possible.

If the stains are on white material, damp the affected parts with cold water, then sprinkle with a mixture of equal parts of salt and tartaric acid. Allow the mixture to remain on the material until it is quite dry, then brush off lightly with a pad of soft cloth, or with a soft brush. Should any traces of the stains remain, repeat the process.

For colored materials, rub the affected parts lightly with pure glycerine. Allow this to remain on the material for an hour or so, then wash the article or garment in the usual way. If the stains are old, it may be necessary to repeat the process two or three times.

Greetings

To-day I met a collie dog
That looked like "Sunny Jim."
And when I stopped the gentleman
To ask what tickled him,
He gave me such a nasty look,
As if I were quite dumb,
And said—"You blooming idiot,
To-day the Shriners come."

"But why," said I, "Should dogs be glad
Although they're very fine?"
He growled—"Each single Shriner is
A bosom friend of mine—
They always stand for kindness,
And that includes the dumb,
So all Toronto animals
Are glad that they have come."
—Humans' Plead.

Zeppelin Chatter

Zeppelin passengers begin to kick about this and that, so it looks as if Zeppelin transportation had definitely arrived. Before long the new passenger will hear cabin remarks like these:

"I never fly on any other line."
"Airsick? Too bad, old chap. When you've crossed as many times as I have you won't miss a meal."
"A pretty sunset, yes. But you ought to have seen the sunsets we saw over the Pacific."
"It was the tenth crossing, I think—John, was it our tenth crossing, or our twelfth, when we sighted all those whales?"

Debtor

(For I am debtor both to the Greeks and to the Barbarians.—Romans 1: 14.)
Hotfoot through the world I go
Blinking night and wondering day
Seeking proper coin to pay
The tremendous debt I owe—
Jungle green, and blue marsh clay,
Coral in a smoky strand;
Small waves strolling up the sand
On the tip of Africa—
Shall I be more dear to me
Than the Doric-columned mist?
Cool of pearl and amethyst
Than a mountain savagery.
Pagan bird and Voodoo rite,
Primal snarling winds that pass—
Than a blade of crystallized grass
Slender and proportionate?
Curious the spoil I seek,
Strange the bartering I do,
Being thus a debtor to
Both Barbarian and Greek!
—Sara Henderson Hay.

CONSTIPATION COMPLETELY GONE

Writes Mrs. W. Walker, Thousands say constipation, indigestion, gas and sour stomach relieved. Complexion clears like magic. Nerves, liver quiet. Get Fruit-a-tives from drugstore today.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved. Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion. The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

HOW I LOST 28 LBS.

In a Safe, Easy Way

Read how one woman lost 28 lbs. of fat, without diet, without dangerous drugs or exercises.
"I take a daily dose of Kruschen, and I have lost two inches round the waist and hips and 28 lbs. since last summer. I feel very well on it and people tell me I look very fit. I am 5 ft. 4 in. in height, 40 years old, and come of a stout family."
Don't go lumbering about with a burden of unhealthy, excess fat—you can get rid of it easily if you get the Kruschen habit.

Kruschen Salts provides the easiest, safest and surest way to lose fat that you can possibly desire. By purifying your blood of harmful acids, helping the liver, kidneys and bowels to throw off waste material, they remove in a natural way the fatty deposits which poisonous waste matter has produced. Not only do you lose pounds in weight, but you lose years in appearance. Little by little, the ugly fat disappears—slowly, yes—but surely—and you soon feel wonderfully healthy, vital and energetic.

AEROXON With The Pin The Honey Fly Catcher

You Must Do Your Bit
in the war against the fly, carrier
of germs and breeder of disease.

It is proven that AEROXON is one of the most convenient and most efficient means of combating this fly evil. It is convenient, because of the push-pin. It is hygienic; flies never get away when once caught. Each spray gives three weeks' perfect service.
