Canada's Water

Power Resources

Department of the Interior

Estimates Total Resources

-Remarkable Advance

in Development

Each country develops its power-

producing facilities along the most

economically desirable lines and spe-

cial facilities for power production

constitute a definite national advant-

age. Canada possesses this advantage

in a marked degree by reason of the

extent and location of her water power

resources which are such that, except

for a relatively small proportion, her

entire settled territory enjoys hydro-

electric service. Not only is this true

at the present time but there are suf-

ficient undeveloped sites to assure the

advantages of this service in the face

of expanding demands and advancing
