Lesson II-The Prodigal Son-Luke 15: 11-24. Golden Text -There is joy in the presence of the angels of God over one sinner that repenteth.-Luke 15: 10.

· ANALYSIS. I. THE GOSPEL IN THE PARABLE. II. THE PRODIGAL SON.

III. THE LOVING FATHER. I. THE GOSPEL IN THE PARABLE.

But Rover looked after more than the Prodigal Son is the subject of the first part, the Elder Brother of the second. The first part has constantly been taken as the gospel itself in story form. This is quite right, but the objection has been raised that the Christian gospel is the gospel of the Cross, and that here is nothing about the Cross ror about the Mediator here But this seems a somewhat superficial judgment. We speak of the Cross as revealing the Father's love; in the story the father directly reveals his love, and there would be no place for a mediator. But is there no cross in the story? When the father, knowing his boy's character, let him go, when news came to the father of the dis asters that had overtaken his son and of the shame to which he had brought himself, was there no Cross in the father's heart? Of this the boy had no inkling at the time. But when he actually reached his father, who cut his speech short, and looking into his father's face he realized what his departure had meant to him and still more '.e disgrace to which he had fallen, then surely the Cross was in his own heart! He was, as it were, This cute bloomer dress offers incrucified with his father, and their reconciliation is effected veritably mother. through a Cross. An analysis of the 8,858 emergency calls show that 20 per cent. of the total were because of short circuits, wet wires, poor distributor points, or other failures of the car's ignition system. Tire trouble ran a close second, some 1,656 service calls having been made, the majority of which were for women drivers.

Car towing is shown as the third, with 1,499 calls, which, if added to the 207 made with a lifting crane, would bring it second on the list. Starter and battery trouble were fourth and fifth, respectively-while the least number of emergency calls were made to replace glass which had become broken or shattered; a decrease from the year previous,

The only other decreases from 1929 were seen in the calls for the use of the crane where the ordinary tow-line was impractical and in the habit of running out of gas.
